We hope you enjoy completing these activities, but there is no expectation that you have to complete them all, unless of course you want to. Do what you can, when you can!

**Well-being Activity**
This week your well-being activity is to draw a separate picture of all the people you live with. Then next to or underneath each picture, you need to write what you think are the three best things about that person e.g. that they are kind, helpful and really good at hugs!

My mum is the kindest mum in the world. She makes lovely cakes and she is really patient.

**Creative Activity**
Have a go at making one of these crafty jellyfish! You will need a paper plate, bowl or paper cake case. You can then decorate it with pens, paint, material or tissue paper. Draw or stick on the eyes. Attach strips of wool, paper, material, ribbon, plastic or whatever you can find around the house. Make a hole in the top and hang it up with a piece of string.

**Act of Kindness**
You have done lots of kind things for your family, friends and neighbours. How about being kind to the birds this week by making a bird feeder? The link below shows you how to make them.

https://www.bbc.co.uk/cbeebies/makes/bird-feeder

**Geography**
This week we want you to teach us! We know lots of you have been to different sea-side locations all across the world. We would love to know about a beach in Poland, the Philippines, Dubai, India or any other country you have been to. If you haven’t been to one you could look at the attached pictures of Moalboal Beach in the Philippines. First of all find where it is on a map. Then look at photographs, draw pictures or write a description. What human features did you see? What physical features did you see? How is it the same as Weston-Super-Mare? Or how is it different?

**History**
This week we would like you to find out about famous places to visit in Bristol. Here are some ideas. The SS Great Britain, the Bristol Museum, the Clifton Suspension bridge or Blaise Castle Estate. Can you find out when they were built, who built them and why?
