

# ST PHILIP'S CE PRIMARY SCHOOL

## Gardening Club Week One

We started some seed off in propagators. They will sit on a nice warm window sill.

We even had time for Vimto and snack!

We started to build a weather station to keep an eye on growing conditions, we will finish it next week. We will also have our nice new bird table ready to go at the front of school.

Mr Lancaster helped us build and put out a bird feeding station. Birds are important. They help pollination and move seed around. If we look after them, they will look after us...

We put bird food around the school gardens to encourage more birds onto our school grounds. We are holding a bird watch here for the rspb.
