

## **Aims and Objectives**

Design and Technology prepares children to take part in the development of tomorrow's rapidly changing world. The subject encourages children to become autonomous and creative problem solvers, both as individuals and part of a team. It enables them to identify needs and opportunities and to respond by developing ideas and eventually making products. Through the study of DT they combine practical skills with an understanding of aesthetic, social and environmental needs. This allows them to reflect on, and evaluate, past and present design and technology, its uses and impact. Design technology helps all children to become discriminating consumers and potential innovators.

The objectives of Design Technology:

- To develop imaginative thinking in children and to enable them to talk about what they like and dislike when designing and producing.
- To enable children to talk about how things work, and to plan and model their ideas.
- To encourage children to select appropriate tools and techniques for making a product and to use safe procedures.
- To develop an understanding of technological processes, products, their manufacture and contribution to society.
- To foster enjoyment and satisfaction in designing and making.

The National Curriculum for Design & Technology aims to ensure that all pupils:

- develop the creative, technical and practical expertise needed to perform everyday tasks confidently and to participate successfully in an increasingly technological world .
- build and apply a repertoire of knowledge, understanding and skills in order to design and make high-quality prototypes and products for a wide range of users .
- critique, evaluate and test their ideas and products and the work of others
- understand and apply the principles of nutrition and learn how to cook.

The fundamental skills, knowledge and concepts of the subject are set out in the programmes of study in the following areas:

- Design
- Make
- Evaluate
- Technical knowledge
- Food and Nutrition

## **Teaching and Learning Style**

The school uses a variety of teaching and learning styles in DT lessons. Our principal aim is to develop the children's knowledge, skills and understanding. Teachers

# Social Media Policy

ensure that the children apply their knowledge and understanding when developing ideas, planning, making and evaluating the final product. We do this through a mixture of whole class teaching and individual/group work activities. Within lessons, we give children the opportunity to work on their own, and to collaborate with others, listening to ideas and treating others with respect. Children critically evaluate existing products, their own work and that of others. They have the opportunity to use a wide range of resources including ICT.

In all classes there are children of differing abilities. We recognise this fact and provide suitable learning opportunities for all children, matching the challenge of the task to the ability of the child. We achieve this through a range of strategies:

- Setting common tasks that are open-ended and can have a variety of results.
- Grouping children by ability and setting different tasks for each group.
- Providing a range of challenges through the provision of different resources.
- Using additional adults to support the work of individual children or small groups

## **Design and Technology Curriculum Planning**

DT is a foundation subject on the National Curriculum. At Delph Side, we deliver DT as part of our theme based learning. We devise theme plans which outline the learning objective, key learning (as linked to the Lancashire Curriculum), teaching input and task (differentiated) and an opportunity for reflection at the end of each learning experience.

Activities are planned to build on prior learning and we plan for progression through each theme, over the year, so there is an increasing challenge for the children as they move through school.

## **The Foundation Stage**

We encourage the development of skills, knowledge and understanding that can help children to make sense of their world. Learning experiences are planned in Nursery & Reception based on the Early Years Outcomes. Children work towards meeting the early learning goals in 'Understanding the World' and 'Expressive Arts & Design'. We provide a range of experiences that encourage exploration, observation, problem solving, critical thinking and discussion. These activities, both indoor and outdoor, attract the children's interest and curiosity.

These early learning experiences include:

- Real life experiences of animals to develop understanding of growth, decay & changes over time (chicks in Reception and caterpillars in Nursery)
- Asking questions about how things work
- Investigating and using construction kits
- Using a variety of materials, tools and products
- Exploring the natural world in different weathers, seasons etc.
- Handling appropriate tools and construction material safely and with increased control.

## **Design Technology and Information Communication Technology**

ICT enhances our teaching of DT, where appropriate, across all key stages. Children use software and skills from the Computing Curriculum to enhance their designing and making. The children also use the internet and iPads to find out more about the products they will eventually produce.

## **Design Technology and Inclusion**

Through our DT teaching we provide learning opportunities that allow pupils to make progress. We do this by setting suitable learning challenges and responding to each individual child's specific needs. Teachers will provide instruction and guidance on technical processes to take into account these specific needs. We strive to meet the needs of all our pupils with special educational needs, disabilities, who show special talent, and of those learning English as an additional language.

## **Display and Presentation**

The school recognises that the effective display and presentation of pupil's work and the efficient organisation and presentation of material and equipment, has a positive effect on pupil's learning and respect for the subject. Photographs and, where possible, examples of children's DT work are included on class displays.

## **Resources**

We aim to provide resources that are appropriate to the requirements and needs of the pupils in order to carry out any D&T projects to their full potential. Each classroom has a range of basic resources and more specialised materials are kept in specific areas of the school. Certain resources are only accessible to children under adult supervision.

## **Assessment for Learning**

We assess children's work in DT while observing them working during lessons. Teachers base progress judgements against the learning objectives and the success criteria for the lesson. Feedback is given to the children during lessons which allows children the opportunity to develop and progress in future tasks. Children are assessed in line with Age Related Expectations across a range of skills from the National Curriculum, as outlined in the Lancashire Curriculum Key Learning documents. These skills are built upon in each successive year – the subject leader keeps progress records for each year group. An annual assessment of progress for each child is made and this is reported to parents as part of the child's school report.

Children are encouraged to assess and evaluate both their own work and that of other pupils. This helps the children to appreciate how they can improve their performance. This helps them to appreciate how they can improve their performance and potential targets for the future.

## **Monitor and Review**

The monitoring of the standards of children's work and of the quality of teaching and learning is the responsibility of the subject leader and class teachers. The work of the subject leader also involves supporting colleagues in their teaching, being informed about current developments in DT and providing a strategic lead and direction for this subject within the school.

## **Health and Safety**

It is the responsibility of the teacher to ensure all pupils are taught to use materials, tools and techniques for practical work safely and in accordance with health and safety requirements. All adults working with pupils will be made aware of the health and safety implications, will have access to any guidelines used by the school, and will be aware of the school's First Aid policy. Teachers are responsible for carrying out risk assessments when necessary. Children are always made aware of the rules that apply when working with specific tools in D&T.

Use of craft knives should be limited to teaching staff and to year 6 children under direct adult supervision. Hot glue guns should be used by teaching staff/adults only.

**Date of Policy:** Spring 2017

**To be Reviewed:** Spring 2018
