

Bransgore School

Pollination Garden

New Parent Team

Hiya

As my son is moving on to secondary school in September, we are looking for a new team of parents to support the school Eco Council children in the management of the pollination garden.

The garden has been specifically set up to attract pollinators such as bees and butterflies and is a riot of colour. As the garden is now established, the maintenance is low but does require the occasional adult input.

I would be able to give a training session on wildlife gardening and the care of the garden in the autumn term.

If any parents are interested in supporting the children and doing their bit for wildlife, please can you leave your details with the School Office team and we will contact you in September.

Thank you so much

Mandy (Arun's mum)
