Dear Parents

## Introduction of a weekly times tables test

We have decided as a staff that we are going to introduce a weekly times tables test for KS2. Children from y3 to y6 will be sent home with 6 or 12 facts to learn and once they are secure with all tables for their year group, they will get mixed tests. Then they will be tested every Friday in a random order and some weeks this will be multiplication facts and other weeks it will be division.

We know that some children find recalling the tables quickly quite difficult, while others already know them. For these more confident children, we aim to improve their speed and accuracy of recall so scores will be recorded as score /20, 40 or 60 with a time in their diaries so you can see how they are progressing. They may receive the same facts to learn more than once but they will be expected to improve their score and/or time.

I have attached some sample tests which will be given each Friday. We also know that there are many online games, videos and apps which help children to learn them in a fun way and we will be using games and resources from [www.timestable.co.uk](http://www.timestable.co.uk) and <http://www.bbc.co.uk/sport/football/super movers> to help pupils learn them in school too, which you can also use at home for free.

For some time now you have been supporting children to learn their weekly spellings and this has made a dramatic improvement to the spelling skills of our children. Therefore, we are hopeful that with the same effort from school, parents and children we can have similar results and improve their times tables knowledge, which I know will be an invaluable and important skill for the rest of their lives. Thank you in anticipation,

Mrs Mussell  
Deputy Head and Maths Subject Leader
