

Maths Programme of Study	Detail	Example
<p>Practise and develop oral and mental skills (e.g. counting, mental strategies, rapid recall of +, -, x and ÷ facts) NB Oral and Mental skills are practised daily within the lesson – teachers choose different aspects to work on each day.</p>	<ul style="list-style-type: none"> Count on/back from a given number in steps of 100/1000/10,000/100,000 up to 500,000 Read, write and order numbers to 500,000 Compare numbers to at least 500,000 Partition numbers to at least 500,000 Find powers of 10 more than a given number Read, write, order and compare decimal numbers up to 3dp Partition decimal numbers to 3dp Round decimals with 1 and 2dp to the nearest whole number Multiply and divide numbers mentally drawing upon known facts Multiply and divide any whole number by 10, 100, 1000 and multiply and divide any decimal number by 10 and 100 Count on/back with positive and negative numbers, including through zero Count on/back in fraction and decimal sequences? (e.g. 2.5 or $1\frac{1}{2}$) Round any number up to 500,000 to the nearest 10, 100, 1000, 10,000 and 100,000 Add/subtract: 4-digit and 1-digit numbers, a 4 digit and tens, a 4-digit number and hundreds and a 4-digit number and thousands and combinations of pairs of 2,3 or 4 digit numbers Find complements to 100 and 1000 and to £1.00 Recognise and use squared and cubed numbers 	<p>$6.7 \times 10 = 67$ $6.7 \times 100 = 670$ $890 \div 10 = 89$ $890 \div 100 = 8.9$ $6^2 = 36, 12^2 = 144$</p> <p>Write in ascending order: 4.35 6.56 4.53 6.785 90.768</p> <p>$56.78 = 50 + 6 + 0.7 + 0.08$ $456.78 = 400 + 50 + 6 + 0.7 + 0.08$</p>
<p>Number</p>	<ul style="list-style-type: none"> Know and use the vocabulary of prime numbers Establish whether a number up to 100 is prime and recall prime numbers up to 19. Read Roman numerals to 1000 (M) and recognise years written in Roman numerals 	<p>What is special about these numbers? 2, 3, 5, 7, 13, 17</p> <p>Why is 1 NOT a prime number – explain.</p> <p>What is XI? Write 1923 in Roman Numerals?</p>
<p>Geometry: Angles</p>	<ul style="list-style-type: none"> Know angles are measured in degrees; estimate and compare acute, obtuse and reflex angles. Draw given angles and measure them in degrees ($^{\circ}$). Identify: angles at a point and one whole turn (total 360°), angles at a point on a straight line and $\frac{1}{2}$ a turn (total 180°) other multiples of 90°. 	<p>If one angle in a triangle is 38° and another is 68°, what type of angle will the third be?</p> <p>Tick all the obtuse angles: 47° 107° 98° 90°</p> 
<p>Geometry: shapes</p>	<ul style="list-style-type: none"> Identify 3D shapes, including cubes and other cuboids, from 2D representations (nets). Use the properties of rectangles to deduce related facts and find missing lengths and angles. Distinguish between regular and irregular polygons (2D shape) based on reasoning about equal sides and angles. 	<p>Find 3 similarities between the net of a tetrahedron and the net of a cube.</p>  <p>Share them with a partner. Are any the same/different?</p>

<p>Geometry: Position and Direction</p>	<ul style="list-style-type: none"> Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed. 	<p>A rectangle is translated 3 squares up and two squares to the left. Three of the coordinates of the translated square are: (5, 7) (10, 14) (10, 7).</p> <p>What are the co-ordinates of the original rectangle?</p>
<p>Measures</p>	<ul style="list-style-type: none"> Convert between different units of metric measure (for example, km and m; cm and m; cm and mm; g and kg; l and ml). Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints. Solve problems involving converting between units of time. Estimate volume (for example using 1cm³ blocks to build cuboids (including cubes) and capacity (for example, using water)). Use all four operations to solve problems involving measure. 	<p>Use <, > or = to complete the statements below</p> <p>750g 0.8kg 500ml Half a litre 17mm 2cm – 5mm</p> <p>A 5p coin has thickness of  a</p> <p>1.6mm</p> <p>Jake makes a tower of 5p coins worth 90p. What is the height of the coins in cm?</p>
<p>Line graphs and timetables</p>	<ul style="list-style-type: none"> Solve comparison, sum and difference problems using information presented in a line graph Complete, read and interpret information in tables, including timetables
