

What will I learn?

Applying the following maths to everyday situations

- applications of statistics
- probability
- linear programming
- sequences and growth.

Our Mathematics in Context course is designed for you if you have achieved an 9 - 4 in GCSE Mathematics, but you've chosen not to continue your maths studies at AS or A level. This engaging and relevant qualification will improve your mathematical knowledge and show you how to apply it in real-world contexts.

Highlights

It will prepare you for professional training or higher education courses, or equip you to apply for employment or higher apprenticeships in a wide range of industry sectors.

Applying the following maths to everyday situations

Assessment

Two Exams

Course requirements

A minimum of six grade 9-4 GCSE passes, including grade 4 in Mathematics.
