

# Information for parents

## What is phonics?

There has been a huge shift in the past few years in how we teach reading in UK schools. This is having a big impact and helping many children learn to read and spell. Phonics is recommended as the first strategy that children should be taught in helping them learn to read. It runs alongside other teaching methods such as Guided Reading and Shared Reading to help children develop all the other vital reading skills and hopefully give them a real love of reading.

## So, what exactly is phonics?

Words are made up from small units of sound called phonemes. Phonics teaches children to be able to listen carefully and identify the phonemes that make up each word. This helps children to learn to read words and to spell words

In phonics lessons children are taught three main things:

### GPCs

They are taught GPCs. This stands for grapheme phoneme correspondences. This simply means that they are taught all the phonemes in the English language and ways of writing them down. These sounds are taught in a particular order. The first sounds to be taught are s, a, t, p.

### Blending

Children are taught to be able to blend. This is when children say the sounds that make up a word and are able to merge the sounds together until they can hear what the word is. This skill is vital in learning to read.

### Segmenting

Children are also taught to segment. This is the opposite of blending. Children are able to say a word and then break it up into the phonemes that make it up. This skill is vital in being able to spell words.

# Phonics

## Glossary of terms

**Phoneme** - The smallest unit of sound. There are approximately 44 phonemes in English (it depends on different accents). Phonemes can be put together to make words.

**Grapheme** - A way of writing down a phoneme. Graphemes can be made up from 1 letter e.g. p, 2 letters e.g. sh, 3 letters e.g. tch or 4 letters e.g. ough.

**GPC** - This is short for Grapheme Phoneme Correspondence. Knowing a GPC means being able to match a phoneme to a grapheme and vice versa.

**Digraph** - A grapheme containing two letters that makes just one sound (phoneme).

**Trigraph** - A grapheme containing three letters that makes just one sound (phoneme).

**Oral Blending** - This involves hearing phonemes and being able to merge them together to make a word. Children need to develop this skill before they will be able to blend written words.

**Blending** - This involves looking at a written word, looking at each grapheme and using knowledge of GPCs to work out which phoneme each grapheme represents and then merging these phonemes together to make a word. This is the basis of reading.

**Oral Segmenting** - This is the act hearing a whole word and then splitting it up into the phonemes that make it. Children need to develop this skill before they will be able to segment words to spell them.

**Segmenting** - This involves hearing a word, splitting it up into the phonemes that make it, using knowledge of GPCs to work out which graphemes represent those phonemes and then writing those graphemes down in the right order. This is the basis of spelling.
