

On the afternoon of Friday 24th March some pupils from both Key Stage 1 and Key Stage 2 have organised a Mother's Day Secret Shop in order to raise money for the Hull and East Yorkshire branch of the SANDS charity (please see details of the charity's work below).

They will be selling handmade gifts for other children to buy for mothers and grandmothers, all priced at less than £3. They will also be able to buy raffle tickets (priced at £1) to gain a chance to win a bigger Mother's Day gift. The raffle will be drawn that day and the prizes sent home with the children.

We really hope that you can support this charity and the children that are running the stall.

In the UK, between 15 and 16 babies a day die. The number covers any loss from 24 weeks of pregnancy to within 28 days of birth. There are 4.6 stillbirths in every 1000 births and 2.7 neonatal deaths per 1000 live births (based on data published by the ONS in 2015). The Hull & East Yorkshire branches of Sands provide help and support for bereaved parents and families who have suffered the death of a baby, even if their babies 'age' falls outside the parameters of these statistics. This support is provided free of charge and is open to all bereaved parents, their families and friends, no matter how long ago the loss occurred.
