

Habitat hunters!

Week Beginning	Year 4 Topic Tasks Summer Term 2 Name	Hand in	Completed Signed
06.06.19	<p>Habitat research: Using the sheet provided, can you fill out the table? You may choose 5 habitats that interest you. You must answer the questions in detail to gain as much knowledge as possible. Please note: Some questions may not apply to your habitat... For example: Antarctica will not have an Oak Tree growing here.</p>	12.06.19	
13.06.19	<p>You are the 'Habitat hunter': Over the course of this week, I would like you to find a habitat (this could be a riverbank, the beach, your garden flower bed etc.) please list the creatures/ animals found in this habitat and explain the resources they need to survive. You should also explain what <u>other</u> creatures/ animals may be a threat to their survival and how they protect themselves within their habitat.</p>	19.06.19	
20.06.19	<p>3D Habitat: I would like you to create a 3D model of a habitat of your choice. You can use house hold objects to represent different features. E.g. toilet roll tube representing the trunk of a tree. Equally, if you see any resources within the classroom that would be fitting for your work, please ask to take it home ☺ Due to this being a more detailed project, I am allowing 2 weeks to complete this. I look forward to seeing your creations!</p>	03.07.19	
04.07.19	<p>Poster: Can you create a poster which aims to protect a habitat? Please mention human's impact on this habitat and how we can help support/ care for it in the future. For example: Global warming is a cause of human pollution which is destroying habitats such as Antarctica. Animals such as Polar bears are fighting for survival and may become extinct if we do not make a change in our everyday lives.</p>	10.07.19	

Name of Habitat					
What grows here?					
What mammals live here?					
What birds live here?					
What insect lives here?					
Other interesting facts
