

The school hall is used for indoor P.E. and either the playground or the field are used for outdoor P.E. We regularly invite specialist sports men or women into school to enhance our P.E. curriculum.

P.E. Kit (Indoors)      Boys & Girls  
Navy Shorts or wrap round skirt  
White T-shirt

P.E. Kit (Outdoor)      Boys & Girls  
Plain Navy Tracksuit  
White T-shirt  
Boots or Trainers

## Information & Communication Technology

Our aims in I.C.T. are to familiarise children with all aspects of modern technology and to promote their confidence, increasing their capability to use I.C.T. in later life. We teach the I.C.T. skills as a specific subject and also integrate I.C.T. across the curriculum. We teach the children how to use word processing facilities, how to store and retrieve information, how to use databases and spreadsheets and how to use logo and programmable toys e.g. roamers for control.

We have one machine in each room linked to a central server. This enables children to access a common platform of software used throughout Barnsley. The children can also access the Internet and use the e-mail facility.

We also have an I.C.T Suite which houses 20 PC's. We have 3 Digital Cameras and 2 Projectors. Each classroom and the hall have an interactive whiteboard which children are encouraged to use under supervision. There is a wide variety of software including pre-reading logic programs, reading skills, mathematical concept building programs, investigations, databases and facilities to produce computer generated art work. Children also receive access to Purple Mash software via the internet which can easily be accessed from home.
