Sandbrook's Curriculum Blog

Computing

July 2019

During the Spring term we asked children who were passionate about Computing to apply and interview for the important role of subject ambassador.

We would like to introduce our eleven successful applicants who now represent our subject and wear a green badge, so if you see them around school make sure you say hello

Tyler, 1C

This year in Computing, I have enjoyed making a snail shell for Norman the slug with a silly shell using the 2simple spinner tool. Also, I have learnt how to type using two hands and I learnt how to copy and paste pictures.

Aleena, 2C

I like to use computers at school to research. Also, I have started to program basic commands, like direction – I am getting good at this! I can take photos and use apps on the ipads.

Alinane, 3C

I've got two computers at home and I have to help my brother use them. I like computers because they are fun and I can play fun games.

In computing we research things, we also play maths games, my favourite game is hit the button.

Hanna, 4S

I always wanted to be a computing ambassador as I am interested in: how to be safe online, how to use the internet, key information to stop viruses, how to help others on the computers. I really enjoy doing this job because I learn more and more each day.

Jemma, 5S

I love computing because your hands are never hurting. This year we have learnt about programming using Scratch.

Anaya, 2C

I like researching on the computer. We have also been working on paint – looking at pointillism. I can use programs that help me learn. I do this at home too.

Kamran, 3C

On google, I search for facts like some on the Victorian times. When we play on the computer in class, we all let the other person choose a game that we both like so we can both have fun. Did you know I have a computer at home?

Holly, 4C

I love to make PowerPoints about what I love. The excitement in learning how to do coding and know what to do without giving others instructions is amazing.

Every Tuesday I do my job. It is always nice to help other people with computers and help them save things.

Kaylem, 6S

The things I enjoy about being a computing ambassador are that I get to help in my spare time and I am very good with computers, so if there is a problem I will be there to help them solve the problem.

Alisha, 6C

We have had Internet safety day where we learnt about how to be safe online. We have also learnt about spreadsheets.

In our role, so far we have helped during Safer Internet Day and continue to manage the IT equipment in school, on a rota – keeping the laptops and ipads organised for the whole school!
