Pikes Lane Primary School

HEALTH AND SAFETY POLICY

INTRODUCTION

The Governing Body, in producing this Health and Safety Policy, has adopted the BMBC Health and Safety Policy and this School's Safety Policy builds upon that Policy to extend and detail the school's organisational arrangements for health, safety and welfare.

The Policy covers the area that the Headteacher has control over and details the safety arrangements within the school and how the Headteacher is to fulfil her responsibilities in respect of staff, pupils, visitors and other employees working within the school (e.g. Contractors).

GENERAL STATEMENT

The Governing Body is responsible for the overall School's Health and Safety Policy and it is the aim of this Policy to work within the information, procedures and codes of practice contained in the BMBC Health and Safety Policy.

- (a) The Headteacher is directly responsible for the planning and implementation of the Policy and also for ensuring that Teachers and other employees carry out their duties and co-operate with the Policy. The Headteacher will ensure arrangements are made to bring the Policy to the notice of all staff including new employees, Supply Teachers and Pupils and, where appropriate, the relevant sections to any visitors and contractors.
- (b) The Governors recognise the need to consult staff on health and safety matters and the need to consult individuals before allocating specific health and safety functions.
- (c) The Governors Policy is to ensure that:-
 - (i) all reasonable practical steps are taken to ensure the health, safety and welfare of all persons using the premises; and
 - (ii) to establish and maintain a safe and healthy environment throughout the school;
 - (iii) to establish and maintain safe working procedures among staff and pupils;
 - (iv) to provide plant, equipment and systems of work which are safe and without risk to health;
 - (v) to make arrangements for ensuring, so far as is reasonably practicable and without risk to health, the handling, storage and transportation of articles and substances;

- (vi) to ensure the provision of sufficient information, instruction and supervision to enable people working on site, and pupils to avoid hazards to contribute to health and safety training;
- (vii) to promote the development and maintenance of sound safety, health and welfare practices;
- (viii) to maintain a safe and healthy place of work and safe access and exit from the premises;
- (ix) to formulate effective procedures for use in case of fire and other emergencies and procedures for evacuating the school premises;
- (x) to make arrangements within the School for the reporting of accidents to comply with the Reporting of Injuries, Diseases, Accidents and Dangerous Occurrences Regulations, 1995 as detailed in the Children's Services Health and Safety Manual;
- (xi) to provide and maintain adequate welfare facilities.

IMPLEMENTATION

Whilst the Governing Body is responsible for all Health and Safety matters relating to the School it is clearly impracticable for it to control day to day management duties. Because of this, the duty is placed on the Headteacher to have full responsibility for the implementation of the School's Health and Safety Policy including the responsibilities and duties placed on her by the BMBC Health and Safety Policy.

It is recognised that the Headteacher may, in turn, assign specific duties and responsibilities to members of staff to ensure full implementation of the Policy including the BMBC Health and Safety Policy. Such delegation to responsible and competent members of staff is to be encouraged but the Headteacher must continue to exercise oversight of any duties and/or responsibilities so delegated.

Should any matter concerning health and safety arise, apart from minor day to day occurrences, the Headteacher must ensure that the appropriate reports are sent to the Director of Children's Services and inform the Chair of Governors and/or the 'Health and Safety Governor'.

LIAISON

In order to facilitate the continued involvement of the Governing Body in the matters of Health and Safety and to establish communication systems for the reporting of any matter concerning health and safety and an appropriate forum for the discussion of health and safety issues, the Governing Body will;

- (a) at the first meeting of the Governing Body in the Autumn Term of each year appoint a Governor, to be known as the 'Health and Safety Governor' who will liaise with the Headteacher and the appointed Safety Representative to discuss all matters concerning health and safety;
- (b) ensure that the 'Health and Safety Governor', at least once in every term, meet with the Headteacher and the Safety Representative to discuss any matters concerning health and safety;

- (c) ensure that at each meeting of the Governing Body the 'Health and Safety Governor' reports (verbally or in writing) on the previous meeting with the Headteacher and Safety Representative and on any other matters concerning health and safety to which the attention of Governors should be drawn;
- (d) make the H & S Governor available for a meeting at any time with the Headteacher and/or Safety Representative to discuss any matter relating to health and safety.

THE MANAGEMENT OF HEALTH AND SAFETY AT WORK REGULATIONS 1999:-

Introduced the requirement for a formal structured approach to be applied to all avenues of health and safety based on a system of Risk Assessments.

In order to identify hazards and evaluate the risks from them the Governors will ensure that an ongoing programme of Risk Assessment in all areas of work is taking place.

The Risk Assessments will:-

- identify significant hazards and assess the risks to employees and any others who may be affected by the School's activities (e.g. the public, temporary staff, contractors, school pupils etc);
- be recorded in an appropriate manner and brought to the attention of all persons engaged in, or affected by, the task that has been assessed where necessary;
- record the significant hazards;
- show the people or group of people exposed to the risk;
- offer recommendations for further actions, based on schedule 1 of the Regulations;
- give an overall rating as to the level of risk;
- be specific for any pregnant worker;
- be specific for any young person;

The Risk Assessment must be reviewed if:-

- there is a reason to suspect that the previous assessment is no longer valid;
- there has been a significant change.

MONITORING AND REVIEW

The results of assessments, the application of health and safety procedures and risk control techniques will be monitored as follows:-

- by the Headteacher and Line Managers within their respective Departments;
- by the competent person(s) who carried out the assessments;
- by the Management Committee;
- by the Health and Safety Representatives;
- by the Authority's Health and Safety Advisers/Officers.

CONCLUSION

The Health and Safety at Work Act 1974 imposed substantial duties on all employers and employees in respect of health and safety and work. Within terms and context of the BMBC Health and Safety Manual and of this Health and Safety Policy the Governing Body of the School accepts all its responsibilities for the care, health and safety of its employees while they are at work. This Policy and that of BMBC aims to show how the Governing Body seeks to take all reasonable steps to ensure that these responsibilities are carried out and they are your guide as an employee to understanding the policies and procedures which have been designed to help and protect you.

RESPONSIBILITIES

Headteacher

The Health and Safety Policy defines the Headteacher's specific managerial responsibility as follows:-

The Headteacher is responsible for the day-to-day Health and Safety management of school and all staff, except when those with direct responsibility for grounds maintenance and kitchen staff, who are currently the responsibility of the Local Authority. This responsibility will include ensuring that staff are aware of the safety rules and procedures which apply and also that they have access to detailed and specific regulations affecting their work. In particular the Headteacher must be aware of the arrangements governing visits and general contractors whilst on school premises.

Given the general responsibility that the Headteacher has for the school and all that this entails it is probably an impossible task to prepare a check list which accurately encompasses the full range of responsibilities. It is felt that any such list could include the following:-

- 1) All structural defects in contracted schools should be reported to the Authority.
- 2) Know the structure of the Authority and central management responsibilities under the Health and Safety at Work Act.
- 3) Be aware of the responsibilities and specialisations of off-site representatives.
- 4) Maintain safe working practices.
- 5) Ensure that employees are aware of potential hazards in their place of work and receive appropriate safety codes where issued.
- 6) Emphasise the necessity for observation of health and safety regulations.
- 7) Ensure that staff are aware of and seek advice when any unusual situation which is likely to be a health and safety hazard arises.
- 8) Check the operation of procedures to be followed in the event of fire and ensure that all staff know what to do and in particular their responsibilities.
- 9) Ensure that all staff are aware of the first aid arrangements.
- 10) Understand the arrangements for the appointment of safety representatives.
- 11) Establish working arrangements with the safety representative.
- 12) Know the Safety Warden responsible for the school.

- 13) Be familiar with the operation of the Joint Safety Committee, and its membership and role.
- 14) Understand the responsibilities of employees.
- 15) Know the procedures and machinery for dealing with hazards.
- 16) Check that protective clothing and equipment where necessary are provided and used.
- 17) Make sure that all accidents are reported and investigated. Ensure that they are notified to the Authority via the accident reporting procedure.
- 18) Provide basic training for newly appointed staff.
- 19) Know your responsibilities and rights for taking an area or equipment out of use.
- 20) Be aware of the responsibility toward other people on site.
- 21) Know the arrangements for staff cover.
- 22) Be aware of the arrangements for publicity and training.
- 23) Have a brief knowledge of the health and safety legislation and the workings of the Health and Safety at Work Act.
- 24) Have a general knowledge of the Health and Safety Commission and the Health and Safety Executive.
- 25) Understand clearly the organisation, role and powers of the Health and Safety Inspectorate. Know the means of enforcement and the penalties.
- 26) Recognise that policy and practices are not static. Development is continuous and will necessitate changes.

Governors

The governing body of Pikes Lane Primary, employ the teachers and all non-teaching staff, except the school meals kitchen staff, and are responsible for school buildings.

They therefore, have total responsibility for all health and safety matters affecting staff, pupils, visitors etc. and control of premises.

Employees

The Health and Safety at Work Act 1974 states:-

"It shall be the duty of every employee while at work:-

- a) to take reasonable care for the health and safety of himself and of any other persons who may be affected by his acts or omissions at work: and

- b) as regards any duty or requirement imposed on his employer or any other person by or under any of the statutory provisions, to co-operate with him so far as it is necessary to enable that duty or requirement to be performed or complied with."

The Act also states "No person shall intentionally or recklessly interfere with or misuse anything provided in the interests of health, safety or welfare in pursuance of any of the relevant statutory provisions".

It is recognised by the Trade Unions organisations that the disciplinary procedure would be relevant in circumstances where employees choose to disregard these responsibilities.

Class Teachers

The class teacher is responsible for the safety of pupils whilst in the classrooms, workshops and laboratories. This traditional role has now, since 1987, become a statutory duty.

Where class teachers have concerns regarding the various safety issues for example class sizes, condition of equipment etc. they should discuss the problems with the Headteacher before the lesson.

Class teachers should:-

- (i) control and supervise the pupils and ensure that safety rules and protective equipment are followed and used;
- (ii) know the various safety procedures in their teaching areas including the location of any safety equipment, they should ensure that all procedures are followed;
- (iii) ensure that safety instructions are clear and understood and check frequently that they are being followed;
- (iv) they personally should follow safe procedures and working practices;
- (v) ensure that before the lesson, by carrying out a risk assessment, that all protective clothing, guards, screen, etc. plus any special safety procedures are available and will be used;
- (vi) liaise with and recommend to the Head of the Department any safety aspects of hazards and also recommend additions or improvements that can be implemented.

Site Manager

Is a key member of the school staff in that he is often the first person to notice health and safety hazards and is the 'contact person' for reporting faults and liaising with contractors on site.

His role, within the school's safety arrangements should be clearly defined and **all** staff made aware of this role.

Pupils

Are expected to:-

- (a) exercise personal responsibility for the safety of self and class-mates;
- (b) wear the correct clothing consistent with safety and/or hygiene (this would preclude unsuitable footwear, knives and other items considered dangerous);
- (c) follow all the safety rules of the school and in particular the instructions of teaching staff given in an emergency;
- (d) only use, and not wilfully misuse, neglect or interfere with things provided for his/her safety.

NB: It is essential that all pupils and parents are made aware of the requirements of this section possibly through the schools brochure.

Visitors

Should report to the Main Office on arrival at the school and they should be required to observe the safety rules of the school. In particular, parents helping out in school should be made aware of the health and safety arrangements applicable to them through the teacher to whom they are assigned, and should not be asked to carry out tasks for which they are not 'competent', trained or authorised for.

The Health and Safety at Work Act, 1974 imposes a general duty of care on most people associated with work activities. Everyone employed in educational establishments is protected by the Act and employers have an obligation to ensure, as far as is reasonable practicable, that persons NOT EMPLOYED by them who may be affected by their activities are not exposed by their actions to health and safety risks within the school premises. (*Health and Safety at Work Act, 1974 Section 3.*)

In our school, pupils, visitors and parents will come into this category.

In addition the 'Occupiers Liability Act 1957' introduced a 'common duty of care' which an occupier owes to all visitors other than trespassers. This duty required him/her to see that visitors were reasonably safe in using the premises for the purpose for which they were invited, or permitted to be there.

Contractors

Should report to the Business Manager or Site Manager on arrival at the school and outside contractors working on educational premises are required to ensure safe working practices by their employers under the provision of the Health and Safety at Work Act and must pay due regard to the safety of all persons using those premises in accordance with Section 3 and 4 of the Health and Safety at Work Act. They should also inform the school of any hazardous operations they intend to carry out and liaise with the Headteacher regarding this work. They should also have available COSHH assessments for any substances they intend to use.

In instances where the contractor creates hazardous conditions and refuses to eliminate them the Head or Principal must take such actions as are necessary to

prevent persons in his/her care from risk of injury and inform Education Department – Strategy Division of the actions taken. See Section D re. Contractors in Schools.

The Headteacher's delegated responsibilities to Teaching and Non-teaching Staff

These staff:-

- (a) have a general responsibility for the application of the Authority's Safety Policy, and any School Policy, to their own department or area of work and are directly responsible to the Headteacher for the application of existing safety measures and procedures within that department/area of work. Advice or instructions given by the Authority and the Headteacher, including the relevant parts of this statement, shall be observed;
- (b) shall, where necessary, establish and maintain safe working procedures including arrangements for ensuring, as far as is reasonably practicable, safety and absence or risks to health in connection with the use, handling, storage and transport of articles and substances, (e.g. chemicals, boiling water, duplicating fluid, guillotines); they should also refer to documents produced for these products under the COSHH Regulations;
- (c) shall resolve any health and safety problem any member of staff may refer to them and refer to the Headteacher any of these problems for which they cannot achieve a satisfactory solution within the resources available to them;
- (d) shall carry out a regular safety inspection of the activities for which they are responsible and, where necessary, submit a report to the Headteacher.
- (e) shall ensure, as far as is reasonably practicable, the provision of sufficient information, instruction, training and supervision to enable other employees and pupils to avoid hazards and contribute positively to their own safety and health at work;
- (f) shall, where appropriate, seek the advice and guidance of the relevant Advisor or Officer of the Authority;
- (g) shall propose to the Headteacher requirements for safety equipment and on additions or improvements to plant, tools, equipment or machinery which are dangerous or potentially so.
