

Dear Parents / Carers,

Our Math's targets in Year 1 this half term are to recognise and order numbers to 5, 10, 20, 50 and then 100. Please help your child to practise their targets at home. Below are a range activity ideas to choose from.

Once your child is able to read and order these numbers (in numerals and words), repetition will help increase their confidence.

The children will be practicing their targets once a week at school. It would be great to see photographs of the children in action, practising their targets, and they can show or talk to each other in class about which new ideas they have used to help them.

Kind regards, Mrs Turner and Miss Clark.

A great outdoor activity! Number hunts in the garden.
