Message from Staffordshire Fire and Rescue Service

Staffordshire Fire and Rescue Service would like to communicate to young people how to stay safe during the warm weather we are currently experiencing and remind us of the risks of setting grass fires and swimming in open water.

- Deliberately setting grass fires is a crime. It could result in a prison sentence or a £5000 fine.
- Grass fires are very dangerous as they can quickly spread and get out of control.
- Deliberate grass fires can also put both firefighters and members of the public at needless risk of injury.
- When enjoying the outdoors put rubbish in a nearby bin or take it home.

Open water can be dangerous. There may be unseen dangers including the risk of water-borne disease. Cold water shock can kill within one minute of being in the water. Only swim at lifeguarded pools. More safety information can be found on our website at www.staffordshirefire.gov.uk and we are also on Facebook 'Staffordshires Fire and Rescue' and Twitter '@Staffsfire'.
