

# DIFFERENT TYPES OF VETS.

- Vets look after lots of different animals such as
- Zoo animals
- Farm animals
- Peoples pets dogs, cats, fish ect.
- Water animals
- Wild animals

This looks a bit like stan.

# The job of a vet.

- Vets do lots of different things! When people think about vets, most think about vets working with pets, including horses and farmed animals, but some work with zoo animals or wildlife. Vets help to prevent disease and they treat sick and injured animals. Other vets work with animals in research some work with the army and some for the Government.

# MY OPINION

- I would like to be a vet because I absolutely love animals.
- But on the other hand I would not like to hurt an animal jure in suregery.
