Allergens Policy

Version and Date		Action/Notes: To be reviewed every 2 years. 20.11.2021
v.1	20.11.19	

Elevate Multi Academy Trust (Elevate) is concerned with a whole Trust approach to the health care and management of those members of our community suffering from specific allergies.

Elevate and its Academies are aware that the children may suffer from food, bee/ wasp sting, animal or nut allergies and they believe that all allergies should be taken seriously and dealt with in a professional and appropriate way.

Elevate and its Academies position is not to guarantee a completely allergen free environment, rather: to minimise the risk of exposure, encourage self-responsibility, and plan for effective response to possible emergencies.

Elevate and its Academies are committed to no food and drink sharing.

Parents and carers are asked to provide details of allergies in the child's School Admissions Forms, which are submitted before starting in the Academy.

General Aims:

The intent of this policy is to minimize the risk of any child suffering allergy-induced anaphylaxis whilst at the Academy.

An allergic reaction to nuts is the most common high risk allergy, and as such demands more rigorous controls throughout the policy.

The underlying principles of this policy include:

- 🌿 The establishment of effective risk management practices to minimise the child, staff, family member and visitor exposure to known trigger foods and insects.
- 🌿 Staff training and education to ensure effective emergency response to any allergic reaction situation.

This policy applies to all members of Elevate's community:

Staff
Parents and carers
Volunteers
Supply staff
Children

Definitions:

Allergy - A condition in which the body has an exaggerated response to a substance (e.g. food and drug) also known as hypersensitivity.

Allergen - A normally harmless substance that triggers an allergic reaction in the immune

system of a susceptible person.

Anaphylaxis - Anaphylaxis, or anaphylactic shock, is a sudden, severe and potentially life-threatening allergic reaction to food, stings, bites, or medicines.

Adrenaline Auto-Injector (Auto-Injector) - is a syringe style device containing the drug Adrenalin, which is ready for immediate inter-muscular administration.

Minimized Risk Environment- An environment where risk management practices (e.g. Risk assessment forms) have minimised the risk of (allergen) exposure.

Health Care Plan - A detailed document outlining an individual child's condition treatment, and action plan for location of Auto-Injector.

Procedures and Responsibilities for Allergy Management:

General:

- 🌱 The involvement of parents and carers and staff in establishing individual Health Care Plans;
- 🌱 The establishment and maintenance of practices for effectively communicating a child's healthcare plan to all relevant staff.
- 🌱 Staff training in anaphylaxis management, including awareness of triggers and first aid procedures to be followed in the event of an emergency.
- 🌱 Age appropriate education of the children with severe food allergies.

Medical Information:

- 🌱 The Academy will seek updated information via medical form at the commencement of each calendar year;
- 🌱 Furthermore, any change in a child's medical condition during the year must be reported to the Academy;
- 🌱 For children with an allergic condition, the Academy requires parents and carers to provide written advice from a doctor (GP), which explains the condition, defines the allergy triggers and any required medication;
- 🌱 The Head teacher will ensure that a Health Care Plan is established and updated for each child with a known allergy.
- 🌱 All members of staff are required to review and familiarise themselves with the medical information;
- 🌱 Where children with known allergies are participating in school excursions, the risk assessments must include this information.

Medical Information (Auto-Injector):

Where Auto-Injector (Adrenaline) are required in the Health Care Plan:

- 🌿 Parents and carers are responsible for the provision and timely replacement of the Auto-Injector;
- 🌿 The Auto-Injector are located securely in relevant locations approved by the Head teacher;
- 🌿 Auto-Injector will be located so that all adults involved with the child know where they are at all times.

The Role of Parents and Carers:

Parents and carers are responsible for providing, in writing, on-going accurate and current medical information to the Academy.

Parents and carers are to send a letter and meet with the Academy to confirm and detail the nature of the allergy; including:

- 🌿 The allergen (the substance the child is allergic to);
- 🌿 The nature of the allergic reaction (from rash, breathing problems to anaphylactic shock);
- 🌿 What to do in case of allergic reaction, including any medication to be used and how it is to be used;
- 🌿 Control measures – such as how the child can be prevented from getting into contact with the allergen;
- 🌿 If a child has an allergy requiring an Auto-Injector a Health Care Plan must be completed and signed by the parents and carers;
- 🌿 It is the responsibility of the parents and carers to provide the Academy with up to date medication / equipment clearly labelled in the original packaging;
- 🌿 In the case of life saving medication like Auto-Injector the child will not be allowed to attend without it;
- 🌿 Parents and carers are also required to provide up to date emergency contact information;
- 🌿 Snacks and lunches brought into the Academy are provided by each child's Parent and carer;
- 🌿 It is their responsibility to ensure that the contents are safe for the child to consume.
- 🌿 Parents and carers should liaise with staff about appropriateness of snacks and any food-related activities (e.g. cooking)

The Role of Staff:

Staff are responsible for familiarising themselves with the policy and to adhere to health & safety regulations regarding food and drink.

- 🌿 If a child's School Admissions Form states that they have an allergy then a Health Care Plan is needed. A risk assessment should be carried out and any actions identified to be put in place. The Assessment should be stored with the child's Health Care Plan.
- 🌿 Upon determining that a child attending the Academy has a severe allergy, a team meeting will be set up as soon as possible where all staff concerned attend to update knowledge and awareness of child's needs;

Academy logo

- 🌿 All staff who come into contact with the child will be made aware of what treatment/medication is required by the Head teacher or Inclusion Team and where any medication is stored;
- 🌿 All staff are to promote hand washing before and after eating;
- 🌿 Snack time foods are monitored by staff and are peanut, nut free and other allergens depending on the children attending. All staff should know the procedures at snack and lunch time to ensure the safety of children with allergies;
- 🌿 However, staff cannot guarantee that foods will not contain traces of nuts;
- 🌿 All tables are cleaned with an approved solution;
- 🌿 Children are not permitted to share food;
- 🌿 Elevate and its Academies provide specific Auto-Injector use training;
- 🌿 The Academy may ask parents and carers for a list of food products and food derivatives the child must not come into contact with;
- 🌿 Emergency medication should be easily accessible, especially at times of high risk;
- 🌿 Staff should liaise with parents and carers about snacks and any food-related activities.

Actions:

In the event of a child suffering an allergic reaction:

- 🌿 The Academy will delegate someone to contact the child's parents and carers;
- 🌿 If a child becomes distressed or symptoms become more serious telephone 999;
- 🌿 Keep calm, make the child feel comfortable and give the child space;
- 🌿 If medication is available it will be administered as per training and in conjunction with the Elevate Supporting Children With Medical Needs Policy;
- 🌿 If parents and carers have not arrived by the time ambulance arrives, a member of staff will accompany the child to hospital;
- 🌿 If a child is taken to hospital by car, two members of staff will accompany them.

Role of other Parents and Carers:

Snacks and lunches brought into the Academy by other parents and carers should be peanut and nut free wherever possible.

The Academy will ensure that parents and carers are regularly reminded and will monitor the contents of lunchboxes and snack.

Academy logo

Catering:

Our current school lunch provider has their own policy for food allergies. Parents and carers are required to complete the special diet request form which is placed in the special dietary folder kept by the school cook. This is updated annually.
