

SSIF Writing Project

Our 2 year writing project, developing writing in science across Key Stage 2, has now finished. We have worked on developing vocabulary, producing more sustained pieces of writing and linking scientific and language skills in written work.

The Project Leader liked some of our work so much she is including examples in her next book!

We can't wait to find out who has been chosen and to see their work in print.

'Our Stories' Primary reading programme

Over the next two terms we will be taking part in an exciting reading programme to promote reading for pleasure. We will host three fun afternoons in the Summer and Autumn terms for children and parents to celebrate the fun of reading. Each child will get to choose a new book to keep, absolutely free, at each session.

We have also been awarded funding for over 300 new books for our school library. The children will help to select these so we have books everyone can enjoy.

Look out for details of the first event – coming soon – and the first free book!
