Health, Safety & Welfare Policy

Introduction

This policy is written within the framework of the Health and Safety at Work etc. Act 1974 and its subsequent Regulations. It is to be read in conjunction with the Corporate Health, Safety and Welfare Policy of the London Borough of Redbridge.

It will be reviewed, added to, or modified from time to time and may be supplemented in appropriate cases by further statements related to the work of the Service Area. Copies and subsequent amendments will be made available to all employees.

The success of this Policy depends on the active support of all employees to achieve its objectives.

SS Peter & Paul's recognises the need for a well-defined policy setting out the standards it aims to achieve for protecting the health, safety and welfare of staff, pupils and others.

Policy Statement

The aim of the Governing Body and the Head Teacher is to provide a safe and healthy working and learning environment for staff, pupils and visitors, this will be achieved by implementing the health and safety objectives detailed in this Policy.

SS Peter & Paul's attaches' great importance to the health, safety and welfare at work of all its employees and other users, particularly children, parents and visitors. SS Peter & Paul's School will provide for its employees whilst working on the premises or elsewhere:

- Instruction, information training and supervision to enable employees to work safely
- Safe machinery and equipment, including vehicles (coaches)
- Articles and substances for use at work that are safe when properly used, stored, handled and transported,
- Safe systems and methods of work that are without risk to health and safety
- Premises and places of work that are well maintained, have safe access
- Suitable safety clothing and equipment when required by regulation, approved code of practice, departmental instruction or when considered necessary H&S Co-ordinator
- Any other suitable protection, where appropriate, when staff might be at risk
- The safety of visiting contractors, all stakeholders, members of the public and authorized visitors
- Adequate welfare facilities

Although the prime responsibility for health and safety under the Health and Safety at Work Act lies with the Establishment, as the employer, high standards of health, safety and welfare can only be achieved with the full co-operation and awareness of all staff.

Professional Advice

The London Borough of Redbridge (LBR) employs, within Human Resources' Health and Safety Function, professionally qualified Health and Safety Advisers who are available to assist the Establishment in the operation of its responsibilities by providing advice and guidance on matters of health and safety.

In addition, there are other officers within LBR who are able to provide advice on health and safety within their specialist areas (e.g. Asbestos, Legionella).

The Governing Body Responsibilities

For Voluntary Aided and Foundation Schools, the Governing Body and the Head Teacher are ultimately responsible for ensuring the effective management of health and safety within the school.

The Governing Body should ensure:

- There are satisfactory arrangements in place as an employer for providing a safe and healthy working environment for teaching and non- teaching staff in its employment
- There are adequate arrangements for managing activities
- Health, safety and welfare within the school when the Governing Body is acting as the controller of the premises
- That it considers the health and safety implications of its decisions
- Sufficient resources are allocated to ensure that health & safety can be successfully managed
- That suitable standards of health & safety are achieved and maintained within the school by monitoring the School's health and safety performance on an annual basis
- That the School's Health & Safety Policy and procedures are annually reviewed to ensure their suitability.

The Headteacher

Head Teachers are responsible for:

- Complying with the health & safety decisions within the school. In the absence of the Head the Deputy, or whoever the Head nominates, will assume this responsibility
- Producing the School's Health & Safety Policy. This shall include a statement of intent, individual health and safety responsibilities, and the organisation, arrangements and procedures
- Establishing and maintaining systems within the School to ensure that health & safety is effectively managed
- Appointing a Health & Safety Coordinator for the School.
- Resolving health and safety problems

- Sufficient resources are allocated to enable health and safety to be successfully managed;
- The Health, Safety Policy are brought to the attention of all staff
- Other health and safety information is communicated to relevant staff
- Accidents are investigated and reported using the established procedures
- Safety Representatives can carry out their functions including inspections and accident investigations and, where appropriate, that consultations take place with them. Where Safety Representatives are not appointed by the staff side association, adequate arrangements exist for consultation with all staff on health, safety and welfare issues
- Safety Representatives inspection report forms are dealt with in an appropriate manner
- Training needs are identified and met
- Assessments for all risks to health and safety are carried out and the significant findings recorded, with appropriate preventative measures being taken
- New employees receive appropriate health, safety and welfare information, instructions and training, including details of the Health, Safety Policy, Health & Safety Manual, fire and other safety procedures;
- Fire precautions and procedures are implemented (including fire drills)
- Liaison is carried out with contractors
- Termly health and safety inspections of the School are carried out.

School Health and Safety Co-ordinator

Health and Safety Co-ordinators are responsible for:

- Establishing arrangements for dealing with health and safety matters such as:
 - Dissemination of health and safety information to all staff;
 - First aid;
 - Accident reporting;
 - Emergency evacuation procedures;
 - Ensuring accidents are investigated;
 - Ensuring health and safety matters raised by staff are dealt with;
 - Maintaining a central file of health & safety information relevant to the establishment;
- Liaising with Safety Representatives or other means of consulting with employees;
- Ensuring the implementation of the Safety Policy is monitored;
- Co-ordinating all aspects of Health, Safety and Welfare Policy and practice;
- Ensuring 'reportable' accidents are reported to the Borough.

All employees are responsible for:

- The health and safety of themselves and their colleagues and for any child under their care
- Keeping up to date with current safety procedures

- Reporting any safety concerns to the Leadership Team

Classroom Teachers

A class teacher is expected to:

- Know the emergency procedures in respect of fire and first-aid and the special health and safety measures to be adopted in his/her own teaching areas and to ensure that they are applied
- Be aware of, and follow, health and safety guidance
- Exercise effective supervision of students and ensure that they know of the general emergency procedures in respect of fire and first-aid and the special safety measures of the teaching area
- Give clear instructions and warnings as often as necessary
- Ensure that students' coats, bags, cases etc, are safely stowed away
- Integrate all relevant aspects of health, safety and welfare into the teaching process and if necessary give special lessons on health, safety and welfare
- Follow safe working procedures personally
- Ensure protective clothing, guards, special safe working procedures etc. are used when necessary
- Make recommendations on health and safety matters

Technical Staff

Technical staff are responsible for ensuring health and safety within the practical areas in the Departments in which they work, including all ICT areas.

In particular, Technicians are responsible for:

- Undertaking regular workplace inspections of their area to identify hazards and ensure good housekeeping.
- Undertaking regular equipment inspections, keeping equipment in good working order and keeping relevant inspection/maintenance records.
- Ensuring all hazardous substances are used, handled, transported and stored in accordance with the information outlined in COSHH assessments and other information sources (e.g. CLEAPSS).

Caretaker/Site Manager

The Caretaker/Site Manager is responsible for ensuring the health and safety of the site, in particular the Caretaker/Site Manager is responsible for:

- Ensuring that all fire exits are clear from obstruction and unlocked prior to the building being occupied
- Undertaking the weekly test of the fire alarm system
- Undertaking the weekly test of the emergency lighting system
- Undertaking the weekly test of the magnetic door release mechanisms
- Checking the hazard reporting book at least daily, rectifying those issues within

- their authority and notifying the Headteacher of any unresolved issues;
- Undertaking termly inspections of the communal areas of the School to identify hazards
- Liaising with lettees to ensure that they are aware of evacuation procedures and routes, hazard and accident reporting procedures
- Boiler room
- Boundary walls and fences
- Roof access
- The safety and physical condition of all classroom, meeting rooms, offices, corridors staff room, toilets etc
- To assist with recording Health and Safety checks
- COSHH consider whether the hazardous substance they are intending to use could be eliminated altogether or replaced by a safer alternative prior to considering other control measures;
- Suitable & sufficient COSHH assessments are completed for all the hazardous substances used on site;
- The Authority's COSHH Do's and Don'ts poster is displayed in all locations where hazardous substances are stored and/or used regularly

Asbestos Duty Holder

The Asbestos Duty Holder must ensure that they have written asbestos management systems in place to provide information to those that could be at risk of exposure to asbestos fibres and avoid such exposure, if possible.

The appointment of contractors or any other persons carrying out works will require comprehensive control systems in order to comply with the duty to supervise and monitor their activities.

Control and safety management systems must include the following:

- Ensuring that only appropriately accredited and competent contractors work on site and where work involves working with asbestos, the contractor must be licensed by the Health and Safety Executive;
- Contractors must be given access to any relevant information from the asbestos register and must be advised to assume that materials contain asbestos unless there is evidence to the contrary;
- Ensuring that relevant information is held on site in a secure location and warning notices are displayed on site if relevant;
- Ensuring that the Asbestos Information Poster is displayed at the reception point.
- Making sure that employees on the premises are fully aware that there are asbestos containing materials (ACM's) in the building (if applicable) and where it is located;
- Ensuring no works take place which could disturb asbestos containing materials without first consulting the asbestos register for the premises;
- Ensuring all contractors, and any other person undertaking work on the fabric of the building, sign the asbestos register confirming they had access to the information contained in the register and are carrying out the work in the full knowledge of the

possible potential risks;

- Advising the Borough Asbestos Management Team where known asbestos or asbestos containing materials have become damaged or where planned works are programmed.

It is recommended that the duty holder **always** obtain a signature from persons carrying out the work, confirming that they are appropriately trained for the works, which they will undertake. This is essential where works could affect asbestos containing material

Educational Visits Co-ordinator (EVC)

The EVC is responsible for ensuring that all trips and visits are approved in accordance with the Borough's Policy and that the visit leader completes a suitable and sufficient risk assessment.

Fire and Emergency Procedures

Teaching, LSA's, Office and all Staff

It is the duty of all members of all staff to be aware of the fire and emergency procedures.

Responsible for:

- Familiarising themselves with their areas of responsibility, the escape routes and any problem areas;
- On hearing the fire alarm they are responsible for:
 - Ensuring the safe evacuation of everyone in their area(s) of responsibility
 - Checking all rooms in their area(s) of responsibility; including toilets, rest rooms and store rooms; to ensure that everyone has safely left the building.
 - Where possible, closing windows and doors as each room is checked;
 - Ensuring that nobody re-enters the building until the Incident Control Officer has stated it is safe to do so;
- Ensuring they are available, after the evacuation, to attend a debrief meeting to discuss the evacuation, identify any problems and share information.
- Monitoring to ensure that fire routes and exits are kept clear at all times.

First Aiders

Most LSA's, Caretaker/Site Manager are First Aiders are responsible for:

- Taking charge when someone is injured or falls ill
- Administering first aid in the event of an injury
- Calling for an ambulance, if required
- Looking after first aid equipment and ensuring it is restocked
- Gloves must be worn at all times when dealing with injured children
- All body fluids must be cleared immediately by support staff if the caretaker is not on site
- Keeping up to date with first aid training and ensuring they attend refresher training prior to the expiry of their first aid certificate. If a child is ill, a decision is made by a

member of the SLT team as to whether the child is fit to remain in school. If an ambulance is required the emergency 999 services should be used. On some occasions there may be a need to transport a member of staff or pupil to a casualty department without the ambulance but it should be noted that this should always be on a voluntary basis.

Pupils with Medical Needs

- Pupils with severe medical needs have a Care Plan that shows details of their medication and what activities they can and cannot engage in.
- Epi- pens are kept in the main office and classroom , labelled and in a secure box
- Children with prescribed conditions have their photo taken and care plans kept in the class white medical folder a copy is in the staffroom
- Staff receive regular training on epi- pen use and when other needs arise.

Physical Restraint of Pupils

- When restraining pupils staff are expected to apply reasonable force to ensure the health and safety of the pupil. In the event of restraining, the adult must shout "I am restraining you for your own health and safety". Where ever possible two adults should be present.

All Employees

Although prime responsibility for health and safety rests with the Borough and senior managers, all employees also have responsibilities. Employees are required to:

- Take reasonable care for their own health, safety and welfare and that of other persons affected by their acts or omissions
- Co-operate with their employer, so far as is necessary, to enable it to meet its responsibilities for health, safety and welfare
- Be aware of, and follow, health and safety guidelines
- Use work equipment provided correctly, in accordance with instructions and training;
- Inform their line manager of any work situations that represent a serious and immediate danger to health, safety.

In addition, female workers must notify their employer as soon as possible after they become pregnant in order that a risk assessment can be carried out to ensure the safety of the mother and unborn child.

General Arrangements for Implementing the Health, Safety and Welfare Policy Accident/Incident Reporting & Investigation

An accident is an unplanned event that results in injury or damage.

A near miss is an unplanned event that does not result in injury or damage.

All incidents should be reported to the appropriate manager and where required, the council's internal report form completed. A copy of this form should be sent to:

Health and Safety Function,
Lynton House, Floor 7
Ilford
IG1 1NY
H&Saccidentreporting@redbridge.gov.uk

Due to potential additional reporting requirements, please ensure that these forms are completed as soon as possible, and no later than 5 days.

Blank copies of the [Accident/incident report forms](#) are located in the school office.

The "[Blue Dot](#)" '[Reporting of Accidents & Incidents Wall Chart](#)', which briefly outlines the reporting requirements is displayed

- School office
- Staff room

Please note, the report form has a section 'action taken to prevent a recurrence'. All accidents are required to be investigated, and this section should be completed to reflect any action taken. Where no further action is required this should be entered into the form to demonstrate that management have considered this.

Where appropriate, accidents may also be investigated by the Health and Safety Function, LBR Insurance or the Health and Safety Executive.

Incidents which fall within the requirements of the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR) 1995 e.g. major injuries, accidents resulting in employees being absent from work for more than 3 days, or members of the public going to hospital from the scene of the accident etc will be reported to the Health and Safety Executive by the Health and Safety Function.

Further information on accident reporting and investigation can be obtained from the Health & Safety Manual CD 2011/12, the following websites:

<http://insidelbr/files/publications/4405.pdf>

<http://www.hse.gov.uk/pubns/edis1.pdf> or by calling the Health and Safety Function, at Lynton House, 02087083591

Asbestos

The Control of Asbestos Regulations 2006 places a duty on the "Asbestos Duty Holder" to manage any asbestos or asbestos containing materials located within the premises.

The Asbestos Duty Holder is generally the person who has (or persons who have) clear responsibility for the maintenance or repair of the premises.

The [Asbestos Duty Holder\(s\)](#) SBM/ HT

Each establishment has an Asbestos Register that identifies whether asbestos or asbestos containing materials are present within the premises, the location, the type of asbestos and its condition.

The Asbestos Register is located in SBM Office

In addition, there is an Asbestos Information Poster, which outlines the processes to be followed prior to work commencing on the premises; and also, what to do if any suspected asbestos material is damaged in any way. This poster should be displayed in an area occupied by personnel who have cause to access the asbestos log and/or deal with contractors, e.g. caretaker's office or main school office.

The [Asbestos Information Poster](#) is displayed in Front Office Area

It is the responsibility of the Asbestos Duty Holder to ensure that **anyone**, contractors or staff, who intend to work on the fabric of the building, read the Asbestos Information poster and consult the Asbestos Register prior to commencing work in order to ensure where they will be working is free from asbestos and asbestos containing materials, and that they sign the register to demonstrate they have consulted and understood it.

If, during the course of the task, further work needs to be carried out at a different location, the Asbestos Register must be consulted again and be resigned and dated.

Please note that the Asbestos Register was compiled following a Type 2 asbestos survey. Any major intrusive work will require a Type 3 asbestos survey to be carried out prior to the work commencing.

Any queries regarding asbestos in the premises, or how to arrange for a Type 3 survey, should be referred to the Asbestos Duty Holder, who will consult with the Council's Asbestos Team.

Asbestos Awareness training is available for Asbestos Duty Holders. This can be booked via the LBR intranet using the [on-line booking form](#). Once completed a copy of the training certificate should be kept in the establishment health & safety training folder.

Communicable Diseases

Due to the age and number of children present in educational establishments it is not uncommon for them to contract a variety of communicable diseases.

North East and North Central London Health Protection Unit have produced [Guidance on 'Infection Control and Communicable Diseases in Schools, Colleges and Nurseries'](#).

This document provides guidance on the prevention and spread of communicable diseases, and promotes a co-ordinated approach to the management of communicable

disease in schools, colleges and nurseries.

The exclusion periods for common infectious diseases and skin infections are also included in this document.

A copy of the exclusion period chart is located
First Aid room at the front of the school.

Consultation with Employees

Under the Health and Safety (Consultation with Employees) Regulations 1996 and the Safety Representatives and Safety Committees Regulations 1977 an employer has a duty to consult with employees on matters of health and safety.

Employees will be consulted on the following:

- The introduction of any measure which may substantially affect their health and safety at work;
- Arrangements for getting competent people to help them comply with health and safety laws;
- information on risks arising from their work, measures to reduce or get rid of those risks and what employees should do if they are exposed to a risk;
- The planning and organisation of health and safety training and the health and safety consequences of introducing new technology;

This establishment will consult with staff in the following ways

- Staff meeting, weekly
- Performance management, annual
- Return to work interviews, as and when required.

Control of Contractors

SS Peter & Paul's recognises its' responsibilities in relation to the use of contractors.

In any client/contractor relationship, both parties will have duties under health and safety law. Similarly, if the contractor employs sub-contractors, to carry out some or all of the work, all parties will have some health and safety responsibilities.

(The client in these circumstances is the head teacher and Governing Body or when the school has bought into SMADS, the local authority)

Clients need to satisfy themselves that contractors are competent (i.e. they have sufficient skills and knowledge) to do the job safely and without risks to health and safety. The degree of competence required will depend on the work to be done.

The client and contractor are required to agree the risk assessment for the contracted work and the preventative and protective steps that will apply when work is in progress. Consideration should be given to those risks from each other's work that could affect the health and safety of the workforce or anyone else.

Clients are required to manage and supervise the work of the contractors. The more impact the contractor's work could have on the health and safety of anyone likely to be affected, the greater the management and supervisory responsibilities of the client. Clients therefore need sufficient knowledge and expertise to manage and supervise the contracted work.

The Establishment will ensure that contractors visiting their premises do not pose a risk to their own health and safety or that of others present within the establishment.

The School Business Manager (*insert job title*) is responsible for ensuring that all contractors on site are aware of the asbestos log, fire and emergency evacuation procedures.

The SBM/ HT should inform all contractors of any known hazards that might affect them whilst at work. Contractors in turn should notify the Head of Establishment of any hazards arising from their activities, which may affect the occupants of the establishment.

The Catering staff are responsible for the safety of the kitchen & cleaning areas and must notify the Head teacher of any hazards.

All contractors should report to the establishment office on arrival.

Further information is available from the HSE document "Use of Contractors - a joint responsibility", HSE INDG 368

Display Screen Equipment

The Display Screen Equipment (DSE) Regulations 1992 require employers to minimise the risks to employees who habitually use display screen equipment as a significant part of their normal work. "Users "are invited to request eye screening from the Health and Safety Coordinator.

Other people, who use DSE only occasionally, are not covered by the requirements of the Regulations; however, employers still have general duties under other health and safety at work legislation.

Electricity at Work

The Electricity at Work Regulations 1989 set out specific requirements on electrical safety. These Regulations place a duty on employers to ensure that electrical systems are designed, constructed, used and maintained so as to prevent danger. 'Systems' includes all apparatus as well as the mains supply.

All portable electrical appliances should be visually checked before use. In particular,

attention should be paid to the condition of power cables and of their terminations, as these are often damaged, wrenched and jerked, which may loosen their connections.

All portable electrical equipment such as drills, irons, kettles etc should be subject to a detailed inspection and test by a competent person at least every 12 months. A written record of the tests, in the form of a logbook or register, should be maintained and be available for examination and the equipment itself should be marked with some form of identification and the date of the most recent test.

Annual portable electrical equipment is carried out by the recommended Borough supplier adhering to Best Value.

Fixed electrical installations should be inspected by a competent person at least every five years.

Staff and pupils may not bring their own personal electrical appliances into the Establishment/ unless they have had their earth-bond and insulation checked by the Boroughs recommended company.

Educational Visits

The Health and Safety at Work Act 1974 places a duty on employers to ensure the health, safety and welfare of employees and others (pupils) who may be affected by the work activities. This includes all educational visits, whether local, national or international.

In order to safely manage educational visits *the* Establishment follows the guidance provided in the LBR Children's Services document "Requirements for Educational Visits" using the online educational visits software package "Evolve" as applicable.

In accordance with this guidance this Establishment has appointed an Educational Visits Coordinator, and developed a school Educational Visits Policy based on the DFES and Children's Services Guidance

No educational visit will be allowed to proceed unless an educational visits risk assessment has been completed and the visit has the approval of the Head Teacher and (for adventurous activities, residential visits and international visits) the local authority.

3.11 Fire Safety

The Regulatory Reform (Fire Safety) Order 2005 places duty on employers to conduct a fire risk assessment and take reasonable steps to reduce the risk from fire.

Each establishment should have a "Responsible Person" who is ultimately responsible for fire safety and who may have other competent people to assist them to carry out their duties. These include undertaking a fire risk assessment, Emergency Evacuation Plan, and Personal Emergency Evacuation Plans (PEEPS) for staff or pupils with impaired mobility

The competent people for fire safety are:

- Calling the Fire Brigade is the responsibility of SBM, PA/OM
- Liaising with the fire brigade is the responsibility of HT/SBM
- Collecting emergency evacuation report, staff book and visitors book is the responsibility of PSA
- Fire warden Caretaker
- Organising fire drills is the responsibility of the HT
- Organising fire safety training is the responsibility of SBM
- Quarterly inspections of the fire alarm, emergency lighting, fire door magnetic holders are carried out by the Caretaker.
- Weekly checks of the fire alarm call points, emergency lighting and fire door magnetic holders are carried out by the Caretaker
- Annual inspection of the fire extinguisher and fire fighting equipment is carried out by Boroughs preferred contractor.

A Fire Risk Assessment Package is available to assist with undertaking a fire risk assessment.

Blue Dot 'Fire instruction notices' are displayed throughout the premises advising the actions to be taken on discovering a fire/on hearing the alarm.

SBM is responsible for ensuring the "Blue Dot Fire Instruction" notices are appropriately display.

[Fire Instruction Notice PS 1234](#) is displayed near all fire alarm call points.

[Fire Instruction Notice PS 0699](#) is displayed in all communal areas and offices.

premises and any comments are reported to the Governing Body.

All staff have a duty to be aware of the fire and emergency procedures, to ensure that all escape routes and fire exits are kept clear, and to report any defective or damaged fire fighting equipment, such as fire extinguishers.

Any fire that occurs within the premises, however minor, must be reported to the Head Teacher and to HR's Health & Safety Function using the LBR incident report form.

Click to go back to main index

First Aid

The Health and Safety (First-Aid) Regulations 1981 set out a duty of care on employers to provide adequate and appropriate first aid provision for employees.

The Health and Safety (First-Aid) Regulations 1981 do not oblige employers to provide first aid for members of the public. However, LBR Service areas that provide a service for others, including schools, should include the public, pupils and others on their premises when making their assessment of first aid needs.

A first aid assessment of needs has been undertaken by the Headteacher and SBM

It is usually necessary to ensure that there is at least one first aider available at all times, taking into consideration staff absence, holidays, lunch breaks, before and after hours, etc

Staff nominated to administer first aid will attend one of the following courses: first aid at work, emergency first aid, and paediatric first aid. *(Which ever is deemed most appropriate).*

The nominated persons with first aid responsibilities for this Establishment are:

Name	Qualification e.g. FA, EFA, PFA
Edna Soares	First Aid in the workplace
Angela Courtney	"
Susan Mullin	+ Paediatric
Liz Vidler	"
Hafsa Dakri	"
Krystina Colasanto	"
Vasanthi Varma	"
Julie Briggs	"
Kay MacDonald	"
Amy Bansel	"
Esther Olusesan	First Aid Appointed Person "
Jyoti Sharma	"
Denise Shaw	"
Amarjit Kelly	"
Emma Ramma	"
Mathi Mingi	"
Maxine Clarke-Lawal	"
Jane Hull	"
Gilda Sutton	+ Paediatric
Denise Shaw	"

The First Aid Boxes for this Establishment are sited in the following locations:

- First Aid Room
- Infant First Aid Area
- Nursery
- Every Class has a First Aid box

The person responsible for maintaining the First Aid boxes is: LSA's

Any accidents requiring first aid must be reported using the accident reporting procedure.

Further information can be found in The Department for Children, Schools and Families (DCFS) booklet [Guidance on First Aid for Schools](#)

Legionella

The Control of Substances Hazardous to Health Regulations 2002 relates to the risk from hazardous microorganisms, including Legionella. Under these Regulations, risk assessments and the adoption of appropriate control measures are required to be put in place.

The school will ensure that an adequate risk assessment of the water systems in its buildings is carried out; and will identify and assess the risk of exposure to Legionella bacteria from work activities and water systems on the premises and any necessary precautionary measures.

As part of the SMADS contract, the risk assessment has been undertaken by the LBR Legionella Team.

All water systems are subject to monitoring, inspection and testing at regular intervals by a competent person. The written records of the risk assessments, monitoring, inspection and test, in the form of logbook or register, should be maintained and should be retained for at least 5 years.

Regular monitoring, inspection and testing will be carried out by HSL currently
Records are maintained and kept in the SBM office.

Further information can be found on HSE website www.hse.gov.uk

[Legionnaires' disease - a guide for employers](#)

Lifting Operations and Lifting Equipment (LOLER)

LOLER 98 applies to any item of lifting equipment including new or existing equipment, second-hand or leased equipment and the accessories used for lifting.

- Lifting equipment is work equipment designed and used for lifting and lowering loads; such as cranes, lifts, and hoist; and includes its attachments used for anchoring, fixing or supporting it.

- Accessories for lifting are work equipment for attaching loads to machinery for lifting, such as chains, ropes, slings, hooks, shackles and eyebolts.
- Load includes a person.

Generally, the Regulations require that lifting equipment provided for use at work is:

- Strong and stable enough for the particular use and marked to indicate safe working loads;
- Positioned and installed to minimise any risks;
- Used safely, i.e. the work is planned, organized and performed by competent people; and
- Subject to ongoing thorough examination and, where appropriate, inspection by competent people.

This Establishment requires that all lifting equipment be clearly marked to indicate the safe working load. Where the safe working load is affected by the configuration of the equipment, then the equipment must be marked to indicate its safe working load in each configuration. Accessories for lifting, such as slings, must also be marked with their safe working load.

It is the responsibility of Roger Allen Caretaker.
Equipment and accessories are marked with the safe working load.

This Establishment also requires that all lifting operations are properly planned by a competent person, appropriately supervised and carried out safely. This includes undertaking either a generic or specific risk assessment of the operation, as appropriate.

Staff must not use lifting equipment unless they have received appropriate training and must use the equipment in an appropriate manner, according to the information received in training and from their line manager.

It is the responsibility of SBM to arrange staff training and refresher training as appropriate.

This Establishment requires that all lifting equipment undergoes a thorough examination by a competent person before it is first put into use, unless the equipment has an EC declaration of conformity made not more than 12 months before the equipment is put into service or it is accompanied by physical evidence of its last thorough examination.

Ongoing thorough examination must also be undertaken to ensure that lifting equipment remains safe for use. In the case of lifting equipment for the lifting of persons or an accessory, a thorough examination is required at least every 6 months, for other lifting equipment a thorough examination is required at least every 12 months.

Lone Working

The Health and Safety at Work Act 1974 places a duty on employers to ensure the health,

safety and welfare of employees. The Management of Health and Safety at Work Regulations 1999 require employers to make a suitable and sufficient assessment of the risks to health and safety of employees to which they are exposed whilst at work. This will include the risks to staff from lone working.

Lone workers have been defined by the HSE as ‘those who work by themselves without close or direct supervision’. Lone workers are found in a wide range of situations, and can be divided into those who work at fixed establishments (where only one person is on site, where people work separately from others, or where people are working out of normal working hours), and those who are mobile workers, working away from their main working base.

This Establishment will ensure that all lone working activities are identified, and the risks from such lone working activities are assessed and control measures identified and implemented to minimize the risk to the health and safety of staff.

A [Lone Working Flowchart](#) and a [Lone Working Risk Assessment Checklist](#) are available to assist with this.

It is the responsibility of the HT and SBM to identify all lone working activities within the school and ensure that a suitable risk assessment is undertaken for each.

The responsibility for undertaking lone working risk assessments and ensuring the outcomes are communicated to the lone workers lies with HT and SBM

All staff that work alone must be competent to carry out the activities they are engaged in, must have received sufficient information to enable them work alone safely and to be able to summon help and assistance if required.

It is the responsibility of the school to ensure lone workers have received adequate lone working information and training, and for keeping training/briefing records.

It is the responsibility of all staff to follow the defined lone working procedures and safe systems of work, and to report immediately any problems or concerns to their line manager.

Further guidance is available in the HSE document [Working alone in Safety \(INDG73\)](#).

[Click to go back to main index](#)

3.21 Manual Handling

The Manual Handling Operations Regulations 1992 apply to a wide range of manual handling activities, including lifting, lowering, pushing, pulling or carrying. These regulations place specific duties on employers and employees.

Employers are required to:

Avoid the need for manual handling, so far as is reasonably practicable;

Assess the risk of injury from any hazardous manual handling that can't be avoided; and

Reduce the risk of injury from hazardous manual handling, so far as is reasonably practicable.

Senior staff and support staff have been trained and will be responsible for carrying out risk assessments for all manual handling activities, which constitute a significant risk of injury to staff and to update and review as necessary.

Employees are required to:

- Follow appropriate systems of work laid down for their safety;
- Make proper use of equipment provided for their safety;
- Co-operate with their employer on health and safety matters;
- Inform the employer if they identify hazardous handling activities;
- Take care to ensure that their activities do not put others at risk.

All staff members involved in manual handling will be given suitable and sufficient information, instruction, training and supervision. Training will be recorded, monitored and reviewed.

LBR Health and Safety Function provides 'Manual handling for employees' and 'manual handling for managers' training courses.

Training records will be maintained by SBM and OM and held in the School Office.

If a member of staff develops any medical/physical condition, the responsible person should be made aware immediately. A specific risk assessment must be carried out to cover the activities/tasks and control measures should be taken accordingly.

Further advice can be found in the Health & Safety Manual CD 2011/12 and the following document available on the HSE website www.hse.gov.uk

[INDG 143- Getting to grips with Manual Handling](#)

[Click to go back to main index](#)

3.22 Medicines

In general, medicines must not be brought into school. However if a pupil has a medical

condition that requires regular medication during the school day or medicine in the event of an emergency, then arrangements for administration must be made between the Establishment and the pupil's parent/guardian. These arrangements must be in the form of an agreed Care Plan.

A list of pupils with medical conditions and their care plans can be found in Class White medical files.

Prescribed medicines are stored in the class sealed first aid box with parents instruction form. The office stores a second epi pens in a sealed container.

Protocols for pupils with serious medical conditions should be displayed in the prominent locations around the Establishment, e.g. staffroom, medical room and relevant classrooms. The protocols and care plans should be clearly marked with the pupil's name and an up to date photograph.

Registers should be clearly marked to alert supply teachers of any pupils with medical needs.

All staff involved in the administering of medicines should be appropriately trained, e.g. epi-pen training.

Appropriate records in relation to the administration of medicines should be maintained at all times. A Medication Administration Permission Form must be completed and signed by the parent or guardian, and a Medication Administration Record Sheet completed each time medicines are administered.

More detailed information can be found in the Department for Children, Schools and Families document Managing Medicines in Schools and Early Years Settings (DFES 2005) .

[Click to go back to main index](#)

3.23 Minibuses

The Provision and Use of Work Equipment Regulations 1998 set out specific requirements for the selection, maintenance and inspection of work equipment, and the provision of appropriate instruction, information and training, to ensure its safe use. These Regulations cover minibuses that the school either owns, or hires.

Each minibus must have a Section 19 Permit disc displayed on the windscreen to enable its use without having to comply with the full passenger carrying vehicle entitlement (PCV) operator licensing requirements and without the need for their drivers to have PCV entitlement.

It is the responsibility of N/A to ensure that a Section 19 Permit is displayed on the minibus windscreen at all times.

Minibus drivers must be over the age of 21 and hold a LBR Minibus Permit.

A list of qualified minibus drivers is held in N/A..... (Insert location)

All minibus drivers must complete the vehicle log each time the minibus is used, and carry out a pre-use check.

The minibus vehicle log is located in N/A..... (Insert location)

All vehicles must have:

- An MOT if over 1 year old (13 or more passenger seats) 3 years old (12 or less passenger seats);
- A valid certificate of insurance;
- A fire extinguisher complying with BS 5423;
- A first aid kit.

It is the responsibility of SBM and CT/Site Manager to ensure all the documents are up to date, the fire extinguisher is inspected annually, and the first aid kit is kept fully stocked by the LSA's.

The minibus must, as a minimum, be subject to the following:

- Daily/pre-use checks by the driver (use of the Minibus Daily Inspection Record sheet will assist with this) ;
- Annual maintenance (including MOT);
- Two safety checks between annual maintenances (e.g. Autumn Term – Annual Maintenance, Spring Term – Safety Check, Summer Term – Safety Check).

The responsibility to ensure the maintenance checks are undertaken by a competent person lies with N/A

Further information can be found in Driving Section of this policy, the Driver's Handbook and in the Minibus section of the Health & Safety Manual CD.

[Click to go back to main index](#)

3.24 Monitoring – Audits & Inspections

In order to ensure health and safety arrangements are working and that risk control measures are effective and are being maintained, it is necessary to monitor health and safety performance. Monitoring also ensures that lessons are learnt from any incidents, accidents or causes of ill health.

This Establishment will carry out the following monitoring:

- Daily checks by the Caretaker in addition to detailed termly inspections of the school (these could be in conjunction with inspections by establishment safety

representatives). A written record of identified items must be kept;

- Routine equipment maintenance checks either carried out by staff of the establishment or by external contractors, as appropriate, including access equipment, fire extinguishers, fume and dust extraction systems, portable electrical appliances, PE equipment including climbing frames etc;
- Investigations of incidents, accidents, causes of ill health and complaints as appropriate to the circumstances;
- Reviewing accident statistics by governing body to identify causes of accidents; and
- Reviewing audit reports detailing the performance of the School's health & safety management system.

This Establishment will also carry out a formal inspection at least twice a year using the Establishment Workplace Inspection Checklist

Human Resources' Health and Safety Function will carry out a formal audit at this Establishment on a periodic basis.

Records of maintenance checks, inspections etc are located in:

Record Type	Location	Responsible Dept/Person
Accident records	Main Office	Who witnessed the accident

[Click to go back to main index](#)

3.25 New & Expectant Mothers

The Management of Health & Safety at Work Regulations 1999 place a duty on employers to undertake a suitable and sufficient assessment of the risks to the health and safety of their employees, to which they are exposed whilst at work in order to identify the measures that need to be taken to comply with health and safety legislation.

In addition, the Regulations identify two groups of workers; new and expectant mothers and young persons; for whom a specific risk assessment must be undertaken, or an existing risk assessment must be reviewed in order to identify any additional control measures that may need to be taken.

A “new or expectant mother” is taken to mean an employee who is pregnant; who has given birth within the previous six months; or who is breast-feeding.

When a member of staff notifies the Establishment in writing that she is any of the above, then a specific risk assessment must be carried out to cover the activities and tasks that person undertakes and any specific hazards that may be involved during the course of her work.

The main areas of concern for new and expectant mothers fall into three main categories of physical, biological and chemical.

Further advice can be found in the Health & Safety Manual CD, on the Intranet <http://insidelbr/files/publications/g668.pdf> and in the following documents available on the HSE website www.hse.gov.uk:

HSE 122 – New and Expectant Mothers at Work – An Employers Guide

INDG 373 – A Guide for New and Expectant Mothers who Work

[Click to go back to main index](#)

3.26 Noise at Work

The Control of Noise at Work Regulations 2005 are in place to ensure that worker’s hearing is protected from excessive noise at their place of work, which could cause them to lose their hearing and/or suffer from tinnitus.

It is the responsibility of the employer to assess and identify measures to eliminate or reduce risks from exposure to noise. Where the risks are low, the actions taken may be simple and inexpensive, but where the risks are high, they should be managed using a prioritised noise-control action plan.

As a general rule in this Establishment noise will be considered to be a hazard if:

- Staff have to raise their voices to carry out a normal conversation when about 2 m apart for at least part of the day
- Staff use noisy powered tools or machinery for more than half an hour each day
- Staff are exposed to high levels of noise for a significant part of their working day.

Where noise is perceived to be a risk to staff the Establishment will:

- Assess the risks to employees from noise at work;
- Take action to reduce the noise exposure that produces those risks;
- Provide employees with hearing protection if the noise exposure cannot be reduced enough by other methods;
- Make sure the legal limits on noise exposure are not exceeded;
- Provide employees with information, instruction, training and health surveillance

Some staff will be given particular consideration when making a noise risk assessment, for

example people with a pre-existing hearing condition, those with a family history of deafness (if known), pregnant women, children and young people.

Further information and advice about noise at work can be found on the HSE website <http://www.hse.gov.uk/>

[Click to go back to main index](#)

3.27 Personal Protective Equipment

The Personal Protective Equipment Regulations 1992 are designed to protect people from risks to their health.

The Personal Protective Equipment should be properly assessed before use to ensure it is suitable; be maintained and stored properly. Employees should be provided with instructions and training on how to use it safely and supervised to ensure the equipment is being used correctly.

PPE is defined in the Regulations as “all equipment (including clothing protection against the weather) which is intended to be worn or held by a person at work and which protects him against one or more risks to his health or safety”, e.g. safety helmets, gloves, eye protection, high-visibility clothing, safety footwear and safety harnesses.

All Personal Protective Equipment should be identified through risk assessment, but only if the control measures cannot be reduced by other means.

Further information on PPE is available in the Health & Safety Manual CD 2011/12.

[Click to go back to main index](#)

3.28 Playground / Play Equipment

The Health and Safety at Work Act 1974 requires employers to ensure, not only the health, safety and welfare of employees, but also others who may be affected (i.e. pupils).

The Provision of Work Equipment Regulations 1998 requires all work equipment to be suitable for purpose, maintained in a safe working order, and regularly inspected to ensure it remains so. Although playground equipment would not strictly be regarded as work equipment, this school recognises that it has a duty of care to all pupils and this includes ensuring the equipment provided for their use is suitable, maintained in a safe working order, and regularly inspected to ensure it remains so.

Accordingly, the playground and all playground equipment is visually checked on a daily basis and a termly/6 monthly inspection (*delete as applicable*) is also undertaken. These checks will be recorded and signed by the person responsible for undertaking them.

The responsible person for maintaining the playground and playground equipment is the Caretaker/Site Manager

Records of playground and playground inspections are located in Caretakers/Site Manager Office

[Click to go back to main index](#)

3.29 Ponds

The Management of Health & Safety at Work Regulations 1999 require that employers assess the risks to the health and safety of their employees, and others who may be affected by their acts or omissions.

The risk assessment should be undertaken by a competent person and identify the significant risks and the control measures to reduce those risks to an acceptable level. The assessment should be regularly reviewed.

The person responsible for undertaking, and regularly reviewing a risk assessment of the pond isN/A.....(insert name)

Further information on ponds and the control measures that should be considered are located in the Health & Safety Manual CD 2011/12.

[Click to go back to main index](#)

3.30 Risk Assessment

The Management of Health and Safety at Work Regulations 1999 require employers to make a suitable and sufficient assessment of the risks to health and safety of employees to which they are exposed whilst at work, and any others who may be affected by their undertaking.

The risk assessment must be recorded, and reviewed if it is no longer valid, if there have been significant changes in the matters to which it relates, or annually, whichever is the sooner.

A [Risk Assessment Flowchart](#) is available to assist with risk assessment, and a [Blank Risk Assessment Proforma](#) is available to record risk assessments.

The responsibility for carrying out risk assessments lies with the following staff
All Staff

Copies of current risk assessments are located
SBM office

Employees' have a duty to cooperate with their employer when they are conducting risk assessments and for cooperating with them in implementing any remedial action or control measures to reduce the risk.

Staff involvement and consultation will be ensured during the risk assessment process.

Note: the Regulations stipulate that a specific risk assessment must be undertaken for New and Expectant Mothers, Young Persons (under 18 years of age). Statutory risk assessments are also required for COSHH, DSE, Personal Protective Equipment & Manual Handling.

[Click to go back to main index](#)

3.31 Safety, Signs and Signals

The Health and Safety (Safety Signs and Signals) Regulations 1996 places duty on employers to use and maintain appropriate health and safety signs, in order to make persons aware of risks, where the risk to health and safety cannot be avoided or adequately controlled by other means.

This Establishment will ensure that where the requirement for the posting of a safety sign has been identified, such signs are posted at suitable locations, conform to the relevant standards and are adequately maintained.

It is the responsibility of SBM and direct staff FA/CA to ensure that health and safety signs are displayed and adequately maintained.

Staff will be provided with appropriate instruction, information and training in the use and understanding of safety signs, as applicable.

Staff should report missing or damaged safety signs to the Caretaker/Health & Safety Coordinator/Head Teacher and record in the Log book located in the main school office..

Further information on safety signs and signals can be found in the Health & Safety Manual CD 2011/12 and on HSE website www.hse.gov.uk:

HSE leaflet "[Signpost to The Health and Safety \(Safety Signs and Signals\) Regulations 1996](#)

[Why do we need these Regulations?"](#)

HSE leaflet "[Read the Label – How to find out if chemicals are dangerous"](#)

[Click to go back to main index](#)

3.32 Security

Specific responsibility for school security is not set down in legislation. However, school security is related to health and safety, therefore whoever has responsibility for health and safety should consider what security measures are necessary to ensure, as far as reasonably

practicable, the safety of the staff and pupils.

The health and safety co-ordinator within the school may assume the responsibilities for school security. Alternatively schools may wish to appoint a school security co-ordinator who will develop a knowledge and understanding of security issues within the premises.

HT, SBM and CT/SM have responsibility for school security issues.

The two principal aspects of security in an education setting are the security of school premises both during school hours and out of school hours and secondly the personal safety of staff and pupils.

There are a number of methods for enhancing security. Knowledge of previous incidents and seeking advice from relevant internal and external agencies will be considered when determining the most appropriate security measures.

Examples of security measures:

- Controlled entry system at gates and main entrance.
- Fencing around perimeter
- Intruder alarm system
- Visitors signing book and badge system
- Procedures for dealing with trespassers
- Appropriate recording procedures for incidents relating to security

Internal/ External Agencies:

- LBR – health and safety advisors, property services etc
- Police – in particular, Crime Prevention and School Officers
- Fire and Rescue Services – in particular, Fire Safety Officers
- www.teachernet.gov.uk/wholeschool/healthandsafety/schoolsecurity

[Click to go back to main index](#)

3.33 Smoking

On July 1st 2007, The Smokefree Regulations 2006 were introduced in England to make virtually all enclosed public places and workplaces in England smoke free.

As a result this establishment is a strictly no smoking establishment.

The Regulations require the displaying of no-smoking signs in all smokefree premises and vehicles.

No-smoking signs, which meet the requirements of the law, are displayed in the following locations:

School Notice Boards to the front of the school.

Further information can be found on the [Smokefree England](#) website and in the [LBR Smoking Policy](#).

[Click to go back to main index](#)

3.34 Slips and Trips

The Health & Safety at Work Act 1974 requires employers to ensure the health, safety and welfare of employees and others who may be affected. The Act also requires the provision of a place of work that is maintained in a safe condition, and a means of access and egress that is safe and without risk.

This establishment recognises that good housekeeping is essential to preventing slip and trip accidents. Accordingly the following measures will be taken to ensure good housekeeping:

Formal recorded workplace inspections will be undertaken by SBM monthly basis
Informal workplace inspections will be undertaken by SBM on termly basis
Informal daily checks of the communal areas of the school will be undertaken by all staff as part of daily duties.

Where action is identified during workplace inspections but cannot be implemented immediately, interim measures will be taken and an action plan produced to outline when the action will be implemented, who will be responsible for ensuring it is implemented and the estimated completion date.

[Click to go back to main index](#)

3.35 Swimming Pool

Whilst there are no specific health and safety regulations governing swimming pools, under the Health and Safety at Work Act 1974 and the Management of Health and Safety at Work Regulations 1999, pool owners and managers (including head teachers governors) have a responsibility to manage health and safety in swimming pools.

A copy of the Pool Safety Operating Procedures (PSOPs) should be written, specific to the establishment's pool and consist of Normal Operating Procedures (NOPs) and an Emergency Action Plan (EAP).

It is the responsibility ofN/A..... (Insert name/job title) to maintain the PSOPs and ensure relevant staff are advised of the contents.
A copy of the PSOPs are held in.
..... (Insert location)

The operation, maintenance and use of swimming pool plant and water treatment processes should only be carried out if the person in charge of the operation has been adequately trained and has the requisite knowledge and experience of such operations.

A copy of the "Emergency procedures in the event of the generation of chlorine gas" poster should be displayed outside all areas where the pool chemicals are stored, and in the Establishment Office. An A4 copy of the two individual parts of the poster (if A3 printing is unavailable) can be found in the Children's Services Manual Disc 2011/12.

Further information on managing health and safety in swimming pools is available from the Health & Safety Manual CD 2011/12 and from the HSE guidance document Managing Health and Safety in Swimming Pools, HSG 179, HSE-Books 2003.

[Click to go back to main index](#)

3.36 Traffic Management

The Workplace (Health, Safety and Welfare) Regulations 1992 require that workplaces are organised to ensure that vehicles and pedestrians can move around safely. This includes organisation of traffic routes to enable pedestrians and vehicles to circulate safely.

A risk assessment of traffic management within the school grounds and immediate vicinity should be carried out.

The following key issues were considered when carrying out the traffic management risk assessment:

- By law, pedestrians or vehicles must be able to use a traffic route without causing danger to the health or safety of people working near it;
- Roadways and footpaths should be separate whenever possible;
- Protection for people who work near vehicle routes;
- By law, traffic routes must also keep vehicle routes far enough away from doors or gates that pedestrians use, or from pedestrian routes that lead on to them, so the safety of pedestrians is not threatened;
- As far as possible, parked vehicles are kept out of the flow of traffic and people;
- Drivers are notified of designated parking areas on entering the site;
- Parking areas are demarcated, which reduces manoeuvring and reversing for large vehicles;
- As far as possible, avoid reversing. When this is unavoidable make sure effective systems are in place to control it;
- As far as possible schedule vehicle movements to prevent overcrowding, of site and surrounding roads;
- By law, traffic routes must also be suitably indicated where necessary for reasons of

- health or safety;
- Install clear signs to tell drivers and pedestrians about the routes they should use;
- Where signposts are used, they should be constructed to Highway Code Standards; and
- Make sure the signs are kept clean and visible.

Further information on workplace transport is available from www.hse.gov.uk/workplacetransport

Click to go back to main index

3.37 Violence/Personal Safety of Staff

The Health and Safety at Work Act 1974 places a legal duty on employers to ensure the health, safety and welfare of employees at work.

The Management of Health and Safety at Work Regulations 1999 places duty on employer to consider and assess the risks to employees. This would include the risk of reasonably foreseeable violence.

Violence may be defined as any incident in which a person is abused, threatened or assaulted, either physically or verbally, in circumstances relating to their work.

Physical or verbal abuse of staff within this school will not be tolerated and the School fully endorses the LBR Personal Safety of Staff Policy and procedures. Consequently a risk assessment will be undertaken to identify and minimise the risk to staff from potentially violent persons or situations.

HT is responsible for undertaking a risk assessment to cover potential violence at work.

It is the responsibility of the HT to ensure that staff are provided with appropriate information, instruction and training. This is carried out at staff meetings.

All acts of physical or verbal abuse must be reported using the appropriate report procedures. See the relevant section of this policy for further information.

As an employer the school will support any employee who is assaulted or threatened in the course of their duties.

In addition, there is an Employee Assistance Programme available to all staff, which offers a 24-hour confidential helpline.

[Click to go back to main index](#)

3.38 Waste including Waste Electrical & Electronic Equipment (WEEE) Regulations

All waste generated by this Establishment will be disposed of responsibly.

General waste will be disposed of in the wheelie bins provided by the Borough.

Any hazardous waste will be disposed of in accordance with the Hazardous Waste Regulations 2005. This may be via LBR facilities or through a specialist licensed contractor.

Any waste being stored on site must be stored in such a way so as not to pose a risk to staff or pupils.

Waste is considered 'hazardous' under environmental legislation when it contains substances or has properties that might make it harmful to human health or the environment. Examples of hazardous waste include, fluorescent tubes, car batteries, insulating oils.

Any electrical or electronic waste must be disposed of in accordance with the Waste Electrical and Electronic Equipment (WEEE) Regulations.

Any third party taking either hazardous waste or WEEE must be a registered waste carrier. The waste must be accompanied by a waste transfer note or hazardous waste consignment note (as appropriate) and taken to a suitable facility.

A record of all waste documentation (transfer notes, copies of licences) must be kept by the Establishment.

Waste disposal from the Establishment will be organised by secure shredding company recommend by LBR.

Details of waste collection contracts:

Type of Waste Material	Frequency of Collection	Name of Collector	Contact details
Clinical waste	As required	LBR	Cleansing & Trade 0208 798 5113
Electrical equipment	As required	LBR	0208708 8888

Members of staff must not take waste in their own private vehicles or in any LBR vehicle unless they are a registered waste carrier (i.e. it is no longer possible to take waste directly

to a municipal refuse site).

Further information on the implication of the WEEE Regulations can be found in the Environment Agency document ["New rules for the disposal of electrical and electronic equipment"](#).

[Click to go back to main index](#)

3.39 Work Equipment

The Provision and Use of Work Equipment Regulations (PUWER) 1998 apply to all types of work equipment. The Regulations generally apply to any equipment that is used by an employee at work, for example hammers, knives, ladders, drilling machines, circular saws, photocopiers, lifting equipment (including lifts) and motor vehicles.

In general terms the Regulations require that equipment provided for use at work be:

- Suitable for the intended use;
- Safe for use;
- Maintained in a safe condition;
- Inspected;
- Used only by people who have received adequate information instruction and training; and
- Accompanied by suitable safety measures, e.g. guards, markings, warnings

In addition to PUWER 1998, the Management of Health and Safety at Work Regulations 1999 require employers to carry out suitable and sufficient risk assessment of the risks to which employees are exposed to at work including work equipment.

The Establishment will ensure that risk assessments are in place for specific pieces of equipment and effective measures taken to control the hazards associated with the use of equipment.

This Establishment requires all employees and students who use equipment to undertake pre-use inspections to identify any obvious defects (e.g. damaged casings, exposed wiring, etc.). All defects to work equipment must be reported and the equipment taken out of use until the defect is rectified.

Defects should be reported in the school Log book located in the school office.

All the equipment provided must only be used for its intended purpose.

Staff must not use work equipment unless they have received appropriate training and must use the equipment in an appropriate manner, according to the information received in training and instructions from their line manager. Students using the work equipment must be supervised at all times.

It is the responsibility of the HT/DH to arrange staff training, and to ensure that records of staff training are maintained.

All work equipment, where the failure of said item could result in a significant risk of injury, is to be subject to at least an annual maintenance/inspection by a competent person/organization. Where legislation imposes specific duties to undertake inspections at set frequencies these will be carried out in accordance with the Regulations. The written records of the inspection and maintenance, should be maintained and be available for examination.

Annual inspection and maintenance will be carried out by LBR recommend contractors this changes as contracts are awarded and records are maintained by SBM and held in the office.

This Establishment only permits designated staff to undertake modifications to equipment. The Health & Safety Co-ordinator holds a list of designated staff and the limits of their authority to undertake such work.

Staff and pupils may not bring their own personal electrical appliances into the Establishment/ unless they have had their earth-bond and insulation checked by a competent person (*delete as applicable*).

The Health & Safety Co-ordinator can advise on how to have equipment checked.

When work equipment has reached the end of its working life or is no longer required it must be written-off in the asset register and then disposed of safely. Under no circumstances may equipment be sold or passed-on to a third party.

[Click to go back to main index](#)

3.40 Work Experience and Young Persons

Students on work placements/experience are regarded in health and safety law as employees and therefore must be provided with the same health, safety and welfare protection given to other employees.

Work experience may be defined as a placement on an employer's premises in which a student carries out a range of tasks or duties, more or less as an employee, but with the emphasis on the learning aspects of the experience

Students who are under the age of 18, taking part in work experience/ placements, are considered Young Persons under health and safety law. The Management of Health and Safety at Work Regulations 1999 require employers to specifically take account of young persons when carrying out their risk assessments.

If young persons have not previously been employed in the workplace, then existing risk assessments should be reviewed accordingly. The assessment of risks to 'young persons' must be carried out before their employment or work placement period begins.

DH and AH will be responsible for carrying out risk assessments and maintaining records. Significant findings will then be brought to the attention of students on work experience, and the measures they need to take to avoid the risk before they work in the area.

The establishment will ensure that the parents/guardians of children, i.e. those under minimum school leaving age (MSLA), are informed of the key findings of the risk assessment before the placement begins.

All young people and students on work experience will be provided with appropriate induction, information, instruction, training and supervision.

Where the school's own students undertake work experience with a local employer, the school will ensure that pre-placement checks of health, safety and welfare arrangements at the employers' premises are carried out by suitably qualified and competent people. They must also ensure that students are prepared for, supported and monitored appropriately during work placement programmes.

The students own school or college will be responsible for carrying out health, safety and welfare arrangements pre-placement checks (including risk assessments) and ongoing monitoring during placement period.

AH and DH will be responsible for managing work experience placements.

Any pupil undertaking work experience at this Establishment will be given an induction, which will be recorded using the [Work Experience Induction Checklist](#).

Completed checklists are located DH/AH

[Click to go back to main index](#)

3.41 Working at Height

The Work at Height Regulations 2005 requires that, "every employer shall take suitable and sufficient action to prevent, so far as is reasonably practicable, any person falling a distance liable to cause personal injury".

Under the Management of Health and Safety at Work Regulations 1999 the Employer has duties to undertake risk assessments including the duty to identify, assess and control risks on their premises.

This establishment will assess the risks from working at height and make plans to either avoid the work at height, or to do the work more safely.

SBM will be responsible for carrying out the risk assessment for each activity involving significant risk whilst working at height and maintaining the records.

Where work at height cannot be avoided suitable and appropriate work equipment will be provided. It will be inspected, tested and maintained on a regular basis by a competent person and records will be kept.

An annual inspection of equipment used to work at height will be carried out by the CT/SM.

This establishment has a Ladder Checklist and a TASS Checklist to record the inspection and maintenance of ladders and/or other access equipment.

The checklists are located in the CT/SM office and will be maintained by the CT/SM.

faulty equipment should be taken out of use immediately and the appropriate manager should be informed.

All staff members involved in working at height will be given full information, instruction and training in the use of any relevant equipment.

Further information can be found on HSE website www.hse.gov.uk

Advice for teachers and classroom assistants is available in the HSE document Keeping safe when working at height

The HSE document "Practical guidance for schools on working at height"

The Ladder Association "Ladder Book"

[Click to go back to main index](#)

3.42 Workplace (Health, Safety & Welfare)

Employers have a general duty under the Health and Safety at Work Act 1974 to ensure the health, safety and welfare of their employees at work, and others who are not employees but use their premises.

The Workplace (Health, Safety and Welfare) Regulations 1992 expand on these duties and are intended to protect the health and safety of everyone in the workplace and to ensure adequate welfare facilities are provided for people at work.

The Regulations require employers to make provision for the following:

- Maintenance of a safe workplace, equipment and systems of work;
- Suitable and sufficient ventilation, lighting and indoor temperature;
- A clean workplace and furnishings with easy to clean surfaces;
- Sufficient work space with suitable work stations and seating;

- Floors and traffic routes of suitable condition and free from damage or hazards;
- The prevention of people falling from height, or being struck by falling objects;
- Windows (and other transparent/translucent surfaces) made of safe materials, that do not expose people to risks to their health & safety, and are able to be cleaned safely;
- Traffic routes organised to allow pedestrians and vehicles to circulate in a safe manner;
- Suitable and sufficient toilets and washing facilities;
- An adequate supply of drinking water;
- Accommodation for personal or work clothing, and adequate facilities for changing clothing where necessary;
- Facilities for rest and to eat meals.

This Establishment will ensure that suitable arrangements are in place to cover these provisions, so far as is reasonable practicable. In order to monitor this, a regular workplace inspection will be undertaken using the Establishment Workplace H&S Inspection Proforma.

Workplace inspections will be undertaken by SBM on a termly.

The responsibility for building and equipment maintenance lies with the Caretaker/Site Manager.
Any building or equipment defects or hazards should be reported by logging faults and defects in the Log book in the main office.

[Click to go back to main index](#)

4 Access to Policy Statement

A copy of this statement is to be made available to all employees.
