Special Educational Needs Policy

Date of last review: February 2020
Date of next review: Spring Term 2021

The governing body reviews this policy annually. The governors may however review the policy earlier than this if the government introduces new regulations, if the governing body receives recommendations on how the policy might be improved or if key information within the policy changes.
This policy is a statement of the aims, principles and strategies for implementing Special Educational Needs throughout the whole of St Patricks Primary School. In teaching children with Special Educational Needs we will nurture the children’s spiritual, moral and social development within our Catholic ethos. The policy will be reviewed in line with the priorities set in the School Development Plan.

“*The purpose of education for all children is the same; the goals are the same. But help that individual children need in progressing towards them will be different. Whereas for some, the road they travel towards the goal is smooth and ease; for others it is fraught with obstacles.* (Warnock Report, 1.4)

**Our Mission Statement**

“I come that they may have life and have it to the full”

John 10 Verse 10

St. Patrick’s is a Catholic school
with Christ as our vision.

In our school,
we foster an atmosphere
of love and respect
for God and each other.

We value and appreciate each member of our
school community as unique.

We value different identities in order
that each person may live life in all its fullness.

We aim to deliver a curriculum which meets the needs of all our children and is rooted in the Gospel stories.

We value the faith, culture and traditions
of every child and we encourage partnership between
parents, school, parish and local community.
General Objectives

“All children are entitled to an education that enables them to make progress so that they: achieve their best, become confident individuals living fulfilling lives, and make successful transitions into adulthood” (Code of Practice 2014)

At St Patrick’s RC Primary School the emphasis is on a whole school approach. All staff accept responsibility for providing all children with realistic learning goals in a challenging curriculum. We believe in nurturing and developing the educational, social, emotional, cultural and spiritual aspects by curriculum design and teaching approaches. The National Curriculum Council stated that participation in the curriculum by pupils with Special Educational Needs is most likely to be achieved by encouraging good practice for all pupils and that the majority of pupils with learning difficulties simply require work to be suitably presented and differentiated to match their need.

We therefore intend . . .

• To have regard to the Code of Practice on the identification and assessment of Special Educational Needs.
• To follow the guidelines laid down by Oldham Local Authority.
• To work in partnership with the child, parent/carers, all staff, governors and outside agencies.
• That class teachers will use a range of differentiation to provide effective learning opportunities for all pupils.
• To provide a differentiated curriculum where a child is identified as not making adequate progress, provision that is additional to or different from that provided as part of the schools usual curriculum
• To recognise the importance of early identification and if the child’s difficulties become less responsive to the provision made by the school, then an early start can be made in considering the additional help that the child may need.
• Where a child is recognised as having a Special Educational Needs, an individual Action Plan (IAP) will be drawn up, tailored to each individual child’s needs. Aspirations of the child, parents and school will be discussed and realistic targets will be set. The plans will be reviewed/evaluated each term and involve the child, parent and teacher, where possible.
• For children with EHCP’s termly Person Centre Reviews will be held and relevant outside agencies invited to attend.
• To use a variety of complimentary approaches to support the class teacher and child – differentiation, 1-1, whole class, within the class or withdrawn when appropriate.
• To include the child within the class, wherever and whenever practicable.
• Endeavour to use all resources appropriately and efficiently.
• Make full use of all the support agencies that have been made available through the LA, and various charities.

Code of Practice

The code of practice offers guidance designed to help schools make provisions for pupils with Special Educational Needs following Identification and Assessment of Special Educational Needs.

The following pages set out the model of Assessment and Provision that St Patrick’s RC Primary School will provide in line with the Code of Practice.

Areas of Need

Children will have needs and requirements which may fall into at least one of the areas, many children will have inter related needs. The areas of needs are,

• Communication and interaction
• Cognition and learning
• Emotional, social and mental health
• Sensory and/or physical
• Medical
Identification of Assessment

The Education Act 1996 and Code of Practice 2014 say that a child has a Special Educational Need (SEN) if they have a learning difficulty or issue which calls for special educational provision to be made for them.

A learning difficulty means that the child either

- Has significantly greater difficulty in learning than the majority of children the same age.
- Has a disability, which either prevents or hinders the child from making use of the educational facilities which are provided for children of the same age in a mainstream school.

Special education provision means educational provision, which is additional to, or different from the provision made generally for children of the same age in a mainstream school.

Whether or not a child has SEN will therefore depend both on the individual and on local circumstances. It may be entirely consistent with the law for a child to be said to have special educational needs in one school but not in another. (Excellence for all Children, DfEE, October 1997)

Therefore the importance of early identification, assessment and provision for any child who may have Special Educational Needs cannot be over emphasised. The earlier action is taken, the more responsive the child is likely to be and the more readily can intervention be made without undue disruption to the organisation of the school, including the delivery of the curriculum for that particular child. If a difficulty proves transient the child will be able to learn and progress normally. If the child’s difficulties prove less responsive to provision made by the school, then an early start can be made in considering the additional provision that may be needed to support the child’s progress.

Any of the following may trigger a concern. The child and parent/carer are involved throughout.

- Parent carer
- Child
- Class teacher/ TA assessment/SAT’s results/Baseline assessments
- Response/length of time on SEN register
- Any of the support services mentioned later
- Records-transferred from another school
- Pupil tracking

In identifying children who may have special educational needs we can measure children’s progress by referring to;

- Their performances monitored by the teacher as part of on-going observation and assessment
- The outcomes from baseline assessment results
- Their progress against numeracy and literacy targets
- Their performance against the level descriptions within the curriculum at the end of a key stage
- Standardised screening or assessment tools.

English as an Additional Language

The identification and assessment of the Special Educational Needs children whose first language is not English, requires particular care. Lack of competence in English must not be equated with learning difficulties as understood in the Code of Practice. We would look carefully at all aspects of a child’s performance in different subjects to establish whether the problems they have in the classroom are due to limitations in their command of the language that is used there or arise from special educational needs. Advice would be sought from QEST, SALT or EP if necessary.
School Model of Assessment and Provision

Where progress is not adequate, it will be necessary to take some additional or different action to enable pupils to learn more effectively. Whatever the level of pupils difficulties the key test of how far their learning needs are being met is whether they are making adequate progress or not.

Adequate progress can be defined in a number of ways i.e.-

• Closes the attainment gap between the child and their peers
• Prevents the attainment gap growing wider
• Is similar to that of peers starting from the same attainment baseline, but less than that of the majority of peers
• Matches or betters the child’s previous rate of progress
• Ensures access to the full curriculum
• Demonstrates an improvement in self-help, social or personal skills
• Demonstrates improvements in the child’s behaviour

If a child’s progress is inadequate then the class teacher will discuss actions to take, with parents, SENCO, and the child may take part in a catch up intervention. Permission from parents to do this is not needed at this stage. If the child’s progress is still inadequate after this intervention then the class teacher will have another discussion with the SENCO and will fill out the cause for concern form and the child monitored briefly. The class teacher/SENCO will then discuss the child’s progress again with the child’s parents. In consultation with the child’s parents, a decision may be taken to provide support and interventions that are additional to or different from those provided as part of the usual differentiated curriculum offer and strategies. This is known as SEN support and can be low/medium or high level, and parents will be asked permission for their child to be added to the SEN register in school.

SEN SUPPORT

The triggers for intervention could be the teacher’s or other’s concern, underpinned by evidence, about a child who despite receiving differentiated learning opportunities.

• Makes little or no progress in specific areas over a long period
• Works at stages substantially below that expected of children of a similar age
• Has difficulties in developing literacy and mathematical skills
• Has emotional or behavioural difficulties which substantially and regularly interfere with the child’s own learning or that of the class group, despite having an individualised behaviour management programme
• Has sensory or physical needs, and requires specialist equipment or regular advice or visits by a specialist service
• Has an on-going communication or interaction difficulty that impedes the development of social relationships and cause substantial barriers to learning.

The above is a graduated response of action and intervention when a child is identified as having Special Educational Needs or barriers to learning, but must not be regarded as steps on the way to and Education, Health and Care plan, as some children will require less, rather than more help if the intervention works successfully. The interventions are a means of matching continuous and systematic cycle of planning, action and review within our school to enable all children to learn and progress. Advice and support may be requested from QEST, SALT, Early Help, MIND, and the Educational Psychology Service and a consultation request will be made.

Following consultation advice would be taken as to future and further action. This may be through a request for an Education, Health and care plan.
Education, Health and Care Plan

A child will be brought to the LA’s attention as possibly requiring an assessment through:-

- A request for a plan by the school
- A request for a plan by the parent or carer
At St Patricks RC Primary School if, after we have taken action to meet the learning difficulties of a child, the child’s needs remain so substantial that they cannot be met effectively the resources normally available to the school then we would make a request to the LA for an Education, Health and Care Plan.

Applications for a plan made by the school or parents, may not lead to one being carried out.

How the assessments work

Section 9 of the new SEND Code of Practice: 0-25 years sets out how the assessments should be carried out how the Local Authorities should go about writing an EHC Plan.

Some of the key points include

• The views of the children, young people and their families must be sought and they must be involved during the assessment process
• Disruption the family should be minimised. This includes avoiding multiple assessments and appointments. There should also be a ‘tell us once’ approach so that families do not have to repeat the same information to different professionals.
• Families should be provided with impartial information, advice and support. In the case of young people over the age of 16, a separate service of impartial information, advice and support should be available to them. Young people may also be provided with an advocate by the Local Authority to make sure that theirs views are heard and acknowledged.
• The assessment process should be carried out in a timely manner and it should not take longer than 20 weeks to issue a plan.
• EHC Plans should be focused on the outcomes an individual child is expected to achieve. Any targets must be specific and set out what support is needed to achieve those outcomes.
• EHC plans should be clear, concise and positive. They should also be free from jargon
• It should reflect the views of the child/young person

EHC plans are written by the Local Authority, and contain separate sections detailing the child’s needs, and the steps that must be taken to achieve the outcomes agreed by all people involved in the review.

St Patrick’s follow the Local Authority guidance and documentation for all children with EHCPs.

The EHC plan can also include wider information about a child’s social care needs if relevant.

If a child or young person has received a social care assessment under what is known as the Chronically Sick and Disabled Persons Act, then any support identified as needed under this assessment must be included in an EHC plan.

Other social care assessments can also feed into the EHC plan, providing that it relates to the child’s Special Educational Need. Steps will be taken to ensure sensitive information, including about particularly vulnerable children, is not disclosed more widely than it needs to be.
ST PATRICKS RC PRIMARY SCHOOL
SPECIAL EDUCATIONAL NEEDS POLICY

Guidelines for EHC Needs Assessment

Guidelines need to be applied when considering whether it carry out an Education, Health and Care needs assessment

Preparing EHC Plans

Local Authorities appoint a SEND Officer, whereby the family has a single point of contact.

A SEND Officer’s role is usually to support the family by liaising with the different professionals involved in any assessments of the child and to coordinate the process.

Families may, in addition, receive support from an independent supporter from the voluntary or private sector.

Independent workers are intended to help families through the process and would be someone who does not work for the Local Authority.

All EHC plans must be reviewed at least annually, but if a child’s special educational needs change, a review is held as soon as possible to ensure that the provision specified in the statement is still appropriate.

Individual Action Plan

An IAP should be used for individual pupils on:
• SEN support. Low/Medium/High
• For pupils with EHC plans, although targets may be included in the Person Centred Review paperwork as well.

An IAP is used to help children and parents aim high, having high aspirations.

It identifies strengths, areas needed to be developed and interventions/support needed to develop these areas.

It is the structured planning documentation of the differentiated steps and teaching requirements needed to help the student achieve identified targets.

An IAP should focus on three or four key individual targets and should include information about:
• the short term targets set
• the teaching strategies to be used
• the provision to be put in place and ongoing provision from previous IAP’s
• when the plan is to be reviewed
• success and/or exit criteria
• outcomes (to be recorded when IAP is reviewed)
• Targets for home if applicable

Monitoring and Reviewing IAPs

Ideally IAPs should be continually kept under constant review. However the success of all IAPs will be evaluated three times a year in each term.

Graduated Response

Interventions as described at SEN Support will encompass an array of strategies and embody the following principles:
• provision for a child with special educational needs should match the nature of their needs
• There should be regular recording of a child’s special educational needs, the action taken and the outcomes.
Class Special Needs Folder
In each classroom there is an SEN folder. This folder contains master copies of all relevant forms that a class teacher may need. They also contain information and advice on particular SEN areas of need, when new relevant information is received the SENCO will distribute it to teachers to add to the file. This file is to be used as a tool for teachers.

Class teachers will keep an IAP’s in this folder, as well as IAP planning/activities. It will also include reports from professionals involved with individual children.

Class teachers may also keep a Provision Map, containing the provision and intervention provided, alongside relevant information about all of their children in the cohort.

During the year, children’s needs change. They may cease to need support and so after a discussion with the SENCO, and the parents, they child may be removed from SEN support, after a period of monitoring and adequate progress made.

Other Records
Some teachers may keep records, which are part of their continuous assessment.

It is also important that results of formal testing, such as SATs, Assertive mentoring, and in-house assessments are carefully scrutinised to see if they highlight a child’s difficulties or provide information about how to proceed with support.

Records should always provide precise information about what a child can do, and about what steps are being taken to help him make progress. They should be passed on at the end of the academic year. Information is vital for the teacher to decide what is the next step forward and is of great importance when a child is referred to an outside agency, such as the Educational Psychology Service. Records/ files must be accessible both in terms of its location and its content to all support agencies involved with the child.

At St Patrick’s, we record assessment information on Target Tracker which is looked at by the Deputy, SENCO., and core co-ordinators. Every term, the SENCO/ Deputy Head meet with each class teacher to discuss the progress of all children, usually when IAPs are being reviewed. Intervention information and differentiation is discussed as well as vulnerable groups.

Medical Information
The school database is updated as and when information comes into school. Any major changes are passed on to the teacher straight away. Updated class medical information is passed on to the teacher and kept in the class SEN file.

However a medical diagnosis or a disability does not necessarily imply SEN. It is the child’s educational needs rather than a medical diagnosis that must be considered. However medical conditions may have a significant impact on a child’s experiences and the way they function in school and if not properly managed, could hinder their access to education. Therefore consultation and open discussion between the child’s parents, the school, the school nurse, or the child’s GP and any specialist services providing treatment for the child will be essential to ensure that the child makes maximum progress.
The Role of the SENCO

At St Patrick’s the SENCO is Ms D Taylor. Ms Taylor has an Education Honours Degree specialising in SEN. The role of the SENCO is:

- overseeing the day-to-day operation of the school’s SEN policy
- coordinating provision for children with special educational needs
- liaising with and advising teachers/TA’s
- overseeing the records of all children with special educational needs
- liaising with parents of children with special educational needs
- liaising with external agencies including the LA’s support and educational psychology services, health and social services, and voluntary bodies
- attend appropriate training to support the role, to disseminate to staff and to use the school development plan to implement new developments
- work closely with the nominated Special Needs Governor
- keep SEN information up to date on the website
- keep the SEN information report up to date

Ideas to assist with the meeting of SEND

We do need to be particularly aware of children with SEND. Children who learn at a slower rate than their peers, or who are developmentally delayed, who have barriers to learning, often need some support with classroom tasks, either from the class teacher, or a support assistant. Wherever possible, parents are directed to the LA’s local offer in order to access services and support, a link to which is on the school website.

Children who have specific learning difficulties, often display barriers to learning that become more apparent as the child grows older and fails to make as much progress as his/her peers. They will often require modification of some tasks and structured activities to work on specific skills. The class teacher will be given support to do this, if they require. The child may get additional support from school, or external support services.

Children with physical disabilities which may affect their learning, including speech problems, impaired vision and hearing, fine and gross motor or mobility problems are catered for as much as possible within the classroom environment. These children need particularly careful monitoring, to check they are making good progress, but they may not necessarily need extra support within school. The needs of individuals with mobility issues have to be addressed when planning educational visits, and all aspects of PE.

Children who are underachieving because of poor attitudes to learning, and/or behavioural difficulties are nurtured as much as possible in St Patrick’s. These children may have learning difficulties which may be the cause of their problems, and they will need a positive approach and careful monitoring, ideally before the problem becomes acute. School will often engage the services of Early Help in order to empower parents to deal effectively with poor behaviour within the home.

Children who are passive or withdrawn can easily go under the radar, but may not be making acceptable progress in academic and/or social skills. School endeavour to monitor these children and nurture them as required.

We also need to be particularly aware of new entrants, children who are absent for an extended period, children who are coping with family crises, and children who are the victims of abuse.
Differentiation by the class teacher

The main aim is always to give children differentiated access to all aspects of the curriculum, with priorities which are:

- **Real** - relating to the child’s needs
- **Relevant** - so that the child sees the purpose of the activity
- **Realistic** - so that the child can achieve success

This means – differentiation of work by:-

- Using a multi-level approach in the classroom with tasks matched to the individual needs of the children.
- Breaking difficult tasks down into more manageable parts, across the curriculum.
- More attention to the child’s point of entry.
- More variety between practical and written tasks.
- Making use of computers where useful.
- Building on a child’s strengths and interests, rather than dwelling on their weaknesses.
- Modifying of work and activities when necessary.
- Being aware of the differing concentration levels of children within the class.
- Praising and enhancing self-esteem.
- The setting of achievable targets.
- Effective use of additional staff, parents and other children.

Classroom Organisation

It is important to ensure that this facilitates learning for all children, but particularly for those with special educational needs.

This can be achieved by:-

1. Flexible grouping arrangements, to allow children variety and the stimulus of working with different children. Children with learning difficulties benefit from mixing with their peers and must be encouraged to do so.

2. Peer support and in some cases peer group tutoring can be valuable, although its implications need to be carefully considered and monitored.

3. Children with special needs should be encouraged to be active not passive learners, and given as much responsibility as possible for their own learning and classroom environment. It may mean that the class teacher needs to re-assess the physical class room organisation depending on size and makeup of the class.

Managing Children

Behavioural difficulties are usually complex. Poor work attitudes and under-achievement, poor concentration levels, mismatch of work to child, personal and home problems, lack of appropriate resources, movement around the room/school, unstructured days, constant change are some of the factors that need to be considered when dealing with incidents and poor behaviour choices.
**Code of Conduct**
Whole school expectations by all who work in our school are that we all should accept responsibility for our own actions and learn/choose to act in an acceptable way. Children have a right to learn and staff have a right to teach.

**Behaviour expectations**
All teachers have behaviour expectations. These are discussed and/or displayed in the classroom. Staff remind the whole class of their commitment to these regularly and involve them in decisions about class life.

**Managing the classroom/resources**
Make task demands specific and realistic, so that children know exactly what is expected of them. Staff ensure that work is challenging but not daunting.

Teachers decide what is the minimum amount expected from individuals. Some children may need the work broken into small chunks. Point of entry, differentiation in work and recording are key issues to be thought about when planning the lesson. Teachers ensure that the child understands the value of the work for them as a learner, to encourage intrinsic motivation.

All staff use praise and a positive approach as much as possible with all children. Ms Taylor is an advocate of the ‘Catch them being good’ strategy, and asks all staff to notice children who are behaving in the desired way. We give children attention for behaving well and making good choices, not just for behaving badly or making poor choices. Negative behaviour is often discussed privately, not in front of the class, to ensure the self esteem of the child is not adversely affected.

Staff understand and accept that some children find it particularly difficult to conform all the time and try to praise them for progress, however minimal. It is sometimes useful to praise behaviour which is nearly what you like, particularly in a child who finds it difficult to cope with classroom demands.

All staff praise positive behaviours, discuss inappropriate ones, using the ‘Language of Choice’ and avoiding comments which suggest that they expect poor behaviour or work from a child.

A few children may need some extrinsic motivation, and will benefit from receiving rewards for good work or behaviour. Rewards are tailored to the child and are used as motivators for good work and behaviour choices.

- Praise by staff/colleague
- Choosing an activity for himself or a group
- Showing work to another member of staff or parent
- Sticker or certificate (available in school)
- Positive learning award
- House points
- Raffle tickets

**Managing Challenging Behaviour**
It is very important that staff should enlist the help of the Head/Deputy/SENCO before a child’s needs become acute, in monitoring progress and reinforcing the positive approach. It may be appropriate to inform other members of staff including all support staff, when a particular effort is being made with a child. If the challenging/inappropriate behaviour persists then we will seek additional help and advice from the correct support services, including Early Help if appropriate.
Exclusion from school
Occasionally, a child finds the following of our behaviour expectations very hard and continually behaves in an unacceptable way putting others or themselves at risk, or disrupting others persistently. Prior to an exclusion we will have worked closely with the parent/carer, however a serious incident may still result in an exclusion from school for a set number of days. The school follows Oldham Local Authority guidelines here. The Chair of Governors is informed, as is the authority. Parents are given reasons for the exclusion and contact numbers to appeal the exclusion.

Roles and Responsibilities
The governing body has important statutory duties towards pupils with Special Needs as outlined below:-

Access and Integration
Our aim is for all children to have access to a broad and balanced curriculum, meeting their educational, emotional, social and spiritual needs. All will have access to all Curriculum subjects at the appropriate stage and programme of study. All children within St. Patricks are encouraged to be involved in the wider aspects of school life where individual skills and prowess can boost self-esteem and gain respect from peers.

Admission Arrangements
Following LA and our agreed admission and equal opportunities policies, a child will be offered a place within the family of St Patrick's if it is available.

It is important when registering a child, that the parent/carer fills in the information sheet/medical information honestly and informs the school of any previously identified special needs

Special Intervention- Nurture Groups
Children in some classes will benefit from Nurture Group if they display any of the following:-

• Withdrawn or quiet within the classroom
• Worries about a particular aspect
• Poor self esteem
• Poor attainment
• A need to develop relationships with peers and/or adults.
• Poor behaviour choices

The length of time spent in the Nurture Group is dependent on the individual needs of the child and their rate of progress. Some children may dip in and out of those groups, as needs arise.

Whole School Staffing
The class teacher accepts responsibility within their day to day management of their class for meeting the needs of all their children. We have Teaching Assistants within the school, who contribute greatly to the support of all children within the classes. They excel at helping develop skills in all areas. We must also not forget the invaluable role parents play within our school listening/talking to children, supporting groups and individual children under the direction of the teacher. Also the invaluable support most of our parents give to their own child.
Governor/Staff Training
We will continue to develop staff expertise by making full use of courses provided by the Local Authority, National conferences and other agencies or INSET drawing on staff specialisation. The SEND Governor will receive feedback about any training attended by the SENCO during their meetings. Training needs are identified by the individual, SMT, the SENCO and through the School Improvement Plan. The school’s Performance Management system will assist in highlighting training needs.

Partnership with parents
We actively encourage all of our parents to support their child through positive attitudes, giving user-friendly information and using effective communication. However all staff should be aware of the pressures a parent may be under because of the child’s needs.

To make communications effective professionals should:
• acknowledge and draw on parental knowledge and expertise in relation to their child
• focus on the children’s strengths as well as areas of additional need
• recognise the personal and emotional investment of parents and be aware of their feelings
• ensure that parents understand procedures, are aware of how to access support in preparing their contributions, and are given documents to be discussed well before meetings
• respect the validity of differing perspectives and seek constructive ways of reconciling different viewpoints
• respect the differing needs parents themselves may have, such as a disability, or communication and linguistic barriers
• Recognise the need for flexibility in the timing and structure of meetings.

All parents have access to St Patrick’s SEND information Report (found on the schools website).
The schools website also includes a link to Oldham’s local offer, a website of all services and events available in Oldham, and parents are reminded about this regularly on the schools Newsletter.

We aim to inform parents as soon as a child is “flagged” as a cause for concern, so that they are fully involved in the school based response for their child, understand the purpose of any intervention or programme of action, and be told about the parent partnership service.

Parents also have a responsibility to communicate effectively with professionals to support their children’s education. They should:
• communicate regularly with their child’s school and alert them to any concerns they have about their child’s learning or provision
• Fulfil their obligations under home-school agreements which set out expectations of both sides.

We will ensure that parents are fully involved in any discussions leading up to a school’s decision to request an Education, Health and Care plan.

POINT (Parents of Oldham In Touch) are a nationally recognised charity, run by parents, for parents. POINT specialises in signposting and offering support to parents of children with SEND. Links to POINT are included on the school website via the Local offer or can be obtained from the SENCO.
Partnership with Pupils
We will continue to work towards positive pupil involvement in decision-making related to their development. Most children have their own views on how they see their learning needs which may give insight into the issues experienced by both pupils and teacher. From an early age, children with SEN should be actively involved at an appropriate level in discussions about their IAP’s, and ways to make progress. Children should be encouraged to share in the recording process and in monitoring and evaluating their own performance so that every achievement is given a sense of worth, developing confidence and self-esteem.

Partnership with other schools
The school liaises with all local feeder schools; a meeting usually takes place between the year 6 teacher and a representative from the secondary school, if it is felt necessary the SENCO of St Patrick’s will also attend. During this meeting relevant information will be shared. If support with transition is needed this will begin as soon as the child and school are aware of the placement.

When a child transfers to another primary school records and information is forwarded. The SENCO is available if the placement needs further information.

Complaints Procedure
Parents/carers are asked to speak to the class teacher, SENCO or the Head teacher in the first instance. If the matter is not resolved then parents should be made aware of the schools complaint procedure and policy and follow the guidance within it. This policy can be found on the school website.

Evaluation of Success
Evaluation of the success of this policy requires evidence of:

• Continued work in partnership with parents at every level of graduated response.
• Further development of IAP’s.
• Continuing early identification of SEN.
• Continuing to develop relationship between child and adult who works with them on a regular basis.
• Further developing links with other schools and agencies and within the community (SEN hub, CFOS, SENCO’s).
• Positive handling training for all staff.

Short term targets for Future Development
1. To implement the LA’s new EHC procedures and paperwork into meetings 2019/2020

Medium term targets for Future Development
1. To identify new common area for development amongst staff - Positive handling training

Long term Targets for Future Development
1. To embed the person centred review approach within the Class Teacher role
2. To further develop provision maps of costings for EHCs
3. To continue to develop a HUB of SALT resources for use in the interim from referral to SALT to assessment
