

# ASCOT HEATH INFANT SCHOOL HOME LEARNING GRID

**Badgers Class**

**Topic: Food Glorious Food- Harvest**

<b>Creative</b>	Create a seasons collage.	Follow a recipe and cook something with a grown up. Take a photo, bring it in and tell us all about how you did it.	Can you do your own still life sketch at home? Find some interesting objects to draw and arrange them nicely and have a go.	Create your own natural sculpture in the style of Andy Goldsworthy and take a photo.
<b>Scientific</b>	Grow a plant from seed (cress, rocket and grass are nice a quick to grow) and keep a diary of how you looked after it and the changes you noticed.	Look in your garden. Find 3 things that are living, 3 things that once lived and 3 things that are not living and draw and label them.	Find 4 different pieces of fruit or vegetables and see if you can find any seeds. Draw a picture showing where you find them.	Can you create 3 different food chains, all starting with a plant (a producer) and finishing with a predator. What's the biggest chain you can make?
<b>English</b>	Write your own recipe for something tasty.	Can you think of a food that is harvested for every letter in the alphabet? E.g. A= apple, B= brazil nut, c= cabbage. Which letters were the hardest?	Write a lovely descriptive poem about one of the seasons and present it nicely.	Practise your handwriting. Bring your best in to show us.
<b>Maths</b>	Practise doubling numbers up to double 10. Can you show your working out?	Learn your number bonds to 10 (year 1) and 20 (year 2) off by heart and be prepared to share your learning.	If the answer is 12, what could the question be? Think of as many as you can.	Practise counting to 100, forwards and backwards.
<b>Research &amp; Computing</b>	Can you find out how food goes on the journey from a field on a farm to your plate at home? E.g. A loaf of bread or a glass of milk?	Find out 3 fab facts about Badgers and write them down.	Take some photos of something you find interesting. Choose your best one and bring it in to show us and be prepared to tell us all about it.(Remember to ask permission first.)	When you next go to the supermarket look at the fruits and vegetables and see if you can find out the country they were grown in. Can you show these places on a map?
