### Numbers (Using numbers 1 - 10)

Place them in order and say which number is one more or one less than a given number.

Using quantities and objects, they add and subtract two single-digit numbers and count on or back to find the answer.

Uses the language of 'more' and 'fewer' to compare two sets of objects.

Finds the total number of items in two groups by counting all of them.

Says the number that is one more than a given number.

Finds one more or one less from a group of up to 10 objects.

In practical activities and discussion, begin to use the vocabulary involved in adding and subtracting.

Estimates how many objects they can see and checks by counting them.

### Shape, space and measures

Explore characteristics of everyday objects and shapes and use mathematical language to describe them. Recognise, create and describe patterns.

Beginning to use mathematical names for 'solid' 3D shapes and mathematical terms to describe shapes.

Selects a particular named shape.

Use familiar objects and common shapes to create and recreate patterns and build models.
