

You may be interested to hear that Miss Coburn has been very busy putting together an action plan to carry out a new project next year. You will be pleased to hear that our action plan was submitted into the Rolls Royce Science Prize and Ridgway has not only been awarded with the Rolls Royce Science Prize Special Merit Award along with £1000 but has also been selected as a Science Prize finalist and has been awarded an extra £5000 in order to help fund the project during 2015-2016!

There are many outdoor developments and goals that we would like to achieve through the project although the main aim is to raise the aspirations for all pupils in the STEM subjects (science, technology, engineering and maths) through fun hands-on, meaningful learning.

The project involves children becoming mini-project leaders to help to investigate suitable materials needed, calculate costs and sizes and making final decisions for the exciting outdoor developments we have planned.

Look out for more information about the project at the start of next academic year.
