Information For Parents

## A guide to intervention programmes

We are continuously assessing our pupils. For those children who are not making enough progress, or who may be significantly behind, we provide interventions to give them an extra boost. These are delivered additionally to literacy and numeracy lessons and are delivered by our strong team of teaching assistants under the management of the class teacher.

We provide a range of interventions to support pupils in:

- Reading
- Spelling
- Numeracy
- Social skills
- Fine and/or gross motor skills
- Handwriting
- Speech and language needs

The children are assessed at the beginning of the intervention, and then at regular intervals to monitor their progress. Their progress is communicated to the class teacher and then to our Special Educational Needs coordinator.

We review the effectiveness of these interventions regularly so that we can ensure that children are receiving the right interventions for them and that we are directing our resources to the children who need them most.
