

Week 7

Friday 21st October

Pumpkins!

On Monday we had great fun as we made our own pumpkin lantern. We were very scientific as we discussed where the pumpkin had come from. Some of us were amazed to find out that the pumpkin had grown the seeds inside it! Mrs Akers hadn't put them in! We estimated how many seeds we thought there would be and used them to do lots of counting. We even counted in 10's.

In English we learned how to make instructions. We practiced using the words: First, Next, Then, After that, Finally, to give instructions to each other in the correct order.

You may like to have a go at using the words when your making things in the half term holiday. Maybe instructions for how to make a sandwich. How to make a paper plane. How to make a cake.

In science we discovered that lots of different things can give us light and that the sun is our main source of light. We also discovered that the moon is made of rock and dust, so doesn't make light, even though we see it shine in the night sky.

Yes?

....or no?

Hope you all have a restful and happy half term break!

See you on

Mon 31st October

Next 1/2 Term

We will begin to focus on The Great Fire of London in 1666.

We will look at significant individuals such as King Charles and Samuel Pepys..... But after we meet Guy Fawkes!

We would love to keep all your fantastic models and pictures in class to support this learning.

Home learning this week:

What great home learning you have all done! We have seen super posters, great autumn collections and pictures.

Well done to Emily G, Sophia, Lily M, Mollie, Oscar, Jack, Merlin and Percy. You thought of different ways to represent London- from photo montages, lego buildings, giant bricks, light up models and tissue paper collage—such a talented class!

Look out for the new home learning activities when we return to school.
