Equipment to support Bowling technique	£100
Mobile Climbing Wall	£100
Archery	£100
Total Expenditure	£1700
Expenditure September 2015 – July 2016	£2780

Impact

Our expenditure is targeted at activities which we are unable to provide on the school grounds, such as the sports surface at the MUGA, and the Crown Bowling Green. This enables children to engage in more robust physical activity without the same fear of injury when falling over. The extra space also allows for more energetic pursuit games without a high risk of collision. Using the Bowling Green allows a more realistic experience of the skills required and is a good community partnership for the school.

Children have experienced new sports as taster sessions in the form of climbing, bowling and archery. These have excited children who were trying them for the first time, and enabled those with some experience (notably climbers) to showcase their skills with confidence.

We have engaged in strong cross-curricular activities with links to other cultures learning African Dance and Drumming. We considered the safeguarding priority of anti-bullying through Dance and role-play experiences which gave powerful messages in a fun activity session. We enhanced our Year 2 transition through a joint visit which enabled Year 2 and Year 3 pupils to interact and face challenges together, building relationships for next year.
