Power of Reading						
Mathematics	Pupils will develop their mathematical skills through specific math lessons (Please see the National Curriculum for further details). Our curriculum aims to ensure that all pupils: become fluent in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately. Reason mathematically by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language can solve problems by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions					
Science	Topic: Heroes/ WW1 Science Focus: Animals Including Humans	Topic: Robinwood/ WW2 Science Focus: Light	Topic: Evolution Science Focus: Evolution and Inheritance	Topic: Jamaica Science Focus: Living things and their habitats	Topic: Globalisation Science Focus: Electricity	Topic: Responsibility Science Focus: Dinosaur hunters
