

# Y5 Learning Log Titles

## Term 1 – The Four Elements

This project allows the children to investigate any or all of the four elements; wind, fire, water and earth. They could look into the contrasting positive and negative effects this can have in our world.

## Term 2 – Home and Away

This geographical project lends itself to sporting activities, languages or even a comparison between two places. Football fans could compare two stadiums or children with a love of languages could explore different languages spoken around the world.

## Term 3 – Stargazers (Space)

Space has fascinated us for thousands of years, with many questions still being asked today. This project gives children the opportunity to fly high into space and find some of those answers.

## Term 4 – Be More Green

What can we do to be more green? Children could investigate what we could do to help look after our world and the reasons behind why we are looking to 'be more green'!

## Term 5 – Ancient/Modern Greece

This fascinating country full of history, culture and adventurous literature opens itself up to be delved into. Will they explore the Olympics history there? Will they travel into the history of Greece? Will they end up lost in the exciting myths and legends or will they find themselves captivated by something else?

## Term 6 – Free Choice

Their final Learning Log gives the children the opportunity to share with us anything that they choose.
