Transport to events	£	1,585.92
Golf Activity Breakfast Club (weekly)	£	635.82
Events cover & CPD cover	£	4,034.05
Healthy Living Cookery Club	£	57.96
Year 2 and Year 6 swimming	£	784.32
TOTAL:	£	14,928.02
REMAINING:	£	6,246.22

We employed a Sports Teaching Assistant from the summer term to offer greater physical activity opportunities to children with additional needs. This has been a very successful appointment due to the experience he brings to the role as the children are provided with engaging sporting activities and positive and consistent behaviour management that allow for a more active classroom.

This Sports TA also supported a new member of staff to run the Change for Life Club. The impact of him supporting the Change for Life Club meant that behaviour was greatly improved and that the children enjoyed the club more.

We have continued to employ a Sports Support Coach, as this has proved to be successful in raising the standard of sports skills of staff and children. Our Sports Coach provides support and training for our staff and a high standard and variety of PE activities and opportunities for our children. The coach is also working with a neighbouring school and together we are continuing to share resources and access to outdoor space. By employing this coach, we were able to offer our children access to a breakfast club at the other local school, as we did not have sufficient uptake to start one here at St Peter's. We also have access to a 3.30pm - 6.00pm wrap-around after-school club at the other school, as we at St Peter's currently offer after school "skill" clubs until 4.15/4.30pm.

This year, the PE co-ordinator has availed of as many "School Sports" competitions and local cluster competitions as possible for our Key Stage 2 children. Children have been eager to participate in both competitions and festivals. At Withdean games, we won 25 medals and the children were ecstatic! This was a marked increase on the 3 medals we won in the previous year so it is evident that the high quality PE provision this year, along with the wide range of sporting and health clubs has had a positive impact in terms of participation and skill development.

We also used some of our funding to hire transport to and from the matches so there was no cost to parents, therefore opening these opportunities up to all children.

Take Part Brighton offered schools reduced rates to give children opportunities to try new sporting activities. We took advantage of this opportunity and had an archery day for Key Stage 1 & 2, along with "Magic Movers" for Early Years and Key Stage 1 in the Summer term. These events were very successful and we would hope to take part in more archery events as this was a unique experience and one that not many of our children had experienced or had access to before.

We also applied for and achieved our first Bronze School Games mark and hope to keep this status and work to improve it over the coming years.

Our PE Co-ordinator had extensive CPD this year to achieve her level 5 certificate in Primary School PE. From that, she intends to remodel our PE provision and playground activities over the coming year.

We were selected to be part of the Premier League Primary Stars programme, run by Brighton and Hove Albion, which we funded entirely through Sports Premium. This programme provided CPD opportunities for 2 of our teachers, along with literacy support for Year 6 children and PSHE support for selected children in Year 3 and 4. All of this was done through using sporting activities. We were also able to run a girls' lunchtime football club to encourage girls to be more active and to take part in football. The overall impact of this programme generated very positive feedback from staff, who felt that they were more able to evaluate and identify their own CPD PE needs and those of the children. This raised the profile of football in the school and the ability to use games and active play as a tool for other areas of learning. The positive sporting attitudes have led to better learning in the classroom and improved relationships with others.

As part of our Key Stage 1 playground provision, we have been running an Active Literacy Club at lunchtimes for girls in years 1 & 2. The aim of this club is to improve literacy skills through sport themed activities. These are built around creative play with a focus on being active. The club was so popular that children from other year groups asked to join in!

We continued to run the Change for Life Club before the end of the school day for selected children in Years 3 and 4 and started this earlier in the year (spring). This did not have a cost attached for parents. This club was evaluated on entry and exit by questionnaires and the purpose was to find out what they understood about Change for Life and their experience of the club. Feedback was really positive. The exit results were as follows:

The results show that 11/14 children enjoyed the club; 6 children rated it 5/5 (top rating!) and 5 children rated it 4/5. One child did not rate it while 2 children rated it a 1 and a 2.

The child who rated it as a 2 wrote that she did not enjoy the club as she misses her art lesson. She suggested changing the club to after school.

10/14 children stated that they wanted to stay in the club and all of the children enjoyed the activities and games we played.

10/14 children were happy that they had achieved what they had set out to achieve, 2 were unsure and 2 said that they had not achieved their objectives. Overall, the children enjoyed the activities on offer.

10/14 children were able to explain how the club helps them. Comments from the children included:

'Keeping fit'
'It makes me feel more comfortable with older children'
'It makes me less shy'
'Working with other people'

To kickstart our Science Week, we invited a fitness coach from "Kidzfit" to run a full day event for the whole school, funded through Sports Premium. Participation in this event was fantastic as children and staff all got involved, and verbal feedback from staff and children was very positive.

Our dedicated staff run many sporting and healthy activity after school clubs:

Dance - our children from Years 2 - 6 participate in our annual spring club which culminates in a performance on stage at Brighton Dome. The club is over-subscribed and is always a highlight for children and last year was no exception! Our school opened the show with a dynamic, high energy performance and many children that had been hesitant about performing prior to the club really enjoyed and made the best of the experience.

Cookery - children from years 1 -6 take part in our Healthy Living Cookery Club. This club is also oversubscribed and last year, the children were really proud to show off their cooking skills to parents and staff! They often made 2 meals/food options each session and even talked about setting up their own cookery club at home.

Sporting Clubs - As always, our football and netball clubs are thriving and popular, with both boys and girls. In the summer term, we offer cricket club and athletics club, which children are also very eager to sign up for. We are using Sports Premium funding to subsidise some of these clubs to reduce costs to parents and further encourage sports clubs participation - for example, the free activity KS2 breakfast club.

Karate - this is an external club with a drop in policy and is always busy and well attended. Children regularly comment on the respect and discipline elements of this club.

Tennis – this club was subsidised through Sports Premium so that the cost was very low for parents. It had a good uptake and is always a popular club with our Key Stage 1 and 2 children.

Yoga – this club was on offer to Years 1 – 6 at different times throughout the year. This offered a different approach to the usual sporting clubs, thinking more about the mental health and well-being of our children. It was incredibly popular and always has a waiting list! It will run again throughout 2018/2019 due to the positive feedback from children and parents.

Golf Activity Breakfast - we chose to fund this club and to offer breakfast to try to engage children that might not have chosen to be a part of a longer and more active after school club. The children who attended have thoroughly enjoyed the experience and we hope to run this again next year.

Pupil premium funding is also used to fund some places in these clubs to encourage equal opportunities.

2018/2019 Areas for Development

For 2018/2019, our Sports priorities are to build on the progress made by pupils and teachers in the development of their skills and to ensure sustainability through evaluating the impact of Sports Funding as part of our normal self-evaluation and provision mapping arrangements.

Our 2018/2019 priorities are:

- To again offer a free activity breakfast club to our Key Stage 2 children here at St Peter's, possibly offering other sports than golf this time to increase uptake.
- To continue our extensive provision of after school activity clubs.
- Maintain Key Stage 1 playground provision and develop Key Stage 2 playground provision.
- Track children's uptake in clubs.
- Continued Sports Coach support from PLAY.
- Entry and exit conversations with children, detailing their involvement in clubs and their sports' skill development.
- Annual questionnaires to staff about the impact the sports coach is having on their own and the children's skills' development.
- Change for Life Club to run again in the spring term with more staff members receiving training.
- To continue our participation in sporting competitions.
- Continue with our daily active 10 minutes of exercise for all year groups as this has been very successful.
- Develop the Key Stage 2 playground activity by training our adults as Sports Leaders and offering children the opportunity to train as Sports Leaders as well.
- Purchasing further resources, such as more kit accessories such as shin pads etc so that all children can participate without extra spending costs to parents.

We are already implementing many of these priorities this year, such as the provision of **11** extracurricular health and activity clubs, partaking in more sport competitions and the daily 10 minutes of exercise, which we already see is having a positive impact on learning behaviours in the classroom.
