

*Ss. Peter and Paul's Catholic Primary School*

*Our vision for Science and the five core principles that underpin our strive for outstanding learning for all.*

At Ss. Peter and Paul's children enjoy Science and make outstanding progress because they have good knowledge and understanding which equips them for their future careers in an ever-changing Scientific and technological world. They love science lessons in which both staff and children are confident and enthusiastic. Staff facilitate independent hands-on learning where children are able to ask and answer open ended questions Children can classify information, conduct fair investigations, spot patterns and observe changes over time with

*Children have hands-on practical experiences both in and outside the classroom.*

*Children confidently use scientific vocabulary and ask scientific questions*

*The profile of science is evident around the school. The whole school community is involved.*

*Children are confidently finding things out for themselves and are actively involved in their own learning.*

*Teachers are skilled in supporting the children and subject knowledge is good.*
