## Spotlight on The Foundation Stage Minibeasts everywhere!

The children in the Foundation Stage arrived at school one day to discover that we had been invaded by mysterious creepy crawlies!

Once our parents helped us to work out what they were, we had a wonderful time learning all about ladybirds. We have watched the larvae grow and even caught green fly for them to eat! They have all formed cocoons, emerged and flown away now, but it was fascinating to see and we were all sad when they had to go. Now that we have spent lots of time hunting for all kinds of minibeasts in the garden and learnt so many facts, we have written our own minibeast non-fiction book, with diagrams and photographs in.

It is amazing what we know!

We have enjoyed using the book 'What the Ladybird Heard on Holiday' by Julia Donaldson to find out all about London, and some of the fascinating buildings there. We have used the internet and Google Speak to find out information about the famous buildings and even made our own map of London. We even know where the Queen keeps her Crown Jewels and what her corgis are called.

It has been 'fact-tastic' half term.
