

Dear Parent/Carer

Eco School Project

Our school's Eco-Team is running a project and we would love your support. We are learning about recycling and have a scheme to raise money, increase recycling and save CO2.

We hope to raise £500 in order to develop our outdoor eco environment for the school, by providing you all with special recycling bags for your food waste recycling caddy.

The cost per roll is 20p, additional bags can be obtained from school throughout the year. We also have a number of silver caddies available free of charge if anyone requires one of these also.

Each bag also earns carbon points for the school and we hope to earn enough points to Carbon off-set the school's lighting. We will also be calculating how much recycling we have encouraged, and how many tonnes of fertilisers went back into the soil instead of landfill in Wigan.

We will also be working out how much money parents/carers might be saving. A typical household saves **£240 per year** on shopping when they start food recycling, as they are more aware of what is getting thrown away uneaten. We think this project will help everyone involved and we hope you will be a part of it.

We will be announcing our progress regularly via our website and newsletter to keep you updated.

We are hoping to start the project in the New Year and to ensure you have your bags and recycling caddy 'ready to go.' Please complete and return the tear off slip below by Friday 11th December 2015.

Yours sincerely

Eco Warrior

Name of Child/ren _____ Year _____

I would like to support the Eco-Team Recycling Project and

I would like a roll of recycling bags and have enclosed 20p

I would like a silver caddy or I already have a food recycling caddy
