**Mission 4 – Out and about Maths**

Whilst out on separate walks Mrs Honey-Wyles spotted 3 squirrels, 6 ducks, 3 slugs and 1 fox, whilst Mrs Sainsbury and Chewie saw 5 squirrels, 3 ducks, 4 slugs and 2 foxes. The next day, Mrs Webster saw 4 squirrels, 2 ducks, 2 slugs and no foxes. Can you create a bar chart to show how many different animals were spotted? The axis has been started for you, or you can draw your own. **Challenge: when you next go on a walk, start a tally of all the animals you spot and then make your own bar chart.**
