

Year 5 Maths Programme of Study

			I can write percentages as a fraction. I can recognise the % symbol and understand what it means.		I can distinguish between regular and irregular polygons. I can state and use properties of a rectangle to deduce related facts. I can draw shapes using given dimensions and angles.	
		I know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers.	I can solve number problems up to 3 decimal places.			
I can recognise years written in Roman numerals.	I can solve multi-step subtraction problems in contexts, deciding which operation and methods to use and why.	I can X and ÷ whole numbers and those involving decimals by 10, 100 and 1 000.	I can read, write, order and compare numbers with up to 3 decimal places.	I can solve problems involving addition and subtraction of units of measures using decimal notation.	I can compare different angles.	
I can read Roman numerals to 1 000 (M).	I can solve multi-step addition problems in contexts, deciding which operations and methods to use and why.	I can divide numbers up to 4 digits by a one or 2 digit number.	I can round decimals with 2 decimal places to the nearest whole number and to 1 decimal place.	I can solve problems involving converting between units of time.	I can identify reflex angles.	
I can solve number problems and practical problems.	I can solve two-step subtraction problems, deciding which operation and methods to use and why.	I can multiply numbers up to 4 digits by a one or 2 digit number.	I can recognise and use 1000ths and relate them to 10ths, 100ths and the decimal equivalents.	I can recognise and estimate volume and capacity.	I can identify angles at a point and one whole turn.	I can present information using ICT.
I can round any number up to 1 000 000 to the nearest 10, 100, 1 000, 10 000 and 100 000.	I can use rounding to check answers to calculations.	I can estimate whether a number up to 100 is prime and recall prime numbers up to 19.	I can multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.	I can estimate the area of irregular shapes.	I can identify angles at a point on a straight line and half a turn.	I can read and interpret information in tables including timetables.
I can use negative numbers in context and count forwards or backwards with positive and negative numbers through 0.	I can subtract mentally using increasingly larger numbers.	I can solve problems including scaling by simple fractions and simple ratios.	I can read and write decimal numbers as fractions.	I can calculate and compare the areas of rectangles and squares.	I can identify multiples of 90 degrees.	I can complete information in tables including timetables.
I can count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000.	I can add mentally using increasingly larger numbers.	I can solve problems using multiplication and division.	I can + and – fractions with the same denominator and related fractions.	I can measure and calculate the perimeter of composite rectangular shapes in centimetres and meters.	I can draw a given angle writing its size in degrees.	I can solve ‘difference’ problems using information presented in line graphs.
I know what each digit represents in numbers up to 1 000 000.	I can subtract numbers with more than 4 digits using efficient written methods.	I can identify multiples and factors, including finding all factor pairs.	I can recognise mixed numbers and improper fractions and convert from one form to another.	I understand and use basic equivalences between metric and common imperial units.	I know angles are measured in degrees and can estimate and measure them.	I can solve ‘sum’ problems using information presented in line graphs.
I can read, write, order and compare numbers to at least 1 000 000.	I can add numbers with more than 4 digits using efficient written methods.	I can recall X and ÷ facts for multiplication tables up to 12x12.	I can compare and order fractions whose denominators are all multiples of the same number.	I can convert between different units of measure (e.g. Kilometre to metre; metre to centimetre; centimetre to millimetre; kilogram to gram; litre to millilitre).	I can identify 3D shapes including cubes and cuboids from 2D representations.	I can solve ‘comparison’ problems using information presented in line graphs.
Number, Place Value and Rounding	Addition and Subtraction	Multiplication and Division	Fractions, Decimals and Percentages	Measures	Geometry	Data
