

Bee's spring term 2018 news letter

This term we have been very busy. The topic we are learning about this term is out of this world. We have all been very excited about this topic and have been learning lots!

In Science we have been thinking about space and the different things out there, from how we get into space from earth and what can be seen in space. We all have been on a virtual space tour through space and discovered what is out there.

In D&T our task has been to design and create our own space suits ready to take us into space next half term as part of our History session. The children have really enjoyed being created this term and exploring new ways to make things.

In Art we are creating and learning about water colour painting and have begun to mix and create new colours to create different water colour planets. We are moving on to using different forms of media to create different space Art.

In P.E we continue to have sensory circuits and work with Will in our ABC sessions. On a Tuesday morning we practice football skills in the hall with the stags outreach team it has been super fun learning new skills. We can't wait for swimming to start next half term.

We will continue to keep you posted on the new topic next term
