

Accreditation at Addington School (Key Stage 4 and 5 – 16-19)

- **Accreditation** is used to provide a rich diversity of subject areas and practical activities to meet the personalised learning needs of all our students.
- We provide a curriculum with sufficient breadth to enable a **wide range of experiences** for our students. This ensures that they become increasingly independent. Every student will have the opportunity to engage in externally accredited work. The accredited schemes we use are practically based and allow our students to be active in their learning. All students are following appropriate accredited courses,
- All students work on the **core subjects** to improve literacy including communication, numeracy and personal skills.
The curriculum is driven by the needs of the student rather than the demands of an accreditation body.
We are committed to helping every learner to make progress, building on their experiences both within and outside of school.

	Key Stage 4	Key Stage 5 – 16-19 Programme of Study
SLD/Access	Personal Progress including English, Maths, ICT, PSD and Work Related Learning	Personal Progress including English, Maths, ICT, PSD and Work Related Learning
