

Top 10 Ways to Improve Reading Skills

Nothing is more important to academic achievement than being a good reader. Parents know their children best and can provide the one-on-one time and attention that will lead them to success in reading. Here is a list of 10 ways to help your children become more effective readers.

1) Set aside a regular time to read to your children every day.

Studies show that regularly reading out loud to children will produce significant gains in reading comprehension, vocabulary and the decoding of words. This will increase their desire to read independently.

2) Surround your children with reading material.

Children with a large array of reading materials in their homes score higher on standardized tests. Tempt your kids to read by having a large supply of appealing books and magazines at their reading level. Put the reading materials in cars, bathrooms, bedrooms, family rooms, and even by the TV.

3) Have a family reading time.

Establish a time when everyone in the family reads together silently. Seeing you read will inspire your children to read. Just 15 minutes of daily practice is sufficient to increase their reading fluency.

4) Encourage a wide variety of reading activities.

Make reading an integral part of your children's lives. Have them read menus, roadside signs, game directions, weather reports, movie time listings, and other practical everyday information. Also, make sure they always have something to read in their spare time when they could be waiting for appointments or riding in a car.

5) Develop the library habit.

Entice your children to read more by taking them to the library every few weeks to get new reading materials. The library also offers reading programs for children of all ages that may appeal to your children and further increase their interest in reading.

6) Be knowledgeable about your children's progress.

Find out what reading skills they are expected to have at each level. The school's reading target sheets will give you this information. Track their progress in acquiring basic reading skills on reports and during open evening discussions

7) Look for reading problems.

Listen carefully and find out if your children can sound out words, know sight words, use context to identify unknown words, and clearly understand what they read. Are they squinting when they read or holding the book at arm's length? They may need an eye test.

8) Get help promptly for reading problems.

Reading problems do not magically disappear with time. The earlier children receive help, the more likely they will become good readers. Work together with the school to ensure your child receives any necessary help. This may include extra practice in and out of school and/or medical treatment.

9) Use a variety of aids to help your children.

To help your children improve their reading, use textbooks, computer programs, books-on-tape, and other materials available in shops and online. Games are especially good choices because they let children have fun as they work on their reading skills.

10) Show enthusiasm for your children's reading.

Your reaction has a great influence on how hard they will try to become good readers. Be sure to give them praise for their efforts. Highlight positive achievements in their Reading Record Book and celebrate if they come home with a reading sticker or award certificate.
