WALT: practise our spellings

This week, we have introduced all the children in Year 5 to Spelling Shed, a fun, interactive programme which they can play on the computer to help them to practise their spellings. We have uploaded their spellings to practise from this and last week's RWInc Spelling Programme for each spelling group. Also, there are the Year 3 and 4 word list spellings are there to review and consolidate. ALL children have their own log in and a letter has been sent out with the details. Have fun!

WALT: understand tessellation

In our computing unit, 'We are Artists' this week, we started to explore tessellation. Can you spot examples of the local environment? Now create your own tessellating pattern using a regular shape? Remember that there must be no gaps and try to use only a few colours for a striking effect. Colouring should be neat (in the same direction) and in the lines.
