

Information about the School Priorities for 2018-19

Each year, in consultation with governors, the school agrees a set of priority areas to focus on throughout the school year. Invitations to curriculum weeks often link to these priorities so that parents can see how their children are learning in particular areas of the curriculum.

This year there are four main priorities –

PRIORITY ONE: Literacy: reading, to promote a love of reading and impact on reading standards for all children in school

PRIORITY TWO: Literacy : writing, to build on the writing program used in the last school year and to develop children’s independence and creativity in their writing

PRIORITY THREE: Numeracy, for all children to be competent and confident in their use of mental arithmetic skills and to be able to use these when solving mathematical problems

PRIORITY FOUR: RE and Worship. In the teaching of RE, teachers will use the Understanding Christianity materials which are an exciting way of teaching this area of the curriculum. We are also looking forward to engaging our children in leading and delivering the daily act of worship. We are making changes to the pattern of worship at the end of each half term to which all our school families are warmly invited.

Reading

- Children will take part in reading comprehension lessons three times each week and this will include a range of materials appropriate to their age group. We aim to develop the children’s comprehension skills as this impacts on their learning in all areas of the curriculum. Reading comprehension work will also be sent for homework.
- We are going to create exciting book corners to make spaces which encourages and engages children in reading. We are planning visit the local library with all classes during the year.
- We want all children to enjoy reading, both through their individual reading books and books used as part of the class learning linked to the current topic or focus; we will be purchasing new books for all year groups this year and are very grateful to the Friends of Aston parent group who have agreed to pass on some of the funds raised last year for this purpose.

- We are in the process of banding all the reading books for the children in F2 to Y3 and as children bring books home parents will notice that the books have a colour band on or information on the back of the book about banding.
- All children will bring home a reading record which parents can write in when they have read with their child at home.
- Parents and grandparents will be invited to a training session in November to support reading with their child at home and from this session we also hope that some parents or grandparents may like to volunteer to read with children in school.
- All staff will be taking part in a reading Inset Day in October where we will work with an outside provider to support this priority.

Writing

- The “Write Stuff” materials will continue to be used with all our children but there will be a focus on increasing children’s independence and creativity in writing.
- Children’s independent writing will be assessed each half term to provide information for the next steps in their learning.
- In all their writing the children will be helped to understand about the purpose and audience of each piece of writing to give real meaning to their work.
- We will be using quality reading books to inspire children in their own writing and this will link with the reading priority
- We will continue to have high expectations of the children’s handwriting in all areas of learning and will continue to teach handwriting in all year groups. Joined handwriting will be taught from the beginning of Y2 and ink pens will be introduced in Y3.

Mathematics

- The government is introducing another test in 2020. This will be a test for the Y4 children to test their knowledge of times tables. This will be a computer based and timed test. This year, Y3 and Y4 will be prepared for the Y4 times table test; we aim to make sure that our current Y4 children meet this standard even though they will not be part of this new national test this year. Times tables will continue to be taught in Y2 so that these skills can be built on as the children move into KS2.
- There are some changes to the expectations for end of KS1 maths; these raised expectations will be planned for in the Y1 and Y2 teaching and parents will be updated on these at the Year Two parents’ meeting in the

autumn term. Similarly, Year Six parents will be informed of the end of KS2 expectations at the parents meeting in the autumn term.

- Mental and oral skills will form part of the daily morning work for Y1 upwards; this includes all operations so that children are “keeping their skills on the boil” every day and are able to use these skills and instant recall when problem solving
- Reasoning questions will form part of all our daily maths work and link to the current area of maths work so that children build up a wealth of knowledge and experience in this. Problem solving activities will be included in class maths areas.
- Children will be involved in real life maths challenges and will plan days to which they will invite parents – look out for letters about these days!
- We will continue to use the Abacus maths scheme and activities for the children to take part in on the website will be updated regularly.

RE and Worship

- Teachers will teach RE based on the Rotherham Agreed Syllabus and use the Understanding Christianity materials
- All children will have regular opportunities to read/listen to the Bible being read using age appropriate texts. Children will meet some Bible stories more than once in their school life to enable them to study them in greater depth
- Each half term the *School Worship Committee* will choose a different *Christian Value* which will be used as the theme for our daily worship and be linked to Bible stories and statements from the Bible. Reverend Frances and Reverend Dagmar will take a daily act of worship each week and we will continue to invite visitors from other churches and denominations into school to lead morning assemblies
- There will be an increased number of opportunities for children to plan and lead daily acts of worship and their views will be taken into account throughout the school year. We will visit church for assembly each term and plan to hold our Easter Eucharist in All Saints Church in April 2019

Thank you to all our parents for their support and interest in your child's education and we look forward to working with you in the coming year.
