

Metals:
Steel, Copper & Gold.

By Alex Limbert

STEEL

- Steel is made for a lot of things.

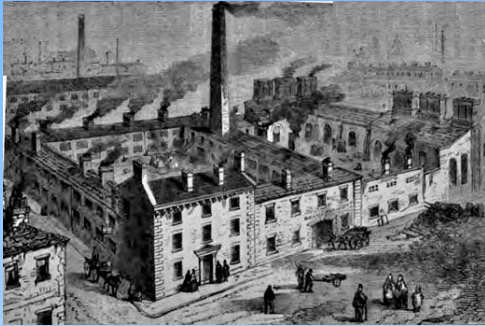

Like pipes, shields, nuts and bolts

Making Steel...

- Steel is made from Iron, carbon and other elements. This makes it super strong.
- Steel is known as an alloy because it is made up of lots of elements.

Local steel...

- Sheffield is famous for making steel.

Olden days

GOLD

- Gold is very rare.
- Absolutely pure gold is so soft you can mould it with your hands.
- Not many chemicals can attack Gold which is why it stays so shiny when it has been buried for so long in the ground.

THINGS MADE OUT OF GOLD

← This is Gold ore.

COPPER

- Money is made out of copper.
- To make bronze you need copper and tin.
- Pure copper is a red-orange colour but when mixed with air it changes to a brown colour.
- Copper has been used for over 10,000 years and the only other material used before this was gold and meteoric iron.

THINGS MADE FROM COPPER
