

## Spring Term 1

In Nursery 3 our topic is Icy Cold. On the first day the children were surprised to see that some of their favourite toys had been frozen in the ice. We had lots of discussions as to how we would free the toys. The children enjoyed putting the gloves on and trying to make the ice warm again. "If we keep making it warm, the toys will come out" said one child.

In the creative area we have been talking about cold colours and making some lovely collage pictures.

We will be listening to lots of stories about snow and ice. Our favourite one is called Jack Frost and it's all about how he makes the world white with his pointy fingers.

Outside we have had a treasure hunt. Our Teachers hid lots of pictures of warm winter clothes and we had to find them. It was a bit tricky when the children hid the pictures. They found some really interesting places.

In Maths we have been decorating winter trees with snowflakes and counting how many we can put on. We have also been making patterns using big objects and small objects.

In Group Time we have been talking about our feelings and whether we are happy or sad and what makes us happy or sad.
