

Ourselfes

Being on time to school is important. Arriving late at school can be very disruptive for us, our teachers and the other children in the class.

Being late for school reduces learning time. If we are 5 minutes late every day, we will miss three days of learning each year. If we were 15 minutes late every day, we would miss 2 weeks of learning each year. That is a lot of learning time!

Please can you help us to be on time to school every day?

Thank You

The Take Care of Ourselfes Reps.

Our Learning

This half term we are looking at the following topics:

Year 6 - Victorians

Year 5 - Chocolate

Year 4 - Electricity

Year 3 - Romans

Focus on Year 5

We have been looking at where and why chocolate (actually it's not chocolate it's coco beans!) comes from and how it grows. We have tasted different chocolate (yummy!) We will also be looking at the Mayans (they put chilli in their hot chocolate).

Year 5 Take Care Reps

Each Other

This half term we are setting up a link with a school in Nyofelleh Gambia. We are sending them our old maths textbooks, which have been sat in cupboard collecting dust, as they have very little essential equipment in their school.

We are also all going to write to them to tell them about life here at Larkfields, and hopefully we can find out about life at Nyofelleh.

Our Environment

This half term the Environment reps will be looking at reducing our Carbon footprint by trying to turn off the lights when the room is not in use. We will be monitoring each class to check that lights have been turned off during break and lunchtimes. Spot checks will be done and prizes awarded to those classes who are trying to cut down on how much electricity we use. Last month it cost the school £675 so this month we want to try and reduce this.
