

# Barnes Junior School

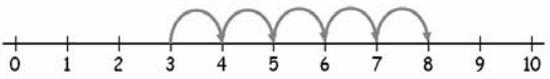

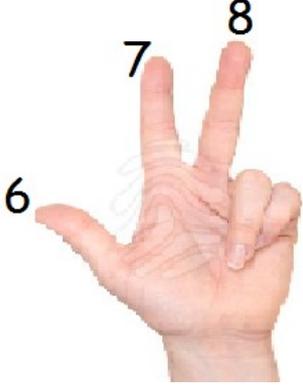

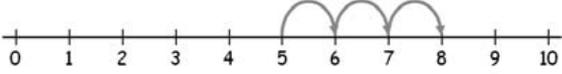

Proud to learn,  
Proud to achieve

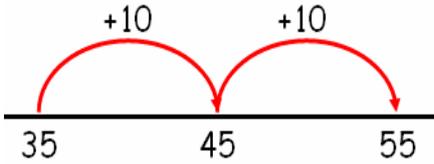

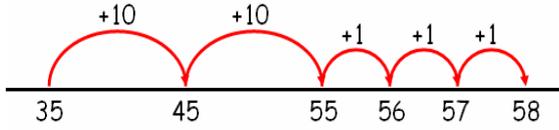

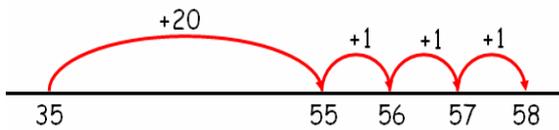

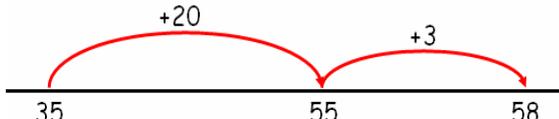

## **Barnes Junior School Calculation Policy An Overview for Parents**

# Addition

Addition Stage 1: Count all	Example of Written Method
<p><b>Mental method:</b> Count out the groups, then find the total by counting all the counters.</p>	<p><math>3+5=8</math></p> 

Stage 2: Count on from the first number	Example of Written Method
<p><b>Mental method:</b> Verbally 'say' the first number, and then use fingers to count on.</p> <p>Demonstrate on a number line.</p>	<p><math>3+5=8</math></p> <p>'3'</p>  

<b>Stage 3: Count on from the larger number</b>	<b>Example of written method</b>
<p><b>Mental method:</b> Children decide which number is the largest, verbally 'say' this number, and use fingers to count on.</p> <p>Demonstrate on a number line.</p> <p><b>Written method:</b> Write the number sentence.</p>	<p><math>5+3=8</math></p> <p>'5'</p>   <p><b>Include addition of 1 and 2 digit numbers to 20:</b> <math>9+9=18</math></p> <p><b>Add three 1-digit numbers:</b> <math>5+3+4=12</math></p>

<b>Stage 4: Counting on using a number line</b>	<b>Example of written method</b>
<p><b>Mental method:</b> Partitioning- adding the tens and ones separately.</p> <p><b>Written method:</b> Steps in addition can be recorded on a number line.</p> <p>The steps often bridge through a multiple of 10.</p> <p>Number line helps record the steps on the way to calculating the total.</p> <p>Use straws to support column addition without carrying.</p> <p>Progress to use Dienes equipment to support column addition without carrying</p>	<p><math>35+20=55</math></p>  <p><math>35+23=58</math></p>    <p><b>Column addition (without carrying):</b></p> $\begin{array}{r} 12 \\ + 25 \\ \hline 37 \end{array}$

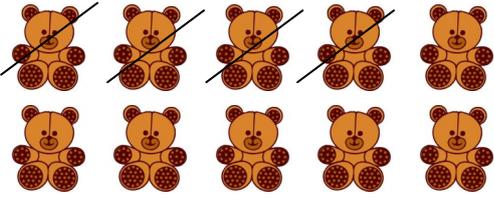

Stage 5: Partitioning leading to column addition	Example of written method
<p><b>Mental Method:</b>  Step 1: Add the tens then the ones to form partial sums  Step 2: Add the partial sums</p> <p><b>Written method:</b>  Record steps in addition using partitioning.</p> <p>Progress to column addition – use Dienes equipment initially.</p>	$18 + 15 = 33$  $10 + 10 = 20$ $8 + 5 = 13$ $20 + 13 = 33$  $35 + 23 = 58$  $30 + 20 = 50$ $5 + 3 = 8$ $50 + 8 = 58$  <b>Column addition up to 3 digits:</b>  $\begin{array}{r} 24 \\ + 15 \\ \hline 39 \end{array}$  $\begin{array}{r} 126 \\ + 33 \\ \hline 159 \end{array}$  $\begin{array}{r} 237 \\ + 516 \\ \hline 293 \end{array}$

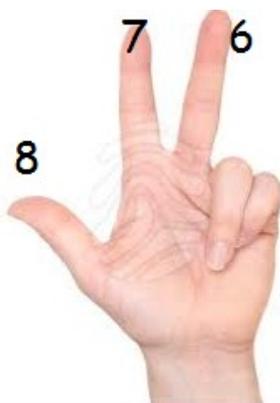

Stage 6: Column addition	Example of written method
<p><b>Mental method:</b>  Step 1: Add the units  Step 2: Add the tens  Step 3: Add the hundreds  Step 4: Add the thousands</p> <p><b>Written method:</b>  Extend column addition up to 4 digits.</p>	<p><b>Column addition with up to 4 digits.</b></p> $\begin{array}{r} 2435 \\ + 316519 \\ \hline 6094 \end{array}$

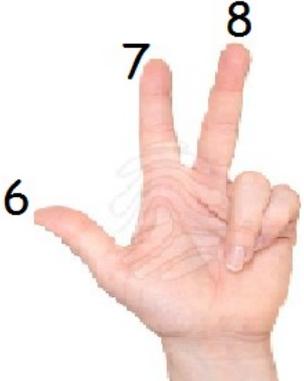

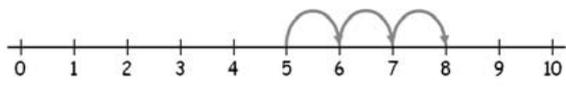

<b>Stage 7: Extend column addition</b>	<b>Example of written method</b>
<p><b>Mental method:</b> Children place numbers in columns, drawing on their understanding of place value.</p> <p><b>Written method:</b> Column addition remains efficient when used with larger whole numbers and decimals. Once learned, the method is quick and reliable.</p> <p>Carry digits are recorded on the line, using the words: 'carry ten' or 'carry one hundred', not 'carry one'.</p> <p>Continue to add numbers with up to 5 digits.</p>	<p><b>Column addition with 5 digits:</b></p> $\begin{array}{r} 15362 \\ + 234156 \\ \hline 38818 \end{array}$ <p><b>Column addition with decimals:</b></p> $\begin{array}{r} 56.3 \\ + 2.6 \\ \hline 58.9 \end{array}$

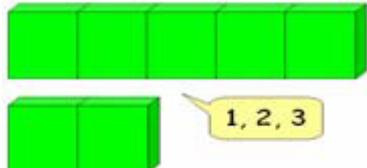

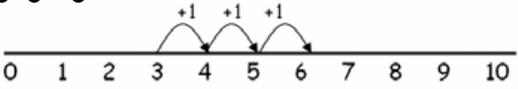

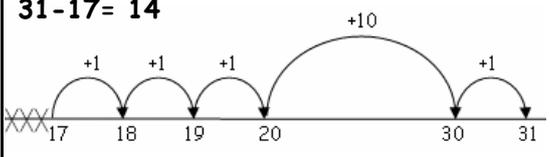

<b>Stage 8: Continue to practise and apply skills</b>	<b>Example of written method</b>
<p><b>Mental method:</b> Children should be able to perform mental calculations, including with mixed operations and large numbers.</p> <p><b>Written method:</b> Column addition involving larger numbers and decimals.</p>	<p><b>Use column addition efficient in problem solving contexts.</b></p> <p><b>Continue to practise column addition and extend to large numbers when appropriate:</b></p> $\begin{array}{r} 15362 \\ + 234156 \\ \hline 38818 \end{array}$ <p><b>Column addition with decimals:</b></p> $\begin{array}{r} 56.3 \\ + 2.6 \\ \hline 58.9 \end{array}$

# Subtraction

Subtraction Stage 1: Counting back (take away reduction)	Example of Written Method
<p><b>Mental method:</b> Count how objects need to be 'taken away', physically moving them or crossing out pictures. Count how many are left.</p>	 <p><math>13 - 5 = 8</math></p>  <p><math>10 - 4 = 6</math></p>

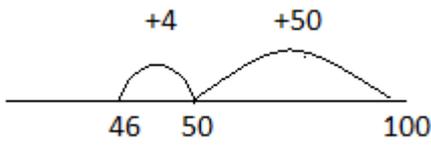

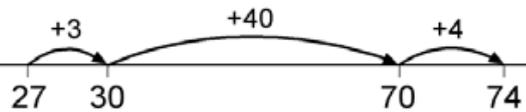

Subtraction Stage 2: Counting back using fingers	Example of Written Method
<p><b>Mental method:</b> Verbally 'say' the largest number, and then use fingers to count back.</p> <p>Demonstrate on a number line.</p>	<p><math>9 - 3 = 6</math></p>  <p><math>10 - 4 = 6</math></p> 

Stage 3: Count on from the smaller number	Example of written method
<p><b>Mental method:</b> Children decide which number is the largest, verbally 'say' this number, and use fingers to count on.</p> <p>Demonstrate on a number line.</p> <p><b>Written method:</b> Write the number sentence.</p>	<p><math>8-5=3</math></p> <p>'5'</p>  

Stage 4: Counting on to find the difference	Example of written method
<p><b>Mental method:</b> Step 1: Introduce using practical resources, verbally counting on 'How many more?'</p> <p>Step 2: Find the difference using a number line. Verbally say the smallest number and count on to the largest number.</p> <p>Step 3: Count up from the smallest number to the largest number. e.g. Start at 27 and count on to 31</p> <p><b>Written method:</b> Steps in subtraction can be recorded as 'jumps' on a number line. The steps often bridge through a multiple of 10.</p>	<p><math>5-2=3</math></p>  <p><math>6-3=3</math></p>  <p><math>31-17=14</math></p> 

Stage 5: Introducing column subtraction	Example of written method								
<p><b>Mental method:</b> Reinforce place value by partitioning 2-digit numbers.</p> <p>Subtraction on a hundred square, again reinforcing place value.</p> <p>Introduce column subtraction, without borrowing.</p> <p><b>Written method:</b> Record subtraction calculations initially in terms of partitioning, then introduce column subtraction.</p>	<p><b>Partitioning a 2-digit number:</b>  <math>10 + 5 = 15</math>            'One ten and five units make 15'</p> <p><b>Subtraction on a hundred square:</b>  <math>35 - 14 = 21</math></p>  <p><b>Column subtraction (without borrowing):</b></p> <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: right;"><b>TU - U</b></td> <td style="text-align: right;"><b>TU - U</b></td> </tr> <tr> <td style="text-align: right;"><b>18</b></td> <td style="text-align: right;"><b>48</b></td> </tr> <tr> <td style="text-align: right;"><b>- 6</b></td> <td style="text-align: right;"><b>- 22</b></td> </tr> <tr> <td style="text-align: right;"><hr/><b>12</b></td> <td style="text-align: right;"><hr/><b>26</b></td> </tr> </table>	<b>TU - U</b>	<b>TU - U</b>	<b>18</b>	<b>48</b>	<b>- 6</b>	<b>- 22</b>	<hr/> <b>12</b>	<hr/> <b>26</b>
<b>TU - U</b>	<b>TU - U</b>								
<b>18</b>	<b>48</b>								
<b>- 6</b>	<b>- 22</b>								
<hr/> <b>12</b>	<hr/> <b>26</b>								

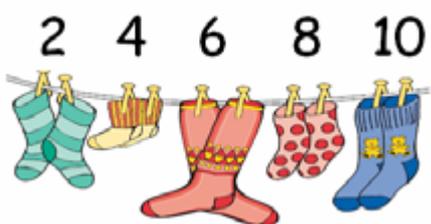

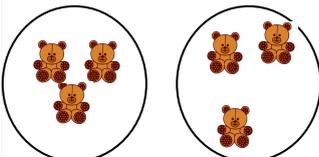

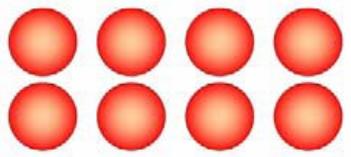

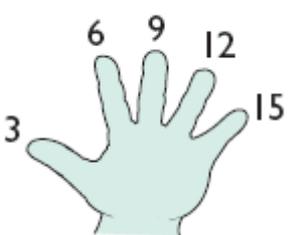

Stage 6: Recap partitioning and extend column subtraction	Example of written method																		
<p><b>Mental method:</b> Subtract the tens then the units.</p> <p><b>Written method:</b> Record steps in subtraction using partitioning. Move to column subtraction with up to 3 digits, including borrowing.</p>	<p><b>Subtraction by partitioning to reinforce place value:</b></p> <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: right;"><math>58 - 23</math></td> <td style="text-align: right;"><math>146 - 27</math></td> </tr> <tr> <td style="text-align: right;"><math>58 - 20</math></td> <td style="text-align: right;"><math>146 - 20</math></td> </tr> <tr> <td style="text-align: right;"><math>38 - 3</math></td> <td style="text-align: right;"><math>126 - 7</math></td> </tr> <tr> <td style="text-align: right;"><math>35</math></td> <td style="text-align: right;"><math>119</math></td> </tr> </table> <p><b>Introduce column subtraction with up to 3- digits. Include some borrowing:</b></p> <table style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: right;"><b>TU - U</b></td> <td style="text-align: right;"><b>HTU - TU</b></td> </tr> <tr> <td style="text-align: right;">4 1</td> <td style="text-align: right;">3 1</td> </tr> <tr> <td style="text-align: right;"><del>5</del>6</td> <td style="text-align: right;"><del>14</del>6</td> </tr> <tr> <td style="text-align: right;"><b>- 29</b></td> <td style="text-align: right;"><b>- 37</b></td> </tr> <tr> <td style="text-align: right;"><hr/><b>27</b></td> <td style="text-align: right;"><hr/><b>109</b></td> </tr> </table>	$58 - 23$	$146 - 27$	$58 - 20$	$146 - 20$	$38 - 3$	$126 - 7$	$35$	$119$	<b>TU - U</b>	<b>HTU - TU</b>	4 1	3 1	<del>5</del> 6	<del>14</del> 6	<b>- 29</b>	<b>- 37</b>	<hr/> <b>27</b>	<hr/> <b>109</b>
$58 - 23$	$146 - 27$																		
$58 - 20$	$146 - 20$																		
$38 - 3$	$126 - 7$																		
$35$	$119$																		
<b>TU - U</b>	<b>HTU - TU</b>																		
4 1	3 1																		
<del>5</del> 6	<del>14</del> 6																		
<b>- 29</b>	<b>- 37</b>																		
<hr/> <b>27</b>	<hr/> <b>109</b>																		

Stage 7: Counting on find a missing number	Example of written method
<p><b>Mental method:</b> Count up from the smallest number to the largest number. Reduce the number of jumps by combining steps.</p> <p><b>Written method:</b> Show jumps on an empty number line. Write the number sentence.</p>	<p><math>100 - 46 = 54</math></p>  <p><math>74 - 27 = 47</math></p> 

Stage 8: Column subtraction	Example of written method
<p><b>Mental method:</b> Children place numbers in columns, drawing on their understanding of place value.</p> <p><b>Written method:</b> Column subtraction with up to 4 digits, including exchanging (a ten is exchanged for 10 units).</p>	<p>Year 4 (Subtraction with up to 4-digits)</p> <p>ThHTU - HTU</p> $\begin{array}{r} 3 \quad 1 \\ 57\cancel{4}6 \\ - 637 \\ \hline 5109 \end{array}$

Stage 9: Extend column subtraction	Example of written method
<p><b>Mental method:</b> Children place numbers in columns, drawing on their understanding of place value.</p> <p><b>Written method:</b> Compact subtraction remains efficient when used with larger whole numbers and decimals. Once learned, the method is quick and reliable.</p>	<p>Year 5 (Subtraction with up to 5 digits, including subtraction with decimals)</p> <p>HThThHTU - ThHTU</p> $\begin{array}{r} 6 \quad 1 \quad 4 \quad 1 \\ \cancel{7}2654 \\ - 5627 \\ \hline 67027 \end{array}$ $\begin{array}{r} 4 \quad 1 \\ \cancel{5}.3 \\ - 2.7 \\ \hline 2.6 \end{array}$

# Multiplication

<p><b>Multiplication Stage 1: Counting in equal steps of 2</b></p>	<p><b>Example of Written Method</b></p>
<p><b>Mental method:</b> Children will begin to count in steps of 2s.</p>	
<p><b>Multiplication Stage 2: Repeated addition</b></p>	<p><b>Example of Written Method</b></p>
<p><b>Mental Method:</b> Children will experience equal groups of objects and will begin counting in 2s, 3s, 4s, 5s and 10s.</p> <p><b>Written method:</b> Children write the groups of repeated addition, as shown in the diagram.</p> <p><b>Recognise and write the 'x' sign in mathematical statements. Calculate the answer with the teacher using concrete objects.</b></p>	 <p><math>2 + 2 + 2 + 2 + 2 = 10</math>  <math>2 \times 5 = 10</math>          2 multiplied by 5          5 pairs</p>  <p><math>3 + 3 = 6</math>  <math>3 \times 2 = 6</math>          3 multiplied by 2</p>
<p><b>Multiplication Stage 3: Arrays</b></p>	<p><b>Example of written method</b></p>
<p><b>Mental Method:</b> Following on from repeated addition, children use multiplication strategy of arrays.</p> <p>Count in equal steps, then relate to multiplication fact.</p> <p>Children may also count equal steps using their fingers.</p> <p><b>Written method:</b> Draw the array, then write multiplication sentence.</p> <p><b>Use the X and = signs to write mathematical statements. Ensure pupils recognise that multiplication can be done in any order.</b></p> <p><b>Times tables: 2, 5 and 10 up to x 12.</b></p>	 <p><math>4 \times 2 = 8</math></p> <p><math>2 \times 4 = 8</math></p> 

<b>Stage 4: Partitioning</b> <b>Multiplication of TU x U</b> <b>Example of Written Method</b>	<b>Example of written method</b>
<p><b>Mental method:</b>  Step 1: TU number is partitioned and multiplied by the U.  Step 2: Totals are added together in column addition.</p> <p><b>Written method:</b>  Record steps in multiplication as shown in the diagram.</p> <p><b>Times tables: 2, 3, 4, 5, 8,10 up to x 12.</b></p>	<p><b>37 x 4 =</b></p> <p><b>30 x 4 = 120</b>  <b>7 x 4 = 28</b>  <b>120 + 28 = 148</b></p>

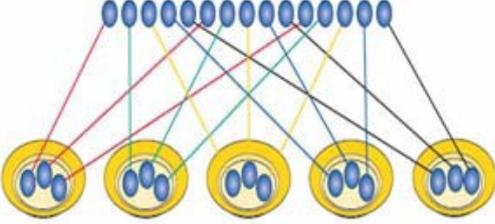

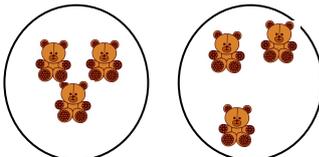

<b>Stage 5: Short Multiplication</b>	<b>Example of written method</b>
<p><b>Mental method:</b>  Children place numbers in columns, drawing on their understanding of place value.</p> <p><b>Written method:</b>  Standard written method  Multiplication of TU x U.  Extend to HTU x U.</p> <p><b>Times tables: Derive and recall all multiplication facts up to 12 x12.</b></p>	<p><b>38 x 7</b></p> $\begin{array}{r} 38 \\ \times 7 \\ \hline 266 \end{array}$ <p>Extending to HTU x U.</p>

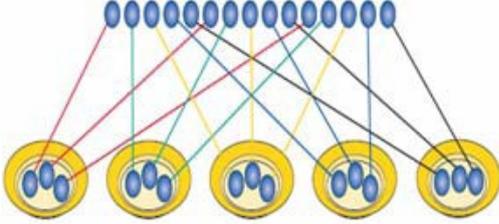

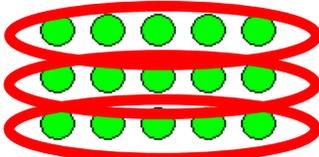

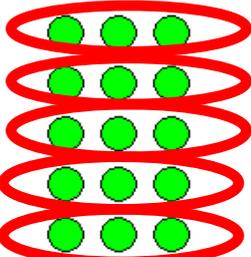

Stage 6: Long Multiplication	Example of written method
<p><b>Mental method:</b> Children place numbers in columns. Reinforce understanding of place value when multiplying by the ten.</p> <p><b>Written method:</b> Record steps in multiplication as shown in the diagram. Multiplication of TU x TU Extend to HTU x TU</p> <p><b>Times tables: Derive and recall all multiplication facts up to 12 x 12.</b></p>	<p><b>56 x 27</b> 56 x 27 is approximately 60 x 30 = 1800.</p> $\begin{array}{r} 56 \\ X \quad 27 \\ \hline 392 \\ 1120 \\ \hline 1512 \end{array}$ <p><b>286 x 29</b> 286 x 29 is approximately 300 x 30 = 9000</p> $\begin{array}{r} 286 \\ X \quad 29 \\ \hline 2574 \\ 51720 \\ \hline 8294 \end{array}$

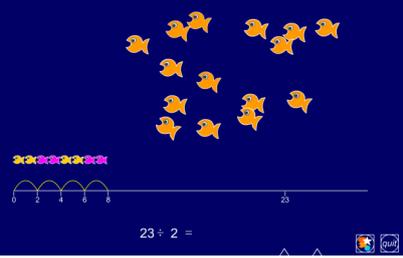

Stage 7: Extension and consolidation of long multiplication. Using and applying	Example of written method
<p><b>Mental method:</b> Children place numbers in columns. Reinforce understanding of place value when multiplying by the ten.</p> <p><b>Written method:</b> Record steps in multiplication as shown in the diagram. Extend to ThHTU x TU</p> <p><b>Times tables: Derive and recall all multiplication facts up to 12 x 12.</b></p>	<p><b>286 x 29</b> 286 x 29 is approximately 300 x 30 = 9000</p> $\begin{array}{r} 286 \\ X \quad 29 \\ \hline 2574 \\ 51720 \\ \hline 8294 \end{array}$ <p>Extend to ThHTU</p>

# Division

Division Stage 1: Sharing practically	Example of Written Method
<p><b>Mental method:</b> Children will begin to talk about sharing, using practical resources.</p>	<p>Cut the pizza in half. How many pieces are there?</p> 

Division Stage 2: Sharing into groups	Example of Written Method
<p><b>Mental method:</b> Children will begin to practically share objects into groups.</p> <p>Use words: '5 groups of 3' or '2 groups of 3' etc.</p> <p>Children will begin to recognise and write the <math>\div</math> symbol in mathematical statements, calculating the answer to word problems using practical objects and recording number sentence (with teacher support).</p>	 <p>15 marbles are shared out equally among 5 children. <math>15 \div 5 = 3</math></p> <p>6 teddies shared into 2 hoops. <math>6 \div 2 = 3</math></p> 

Division Stage 3: Using arrays	Example of Written Method
<p><b>Mental method:</b> Following on from practical sharing, children should now be familiar with the <math>\div</math> sign and will write mathematical statements, calculating the answer to word problems using practical objects and recording number sentences.</p> <p>Again use words: '5 groups of 3' or '2 groups of 3' etc.</p> <p><b>Written method:</b> Draw the array, then write division sentence. Use the <math>\div</math> and = signs to write mathematical statements. Ensure pupils use inverse relations (e.g. <math>4 \times 5 = 20</math> and <math>20 \div 5 = 4</math>).</p> <p><b>Times Tables: Recall of division facts for 2, 5 and 10 times tables</b></p>	<p>15 marbles are shared out equally among 5 children. <math>15 \div 5 = 3</math></p>  <p><b>Use of arrays: Sharing</b> The gardener planted 15 seeds in 3 equal rows. <b>How many seeds in each row?</b> <math>15 \div 3 = 5</math></p>  <p><b>Use of arrays: Grouping</b> The gardener planted 15 seeds with 3 seeds in each row. <b>How many rows of seeds are there?</b> <math>15 \div 3 = 5</math></p> 

Division Stage 4: Grouping on a number line	Example of Written Method
<p><b>Mental Method:</b> Recall multiplication and division facts for the 2, 3, 4, 5, 8 and 10 multiplication tables.</p> <p><b>Written method:</b> Develop reliable written methods for division, starting with calculations of two-digit numbers by one-digit numbers and progressing to the efficient written method of short division.</p> <p><b>Times Tables: Recall of division facts for 2, 3, 4, 5, 8 and 10 times tables.</b></p>	 <p><math>14 \div 2 = 7</math></p> 

Division Stage 5: Short division	Example of Written Method
<p><b>Mental Method:</b> Continue to practise recalling multiplication facts and related division facts to aid fluency.</p> <p><b>Written method:</b> Short division <math>TU \div U</math> as shown in the example. Extend to <math>HTU \div U</math>.</p> <p><b>Times Tables: Recall of division facts all tables up to 12 x 12.</b></p>	<p><b>Extend to <math>HTU \div U</math></b></p>

Division Stage 6: Long division	Example of Written Method
<p><b>Mental Method:</b> Continue to practise recalling multiplication facts and related division facts to aid fluency.</p> <p><b>Written method:</b> Continue to practise short division as shown in example. TU ÷ U, HTU ÷ U, ThHTU ÷ U.</p> <p><b>Times Tables: Recall of division facts all tables up to 12 x 12.</b></p>	<p><b>Extend to ThHTU ÷ U. Interpret remainders appropriately for the context.</b></p>

Division Stage 7: Long division Using and applying	Example of Written Method
<p><b>Mental Method:</b> Continue to practise recalling multiplication facts and related division facts to aid fluency.</p> <p><b>Written method:</b> Long division HTU ÷ TU. Extend to ThHTU ÷ TU as shown in the example.</p> <p><b>Times Tables: Recall of division facts all tables up to 12 x 12.</b></p>	<div style="text-align: right;"> <math display="block">  \begin{array}{r}  023 \text{ r } 24 \\  37 \overline{) 875} \\  \underline{-74} \phantom{0} \\  135 \\  \underline{-111} \\  24  \end{array}  </math> </div> <div style="text-align: right;"> <math display="block">  \begin{array}{r}  37 \\  74 \\  111 \\  148  \end{array}  </math> </div> <div style="text-align: right;"> <math display="block">  \begin{array}{r}  0573 \text{ r } 7 \\  17 \overline{) 9748} \\  \underline{-85} \phantom{0} \\  124 \\  \underline{-119} \\  58 \\  \underline{-51} \\  7  \end{array}  </math> </div> <div style="text-align: right;"> <math display="block">  \begin{array}{r}  17 \\  34 \\  51 \\  68 \\  85 \\  102 \\  119  \end{array}  </math> </div> <p><b>Interpret remainders appropriately for the context.</b></p>
