

ADDITION: Y1

Understanding the operation and related vocabulary.

Understanding the operation

Understand addition as:

- Combining two or more quantities.
- Increasing one quantity.

Read, write and interpret mathematical statements involving addition (+) and equals (=) sign.

$$14+5=19 \quad 17=9+8$$

Solve missing number problems

$$11+\square=18 \quad \square=13+2 \quad 13=\square+\square$$

Understand addition and subtraction as related operations. E.g. $7 + 3 = 10$ is related to $10 - 3 = 7$

When introduced to the equals sign, children should see it as signifying equality. They should become used to seeing it in different positions.

Mental Calculations

Number facts

Recall and use addition facts to 10 fluently
the total of 6 and 3 6 plus 2 4 more than 5
 Know number pairs with a total of 20
 $16+\square=20 \quad 20=3+\square$

Mental methods and jottings

Add one-digit and two-digit numbers to 20, including zero using concrete objects, pictorial representation and mentally.

Represent and use number bonds within 20, experiencing the = sign in different positions.

Counting on (sequencing)

$12 + 3$ (by counting on in ones; 13, 14, 15)

With Jottings:

Progress to crossing the tens boundary

$18 + 5$ (by partitioning 5 to bridge the tens boundary; + 2, + 3)

Partitioning

$5 + 7$ (by partitioning 7 in to 5 and 2)

$$5 + 5 + 2$$

Use bundles of straws and Dienes to model partitioning ten numbers into tens and ones and develop their understanding of place value.

Children have opportunities to explore partitioning numbers in different ways.

e.g. $7 = 6 + 1, 7 = 5 + 2, 7 = 4 + 3$

Written Calculations

No formal written layout. Children record their maths using pictorial representations, number lines and mathematical statements.

Counting and Combining sets of Objects
 $5+7=12$

Add one-digit and two-digit numbers to 20, including zero

$$7 + 4$$

OR

Vocabulary

Understand the vocabulary related to addition:

Addition, add (+), forwards, put together, more than, total, altogether, distance between, difference between, equals = same as, most, pattern, odd, even, digit, counting on, plus, the sum of

Generalisations

- True or false? Addition makes numbers bigger.
- True or false? You can add numbers in any order and still get the same answer.

Some Key Questions

How many altogether? How many more to make...? I add ...more. What is the total? How many more is... than...?

How much more is...? One more, two more, ten more...

What can you see here?

Is this true or false?

What is the same? What is different?

Children should experience regular counting on and back from different numbers in 1s and in multiples of 2, 5 and 10.

Using known facts and place value

$$15 + 4$$

$$5 + 4 = 9 \text{ so } 15 + 4 = 19$$

ADDITION: Y2

Understanding the operation and related vocabulary.	Mental Calculations	Written Calculations
<p>Understanding the operation Continue to understand addition as:</p> <ul style="list-style-type: none"> - Combining two or more quantities. - Increasing one quantity. <p>Show that addition of two numbers can be done in any order (commutative law) Recognise that $5 + 27$ is equal to $27 + 5$</p> <p>Continue to recognise the inverse relationship between addition and subtraction using numbers up to 20. Write the related number sentences $15+2=17$ $2+15=17$ $17=15+2$ $17=2+15$ $17-2=15$ $17-15=2$ $2=17-15$ $15=17-2$</p> <p>Solve missing number problems $17+\square=27$ $\square=21+4$ $10=\square+\square$</p> <p>Vocabulary Understand the vocabulary related to addition</p> <p>+, add, addition, more, plus, make, sum, total, altogether, how many more to make...? how many more is... than...? how much more is...? =, equals, sign, is the same as, Tens, ones, partition</p> <p>Near multiple of 10, tens boundary, More than, one more, two more... ten more... one hundred more</p> <p>Generalisation</p> <ul style="list-style-type: none"> • Noticing what happens when you count in tens (the digits in the ones column stay the same) • Odd + odd = even; odd + even = odd; etc • show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot 	<p>Number facts Recall and use number facts to 20 fluently and derive and use related facts up to 100. 7 add 8 4 more than 9 50 plus 30 the sum of 40 and 50</p> <p>Know complements to the next multiple of 10. $52+\square=60$ $76+\square=80$</p> <p>Know pairs of multiples of 10 with a total of 100. $60+\square=100$ $100=70+\square$</p> <p>Mental methods and jottings Add numbers using concrete objects, pictorial representations, and mentally, including:</p> <ul style="list-style-type: none"> * a two-digit number and ones * a two-digit number and tens * two two-digit numbers * adding three one-digit numbers <p>Counting on $37 + 20$ (by counting on in tens; 47, 57) <u>With Jottings</u> Begin by not crossing the tens boundary $42 + 23$ (by partitioning the second number and counting on; + 20, + 3) Progress to crossing the tens boundary $47 + 15$ (by partitioning the second number and counting on; + 10, +3, +2)</p> <p>Partitioning $23 + 12$ ($20 + 10 = 30$, $3 + 2 = 5$ then $30 + 5 = 35$) <u>With Jottings</u> Begin by not crossing the tens boundary $42 + 23$ ($40 + 20 = 60$; $3 + 2 = 5$ then $60 + 5$)</p>	<p>Continue to use number lines to develop understanding of:</p> <p>Counting on in tens and ones $23 + 12 = 23 + 10 + 2$ $= 33 + 2$ $= 35$</p>  <p>Partitioning and bridging through 10. The steps in addition often bridge through a multiple of 10 e.g. Children should be able to partition the 7 to relate adding the 2 and then the 5. $8 + 7 = 15$</p>  <p>Adding 9 or 11 by adding 10 and adjusting by 1 e.g. Add 9 by adding 10 and adjusting by 1 $35 + 9 = 44$</p> 

- Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems. This understanding could be supported by images such as this.

Some Key Questions

How many altogether? How many more to make...? How many more is... than...? How much more is...?
 Is this true or false?
 If I know that $17 + 2 = 19$, what else do I know? (e.g. $2 + 17 = 19$; $19 - 17 = 2$; $19 - 2 = 17$; $190 - 20 = 170$ etc).
 What do you notice? What patterns can you see?

Progress to crossing the tens boundary
 $47 + 15$ ($40 + 10 = 50$, $7 + 5 = 12$ then $50 + 12 = 62$)

Adjusting

$34 + 9$ (adding 10 then subtracting 1)

With Jottings

$45 + 19$ (by adding 20 and subtracting 1)

Using known facts and place value:

$63 + 4$

$3 + 4 = 7$ so $63 + 4 = 67$

Estimating:

Check calculations by adding in a different order

check $27 + 15$ ($27 + 10 + 5$) with $15 + 20 + 7$

Towards a Written Method

Partitioning in different ways and recombine

$47 + 25 = 72$

ADDITION: Y3

100	20	20	1	1																		
100	20	20	1	1																		

Key Questions

What do you notice? What patterns can you see?

When comparing two methods alongside each other:
What's the same? What's different? Look at this number
in the formal method; can you see where it is in the
expanded method / on the number line?

Manipulatives can be used to support mental imagery
and conceptual understanding. Children need to be
shown how these images are related eg.
What's the same? What's different?

Estimating:

Estimate the answer to a calculation

$139 + 58$ is approximately $150 + 50$

Use inverse operations or equivalent calculations to
check answers

$236 + 85$ by adding in a different order e.g. $200 + 85 + 36$

ADDITION: Y4

Using known facts and place value:

$$7.5 + 2.6$$

$$7.5 + 2.5 = 10 \text{ so } 7.5 + 2.6 = 10.1$$

Estimating

Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy

$$25\,063 + 7459 \text{ is approximately } 25\,000 + 7500$$

Continue to use appropriate strategies to check answers

$$\text{check } 8.3 + 1.9 \text{ by adding in a different order}$$

$$8.3 + 2 - 0.1 \text{ or } 8.3 + 0.7 + 1.2$$

ADDITION: Y6		
Understanding the operation and related vocabulary.	Mental Calculations	Written Calculations
<p>Understanding the operation Use their knowledge of the order of operations.</p> <p>Understand that when there are no brackets in an expression, do multiplication or division before addition or subtraction.</p> <p>Understand that if the operations are at the same level of priority, work out the example from left to right.</p> <p>Continue to solve missing number problems $0.63 + \square = 0.85$ $\square = 0.5 + 0.33$ $\square + \square = 0.71$ $0.89 + 0.3 = 0.6 + \square$ $0.75 < \square + 0.06$ $\square + \square > 0.74 + 0.07$</p> <p>Explore the order of operations using brackets compare $14 - (3 + 5)$ with $(14 - 3) + 5$</p> <p>Vocabulary See previous years Read, spell and pronounce mathematical vocabulary related to addition correctly</p> <p>Generalisations Order of operations: brackets first, then multiplication and division (left to right) before addition and subtraction (left to right). Children could learn an acrostic such as PEMDAS, or could be encouraged to design their own ways of remembering. Sometimes, always or never true? Subtracting numbers makes them smaller.</p>	<p>Number facts Continue to use knowledge of addition facts and place value to derive related facts with numbers to two decimal places 0.09 plus 0.04, the total of 0.09 and 0.08, the sum of 0.06 and 0.12, 0.04 more than 1.13</p> <p>Know complements to the next whole number $4.83 + \square = 5$ $7.125 + \square = 8$</p> <p>Mental methods and jottings Perform mental calculations, including with mixed operations, large numbers and decimals</p> <p>Add positive and negative integers (in contexts such as temperature) a 6°C temperature rise from -4°C</p> <p>Counting On (Sequencing): $6.46 + 2.03$ (by partitioning the second number and counting on; +2, +0.03) <u>With Jottings:</u> $18.7 + 5.64$ (by partitioning the second number and counting on; +5, +0.3, +0.34)</p> <p>Partitioning: $3.4 + 2.77$ ($3+2=5$, $0.4+0.7=1.1$, $5+1.1+0.07=6.17$) <u>With Jottings:</u> $27.34 + 5.78$ ($27+5=33$, $0.3+0.7=1$, $0.04+0.08=0.12$, $33+1+0.12=34.12$)</p> <p>Adjusting: $6.73 + 0.99$ (by adding 1 and subtracting 0.01) <u>With Jottings:</u> $17.4 + 5.09$ (by adding 5.1 and subtracting 0.01)</p>	<p>Written methods As year 5, progressing to larger numbers, aiming for both conceptual understanding and procedural fluency with columnar method to be secured. $657\,982 + 54\,976$ Continue calculating with decimals, including those with different numbers of decimal places $73.82 + 17.382$</p> <p>Problem Solving Teachers should ensure that pupils have the opportunity to apply their knowledge in a variety of contexts and problems (exploring cross curricular links) to deepen their understanding</p>

Some Key Questions

What do you notice?

What's the same? What's different?

Can you convince me?

How do you know?

Using Known Facts And Place Value:

$$0.64 + 0.36$$

$$64 + 36 = 100 \text{ so } 0.64 + 0.36 = 1$$

Estimating:

Use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy.

$$73.82 + 17.382 \text{ is approximately } 74 + 17$$

Continue to use appropriate strategies to check answers
check $3.4 + 2.77$ by adding in a different order
partition or add 3 and adjust
