

Hedgehogs

By Ava

Diet

Hedgehogs mostly eat worms, slugs, snails and berries but berries are the best.

Habitat

They live in gardens, hedgerows, woods, things similar to a forest slightly.

Amazing Fact

Hedgehogs can swim in calm rivers and climb your garden wall.

Appearance

The hedgehog is a spikey animal. The prickles are what makes them a hedgehog and they are the only creature in the countryside with prickles.

Special Feature

If you count the prickles there could be 5,000.

Extra facts

There is 17 species of hedgehog.
A baby hedgehog is called a hoglet.
