

General Information

Description

There are 2 routes through Science in year 10 and 11.

Option 1

Students are following the AQA called Trilogy.

Every student has 9 lessons per fortnight with an even split between Biology, Chemistry and Physics. There are no coursework elements anymore and the course is examined at the end of year 11.

There are 3 exams for the year 10 element of the course and 3 exams for the year 11 element.

In addition to these exams, students have to complete a number of required practicals as they work their way through the course, these will be carried out as part of their Science lessons.

At the end of the course students will come out with 2 GCSE qualifications in Science.

Option 2

Students are following the AQA courses in Biology, Physics and Chemistry.

At the end of year 11 each student will sit 6 exams, 2 for each of the Sciences.

In addition to these exams, students have to complete a number of required practicals as they work their way through the course, these will be carried out as part of their Science lessons.

At the end of the course students come out with 3 GCSEs.

Topic Breakdown

Breakdown for all the courses: at the end of these pages. Please note, Chemistry and Physics have a core and triple version. Biology has core and triple on the same sheet the red sections are triple only.

Additional Information

Assistance

- Each student has a course map at the front of their exercise books.
- www.kerboodle.com This is an online resource, this has access to all the textbooks for the course which are linked to the course maps, and additionally there are numerous interactive activities to support learning. Login - username - this will be students first initial and last name, ie jblogs. Password - same as username. Institution code - so5
- CGP revision guides are available from the school library
