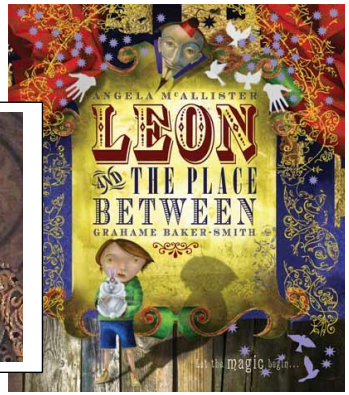
Who's the King of the Castle?
Summer 2 MTP Y2



Successful Learners

Areas of Learning

History/Science lead

As a global citizen children will think about life in the past and in particular, significant Kings or Queens of the past, how they ruled and whether they were 'good' rulers. How did their decisions affect the people of Britain and other countries? They will also look at how things have changed and how Monarch's today have a different role to play in decision making.

We will visit Conisbrough Castle to embed their understanding of how life would have been in the past.

As a scientist the children will develop their understanding of what a healthy diet is and we grow and change as human beings. We will think about how our lifestyles are similar to and different from those in the past.

Confident Capable Individuals

Enterprise and Creativity

As creative individuals, the children will create their own family crest using textiles in DT, which will represent the things that are important to them as a family 'team'.

In Music, children will learn to play the recorder in preparation for performing to an audience, our class buddies. In ICT children will learn about how to create their own information sheet.

Personal Development

In terms of personal development children will be encouraged to be decision makers and consider the impact that decisions have on others.

Children will have a chance to explore their family trees.

We will be thinking about our move to Year 3 and sharing our thoughts and questions. We will be using transition as an opportunity to discuss new beginnings.

Responsible Thoughtful Citizens

Spiritual & Moral

As responsible citizens children will consider who has responsibility for making decisions and whether these decisions are fair. We will ask the children to think about what decisions they would make if they were 'King for the Day'.

We will also be discussing whether we think a circus is a good thing or not using the angle of how animals are treated.

Global/Local Community

As global citizens, children will learn about the people that make important decisions and about how they can make decisions and bring about change. How monarchs of the past had the power to make decisions and how now we have voting and politicians who 'rule'. We will share knowledge of food around the world leading on from our Mexico experience and discuss countries as part of the World Cup.
