What we discussed:

Between April-June 2017, Becky (advocate) visited the Residence on different days in order to speak to individual children to gather their views about St Anne's Residence.

There were 2 versions of questionnaires used; each asking the same questions in different formats so young people could choose their preferred option.

Some young people completed the questionnaire almost independently; others received the support from an advocate or another member of staff.

The questions that were asked were:

- What do you do if you need help?
- What makes me happy at residence?
- What makes me sad at residence?
