Polar Bears

Polar bears have black skin under their white cuddly fur. They live in the Arctic. After not many years the polar bears Mum let them go out by themselves. Polar bears can be quite dangerous. In the Arctic the weather is freezing cold! Penguins and polar bears live in the Arctic.

PENGUINS

Penguins travel 1000 miles before they're tired and reach their destination. They make their nests out of pebbles and they are thieves and steal. Penguins are sneaky and they steal food.

FUN FACTS

- Polar bears are carnivores (meat-eaters).
- Polar bears eat seals and meat.
- Polar bears now eat dolphins, seals and fish.
- Polar bears sleep seven to eight hours a day.

Polar explorer

In the Arctic

up to 5 Celsius

.polar bears are really good swimmers .

Spring is bad for snow . Polar bears dad eat there own babies after not that many years. some polar bears don't eat for about 4 months..

Arctic

- Polar bears can survive in the harsh Arctic climate because they are specially adapted to live there. Their white fur helps them warm and also helps them camouflage. The blubber in the polar bears body keeps them warm.
- The end. Thank you for watching
- Goodbye.

Polar bears

- Polar bears are cute but they are vicious.
- Polar bears are the biggest carnivor on earth.
- They are cute but you would not like a pet polar bear.
