

Treasure Baskets

Treasure basket items are used to allow children to explore natural objects and textures using all their senses. It allows them to practice fine motor control and hand - eye coordination.

Practice at home

- Place object in your child's hand. Use hand over hand support to transfer the object between your hands.
- Place an object in each hand and use hand over hand support to bang the objects together.
- Allow your child to experience objects by smelling, touching and mouthing.

Activity to do at home

Make your own treasure basket using a basket or shallow box. Use wooden and metal assorted objects i.e. brushes, rings, pegs, spoons, pads etc. Try and provide objects that interest and stimulate your child. Make sure that the objects are safe to mouth and handle.
